

**Lecture Notes in
Computer Science**

1672

**Mirosław Kutylowski Leszek Pacholski
Tomasz Wierzbicki (Eds.)**

**Mathematical Foundations
of Computer Science 1999**

**24th International Symposium, MFCS'99
Szklarska Poręba, Poland, September 1999
Proceedings**

Springer

Table of Contents

Computing Over Reals

On-Line Addition in Real Base	1
<i>Christiane Frougny</i>	

Query Languages for Real Number Databases Based on Descriptive Complexity Over \mathbb{R}	12
<i>Klaus Meer</i>	

The Arithmetical Hierarchy of Real Numbers	23
<i>Xizhong Zheng, Klaus Weihrauch</i>	

Compression Techniques

Invited Lecture: The Burrows-Wheeler Transform: Theory and Practice. . .	34
<i>Giovanni Manzini</i>	

Efficiency of Fast Parallel Pattern Searching in Highly Compressed Texts . .	48
<i>Leszek Gąsieniec, Alan Gibbons, Wojciech Rytter</i>	

Foundations of Programming

Computing and Comparing Semantics of Programs in Four-Valued Logics . .	59
<i>Yann Loyer, Nicolas Spyratos, Daniel Stamate</i>	

Foundations of Modular SOS	70
<i>Peter D. Mosses</i>	

Message Sequence Graphs and Decision Problems on Mazurkiewicz Traces . .	81
<i>Anca Muscholl, Doron Peled</i>	

Complexity and Algorithms

On the Complexity of Recognizing the Hilbert Basis of a Linear Diophantine System	92
<i>Arnaud Durand, Miki Hermann, Laurent Juban</i>	

The Complexity of the Extended GCD Problem	103
<i>George Havas, Jean-Pierre Seifert</i>	

Complexity Results for Confluence Problems	114
<i>Markus Lohrey</i>	

Model Checking

Is Your Model Checker on Time? 125
Luca Aceto, François Laroussinie

Clausal-Resolution for CTL* 137
Alexander Bolotov, Clare Dixon, Michael Fisher

Model Checking and Higher-Order Recursion 149
Hardi Hungar

Distributed Computing

Multiparty Communication Complexity: Very Hard Functions 160
Ján Maňuch

Invited Lecture: New Perspectives in Distributed Computing 170
Maurice Herlihy, Sergio Rajsbaum

Functional Programming

An Improved Disjunctive Strictness Analysis for Lazy Functional Languages 187
Grazgorz Grudziński

Unique Fixed Point Induction for McCarthy's Amb 198
Søren B. Lassen, Andrew Moran

Automata

On Some Topological Properties of Linear Cellular Automata 209
Luciano Margara

Real-Time Language Recognition by One-Way and Two-Way Cellular Automata 220
Katsuhiko Nakamura

Average State Complexity of Operations on Unary Automata 231
Cyril Nicaud

Fooling Rebound Automata 241
Holger Petersen

Algorithms and Complexity

The Complexity of Minimizing FBDDs 251
Detlef Sieking

Efficient Strongly Universal and Optimally Universal Hashing 262
Philipp Woelfel

XII Table of Contents

Complexity

Football Elimination Is Hard to Decide Under the 3-Point-Rule 410
Thorsten Bernholt, Alexander Gülich, Thomas Hofmeister, Niels Schmitt

Generalized Regular Counting Classes 419
Ulrich Hertrampf

A Foundation of Programming a Multi-tape Quantum Turing Machine ... 430
Tomoyuki Yamakami

Types: Theory and Applications

Invited Lecture: A Type Discipline for Solving Year 2000 Problems in
COBOL Programs 442
Mads Tofte

Type Reconstruction for Functional Programs with Subtyping over a
Lattice of Atomic Types 443
Jerzy Tiuryn

Author Index 455

Lower and Upper Bounds for the Problem of Page Replication in Ring Networks	273
<i>Włodzimierz Gładziński</i>	
Security	
Invited Lecture: Language-Based Security	284
<i>Dexter Kozen</i>	
Logic	
An Algebraic Approach to Knowledge Representation	299
<i>Jānis Čiirulis</i>	
On the Structure of the Monadic Logic of the Binary Tree	310
<i>D. Janin, G. Lenzi</i>	
A New Space Bound for the Modal Logics $K4$, $KD4$ and $S4$	321
<i>Linh Anh Nguyen</i>	
Counting Problems	
On Approximating the Number of Bases of Exchange Preserving Matroids	332
<i>Anna Gambin</i>	
Processes and Bisimulation	
The Semantic Foundations of a Compositional Proof Method for Synchronously Communicating Processes	343
<i>F.S. de Boer, W.-P. de Roever, U. Hannemann</i>	
On Plain and Hereditary History-Preserving Bisimulation	354
<i>Sibylle B. Fröschle, Thomas T. Hildebrandt</i>	
Approximating Weak Bisimulation on Basic Process Algebras	366
<i>Jitka Stříbrná</i>	
Graph Algorithms	
Edge Coloring of Bipartite Graphs with Constraints	376
<i>Ioannis Caragiannis, Christos Kaklamanis, Pino Persiano</i>	
An Efficient Exact Algorithm for Constraint Bipartite Vertex Cover	387
<i>Henning Fernau, Rolf Niedermeier</i>	
On Minimum Edge Ranking Spanning Trees	398
<i>Kazuhisa Makino, Yushi Uno, Toshihide Ibaraki</i>
