

WOOD **Engineering** **and** **Construction** **Handbook**

Second Edition

Keith F. Faherty
Thomas G. Williamson

CONTENTS

Contributors ix

Preface xi

Chapter 1. Wood Properties *Alan D. Freas* **1.1**

- 1.1 Introduction / 1.1
- 1.2 Physical Properties / 1.5
- 1.3 Mechanical Properties / 1.13
- 1.4 Effect of Various Factors on Mechanical Properties / 1.16
- References / 1.29
- Further Reading / 1.29

Chapter 2. Preliminary Design Considerations *Erwin L. Schaffer* **2.1**

- 2.1 Species, Grades, and Sizes of Lumber / 2.1
- 2.2 Commercial Lumber Standards / 2.7
- 2.3 Duration of Load / 2.34
- 2.4 Fatigue / 2.36
- 2.5 Seasoning and Use Condition / 2.36
- 2.6 Preservatives / 2.38
- 2.7 Fire-Resistive Design / 2.45
- 2.8 Sound Control / 2.56
- References / 2.60

Chapter 3. Columns *David G. Pollock, Jr. and S. K. Malhotra* **3.1**

- 3.1 Column Behavior / 3.1
- 3.2 Column Design Formulas / 3.5
- 3.3 Simple Solid Sawn Columns / 3.8
- 3.4 Glued-Laminated Columns / 3.12
- 3.5 Spaced Columns / 3.15
- 3.6 Built-up Columns / 3.22
- 3.7 Combined Loadings for Columns / 3.26
- 3.8 Tables of Allowable Unit Stresses for Columns / 3.31
- References / 3.41

Chapter 4. Bending Members *Kenneth Smetts and Thomas G. Williamson* 4.1

- 4.1 Introduction / 4.1
- 4.2 Lateral Stability Considerations / 4.12
- 4.3 Torsion / 4.17
- 4.4 General Design Procedures for Prismatic Bending Members / 4.18
- 4.5 Wood Bending Members Having Nonprismatic Cross Sections / 4.39
- 4.6 Members Subjected to Bending about Both Axes / 4.64
- 4.7 Members Subjected to Combined Bending and Axial Stresses / 4.68
- 4.8 Ponding Considerations / 4.71
- 4.9 Connection Considerations / 4.75
- References / 4.77

Chapter 5. Mechanical Fasteners and Connectors *Keith F. Faherty* 5.1

- 5.1 Introduction / 5.1
- 5.2 Nails and Spikes / 5.3
- 5.3 Staples / 5.24
- 5.4 Wood Screws / 5.25
- 5.5 Hankinson Formula / 5.36
- 5.6 Group Actions of Fasteners and Connectors / 5.38
- 5.7 Lag Screws / 5.42
- 5.8 Dowels, Drift Pins, and Drift Bolts / 5.55
- 5.9 Bolts / 5.58
- 5.10 Timber Connectors / 5.84
- 5.11 Moment-Resistant Connections / 5.112
- 5.12 Miscellaneous Connectors / 5.117
- 5.13 Connectors of Thin-Gauge Steel Plate / 5.117
- 5.14 Choice of Fasteners / 5.126
- 5.15 Joint Design: General Considerations / 5.127
- References / 5.151

Chapter 6. Trusses *Trus Joist MacMillan* 6.1

- 6.1 The Wood Truss Industry—An Overview / 6.1
- 6.2 Truss System Loading / 6.10
- 6.3 Economic Considerations in Wood Truss Systems / 6.18
- 6.4 Fire and Life Safety in Buildings / 6.20
- 6.5 Roof and Floor Truss System Performance / 6.25
- 6.6 Additional Roof and Floor Wood Truss System Requirements / 6.29
- 6.7 Analysis and Design of Wood Trusses / 6.33
- 6.8 Erection of Wood Truss Systems / 6.96
- 6.9 In-Service Problems / 6.102
- References / 6.106

Chapter 7. Structural Wood Panels *Thomas E. McLain* 7.1

- 7.1 Structural Panel Characteristics / 7.1
- 7.2 Plywood Properties / 7.3
- 7.3 Other Composite Structural Panels / 7.23
- 7.4 Structural Sheathing Applications / 7.27
- 7.5 Plywood-Lumber Beams / 7.38

- 7.6 Glued Stressed-Skin Panels / 7.47
7.7 Appendix / 7.67
References / 7.70

Chapter 8. Diaphragms and Shearwalls *E. F. Diekmann* **8.1**

- 8.1 Section Limitations / 8.1
8.2 Wind Force Fundamentals / 8.2
8.3 Earthquake Force Fundamentals / 8.3
8.4 Diaphragms / 8.5
8.5 Shearwalls / 8.48
References / 8.78

Chapter 9. Arches and Domes *Robert K. Kaseguma* **9.1**

- 9.1 Introduction / 9.1
9.2 Arches / 9.1
9.3 Domes / 9.44
9.4 Research / 9.51
References / 9.52

Chapter 10. Miscellaneous Wood Structures *D. W. Ebeling and Michael A. Ritter* **10.1**

- 10.1 Wood Bridges / 10.1
10.2 Concrete Formwork / 10.55
10.3 Wood-Metal Composites / 10.66
References / 10.76

Chapter 11. Wood Foundation Structures *Alfred R. Mangus* **11.1**

- 11.1 Permanent Wood Foundations (PWF) / 11.1
11.2 Wood Pile Foundations / 11.19
References / 11.45

Chapter 12. Adhesives *R. Richard Avent* **12.1**

- 12.1 Uses of Adhesives in Wood Construction / 12.1
12.2 Types of Adhesives and Their Properties / 12.4
12.3 Computation of Design Stresses for Bonded Wood Elements / 12.11
12.4 Built-up Components Using Adhesives / 12.14
12.5 Repair of Damaged Structures Using Epoxy Adhesives / 12.21
References / 12.39

Appendix. Reference Data *Keith F. Faherty and Thomas G. Williamson* **A.1**

Index follows the Appendix 1.1
