Contents

Acknowledgements	ix	Strategic Urban Design on City Regional Level	20
Introduction	1	Strategic Urban Design on City District Level	20
Key Arguments Against and For Strategic Planning and Urban Design	1	Urban Design on Level of Individual Spaces	22
The Purpose of This Book	3	1.4 Summary and Scope for Further Exploration	22
References	5	References	22
Part One The Current Debate about the Sustainable City			
1. What Urban Design Is and Why it is so Important Today	9	2. Compact, Decentralised or What? The Sustainable City Debate	23
1.1 What Urban Design Is or What it Should Be	9	2.1 Starting Point of the Debate	23
Urban Design in the UK: the Theory	9	2.2 The Concept of the Compact City	24
Urban Design in the UK: the Practice	10	Arguments for the Compact City	24
Urban Design in Other European Countries and Cities	12	Arguments Against the Compact City	25
The Question of Over- or Under-regulating Urban Development	14	What Can be Learned from the Compact City Arguments and Counter-arguments	26
The Question of the Scale and Extent of Urban Design Frameworks and Interventions	14	'Decentralised Concentration'	26
Summary Definition of Urban Design	15	Compromise Positions	27
Confusion Regarding the Form and Structure of the Compact City		Confusion Regarding the Form and Structure of the Compact City	28
The Ecological and Environmental Argument		The Ecological and Environmental Argument	29
Where Centrists, Decentralists and Compromisers and Others Agree		Where Centrists, Decentralists and Compromisers and Others Agree	31
1.2 Why Urban Design is Needed More than Ever Today	16	2.3 Conclusions	33
Urban Design Can Enhance the City's Advantages	16	References	34
Urban Design Can Help Diminish or Eliminate the City's Disadvantages	17		
The Role of Urban Design	20		
1.3 The Levels of Urban Design Interventions	20	3. Micro- and Macro-structures of a More Sustainable City	37
		3.1 The Micro-structure of a More Sustainable City	38
		Fundamental Demands on the City Structure	38

CONTENTS

The Urban Neighbourhood	38	Comparison with Inter-war Housing in Berlin	84
Clusters of Neighbourhoods Forming Urban Districts	42	4.3 Glasgow in the 1950s, 1960s and early 1970s	85
Clusters of Districts Forming Larger Towns	44	Comprehensive Development Areas and Peripheral Estates	86
A Cluster of Towns Forming a City	44	Road-building Programme	88
The Composite Structure of the City or City Region	44	Conclusions	90
3.2 The Macro-structure of Alternative City Models	45	4.4 Consolidation of the Old City but New Development at Random: the 1970s and 1980s	90
The Core City	46	Uneven Population Density and Sprawl	94
The Star City	48	Functional Zoning	94
The Satellite City	49	Social Stratification	98
The Galaxy of Settlements	50	Spatial and Formal Incoherence	98
The Linear City	52	Conclusions	98
The Polycentric Net or the Regional City	53	References	99
3.3 Comparison of Areas and Dimensions of the City Models	54	5. Application of Micro- and Macro-structure: the Case of Glasgow	101
Areas and Dimensions of City Models with a Population of 250,000	56	5.1 City Region	101
Areas and Dimensions of City Models with a Population of 500,000	57	Figure-ground of the City Region	102
3.4 Comparison of the Potential Performance of the Six City Models in Terms of Sustainability Indicators	59	Development Structure of the City Region	102
3.5 Viability of the Models in Terms of the Required Changes to the Urban Fabric of Existing Cities	66	Major Transport Routes in the City Region	102
3.6 A City Form Based on Transport Systems	67	Structure of Linear Open Spaces	103
3.7 What is Achieved by the Net City Model	68	Conclusions	103
3.8 Conclusions	69	5.2 The Existing Development Pattern of Greater Glasgow	104
References	70	Existing Figure-ground of Greater Glasgow	105
Part Two Application of the Model Urban Structure to Glasgow		Existing Vehicular Transport Network	106
4. Glasgow – A Typical Post-industrial City	75	Existing Public Transport Network	108
4.1 Glasgow's Development up to the Inter-war Period	75	Structure of Linear Open Spaces	109
The Major Characteristics of the Industrial City	75	Seeing it all Together	110
The Common Characteristics of Development Clusters	78	5.3 Search for a Micro-structure of Provision Centres and Transport Linkages	111
4.2 Glasgow's Development Between the Wars	81	Existing Neighbourhood Centres and Real or Notional Neighbourhoods, their Boundaries and Locations	112
Introduction of the Garden Suburb	81	Real and Notional Districts and their Centres	113
New Tenement Development	82	Real and Notional Towns and their Centres	114
Effect of Inter-war Development on the City	83	Primary and Secondary Transport Networks Linking Neighbourhoods, Districts and Town Centres	116
		Primary Vehicular Transport Routes Bypassing Developed Areas and Centres	118
		Conclusions	119

5.4 Adaptability of the Structure to the Conurbation of Glasgow	120	Epilogue	141
Strategy One	122	A Slow and Incremental Process of Transformation	141
Strategy Two	122	The Need for Flexible Regeneration Frameworks	141
Strategy Three	122	The Need for Political Support for Long-term Strategic Plans	142
Combination of Strategies	123	The Need for Regional Rather than Local Thinking, Planning and Design	142
5.5 Conclusions	123	The Need for Community Involvement in Urban Regeneration	143
References	124	The Need to Analyse the Impact of Individual Regeneration Projects	143
6. Strategic Design of Districts of the City of Glasgow	127	The Need to Review Professional Responsibilities and Education	143
6.1 Objectives of, and Theoretical Framework for, the Structuring of Districts	127	Conclusions	144
6.2 Case Studies of the Transformation of Districts in the City of Glasgow	128	References	144
Bridgeton	128		
Easterhouse	132		
A Link Between Partick and Govan	136		
6.3 Conclusions	137	Index	145
References	139
