THEORY AND PRACTICE

## TABLE OF CONTENTS

	Page
INTRODUCTION--Y. Pomeranz and L. Munck.....	1
SESSION I: Cereal Production and Utilization	
1. CEREAL PRODUCTION--J. Mac Key.....	5
Abstract--World Cereal Production--World Cereal Acreage--World and National Trends in Grain Yield--Biological Yield Potential of Cereals-- Yield as a Compromise--Yield as a Nutritional Problem--Literature Cited.	
2. ECONOMIC CONSIDERATIONS IN INDUSTRIAL UTILIZATION OF CEREALS--L. D. Hill and A. Mustard....	25
Introduction--World Demand and Supply Situation-- Alternative Marketing Systems--Comparison of the Performance of the Alternative Marketing Systems-- Conclusions--Literature Cited.	
3. THE RELATIVE ECONOMICS OF WHEAT AND MAIZE AS RAW MATERIALS FOR STARCH MANUFACTURE--N. Wookey and M. A. Melvin.....	55
Introduction--Production Methods--The Value of Co-Products in Starch Manufacture--EEC Protection System for Starch Manufacture--Relative Costs of Starch Made from Wheat and Maize--Economic Consequences--References.	
4. BIOMASS: SOURCE OF TOMORROW'S CHEMICALS--E. S. Lipinsky .....	69
Desirable Characteristics for Raw Materials-- Strategies to Replace Petrochemicals--Specific Chemical Opportunities--Conclusions--Literature Cited.	

## SESSION II: Harvest and Preservation of Cereals

5. HARVEST OF GRAIN AND STRAW: QUANTITIES AND QUALITIES--T. J. Ravn.....83  
Present Situation--Qualities--Quantities--The Proposed Harvesting System--References.
6. HARVEST AND SEPARATION OF WHOLE-CROP FEED BARLEY--R. Vind.....93  
Introduction--The Shortcomings of Combine Harvesting--A New Technology for Cereal Harvest--Results and Discussion.
7. MULTIOBJECTIVE OPTIMIZATION OF A GRAIN DRYING PROCESS--L. T. Fan, J. H. Shieh, and F. S. Lai.....103  
Abstract--Introduction--Multiojective Optimization--Numerical Example--Results and Discussion--Concluding Remarks--Acknowledgement--Nomenclature--References--Appendix A--Appendix B.

## SESSION III: Fractionation--Physical and Chemical Properties

8. MILLING OF CEREALS FOR TOTAL UTILIZATION--H. Bolling.....137  
Introduction--Energy Flow and Consumption in the Milling Industry--Summary--Literature Cited.
9. THE SEPARATION OF FERMENTABLE CARBOHYDRATE AND PROTEIN FROM WHEAT BY WET-MILLING UNDER AUSTRALIAN CONDITIONS--D. H. Simmonds, I. L. Batey, F. MacRitchie, and K. Haggett .....145  
Introduction--Processes for the Production of Ethanol--Conclusion--References
10. APPLICATION AND CONTROL OF THERMOPLASTIC EXTRUSION OF CEREALS FOR FOOD AND INDUSTRIAL USES--A. A. El-Dash.....165  
Introduction--Engineering of the Thermoplastic Extruder--Extrusion Processing and Cost--Control of Extrusion Process--Application of Thermoplastic Extrusion--Extrusion-Induced Physical, Chemical and Nutritional Changes--Conclusions--Acknowledgement--Literature Cited.

11. MODIFICATION OF PROTEINS FOR FUNCTIONAL AND NUTRITIONAL IMPROVEMENTS--S. Nakai and W. D. Powrie .....217  
Covalent Attachment of Limiting Amino Acids to Cereal Proteins--Relationships of Physicochemical Properties of Proteins and Their Functionality--Effects of Protein Modification on Functionality--Conclusion--Literature Cited.
12. THE PHYSICAL PROPERTIES OF WHEAT PROTEINS--G. A. LeGrys, M. R. Booth, and S. M. Al-Baghdadi .....243  
Abstract--Introduction--Material and Methods--Results and Discussion--General Discussion and Conclusions--Acknowledgements--Literature Cited.
13. STARCH: INDUSTRIAL RAW MATERIAL--W. M. Doane .....265  
Chemicals from Starch--Polymers from Starch--Conclusion--Literature Cited.
14. SWEETENERS FROM CEREALS: THE INTERCONVERSION OF FUNCTION--S. M. Cantor .....291  
Analogues--The Sweetener Revolution--Corn--A Renewable Resource--Complexity of Analysis--The Pursuit of Sweetness--Historic Parallels--Other Analogues--Concluding Observations--References.

SESSION IV: Modifications--Chemical, Pyrolytic,  
Biological

15. INDUSTRIAL CHEMICALS FROM CEREALS--J. R. Daniel and R. L. Whistler .....307  
Introduction--Cereal Grain Usage--Food and Chemicals from Plant Cell Culture--Use of Cellulose and Hemicellulose--Products by Chemical Methods--Literature Cited.
16. THERMOCHEMICAL ROUTES TO CONVERT BIOMASS TO GASEOUS AND LIQUID FUELS--N. Lindman and G. Blomkvist .....325  
Principal Conversion Lines--Gasification Principles--Experimental Results from RIT--Commercial LBG Processes--Some Aspects on the Raw Material--Literature Cited.

17. BIOCONVERSION PROCESSES--P. Linko and Y. Linko .....339  
Introduction--Food Related Applications--Starch  
Processing--Hydrolysis of Lignocellulosic  
Materials--HTST-Extruder as Bioreactor--Ethanol  
Fermentation--Production of Useful Chemicals--  
Conclusions--Literature Cited.
18. MICROBIAL PROCESSES FOR THE CONVERSION OF  
LIGNOCELLULOSE/HEMICELLULOSE RESIDUES TO ENERGY  
AND FEEDSTUFFS--R. W. Detroy, S. N. Freer, R. L.  
Cunningham, and R. J. Bothast .....359  
Literature Review--Results--Literature Cited.
19. USE OF BIOSENSORS IN BIOCONVERSION PROCESSES--  
C. F. Mandenius and B. Danielsson .....383  
Introduction--Prerequisites of Biosensors--  
Other Sensors Useful in Biotechnology--Applica-  
tions in Process Control--Summary--Acknowledge-  
ment--References

#### SESSION V: Cereals for Food, Feed, Fuel, and Chemicals

20. SORGHUM--R. A. Creelman, L. W. Rooney and  
F. R. Miller .....395  
Composition of Sorghum Plants and Grain--Food  
Quality and Utilization of Sorghum--Summary--  
References.
21. BARLEY FOR FOOD, FEED AND INDUSTRY--L. Munck .....427  
Past, Present and Future--Food, Feed and  
Industry--Barley as a Research Model for the  
Development of Cereals--Barley for Feed--Barley  
for Malting--The Milling of Barley for Food and  
Industry--Barley for Food--Acknowledgements--  
Literature.
22. WHEAT AND TRITICALE-A MULTIPLE APPROACH FOR USE  
AS A RENEWABLE RESOURCE--Y. Pomeranz .....461  
Introduction--Plant Breeding--Processing--  
Unique Attributes--Literature Cited.
23. THEORY AND PRACTICE OF RICE BY-PRODUCTS  
UTILIZATION--S. Barber, C. B. de Barber, and  
E. Tortosa .....471  
Introduction--Brokens--Rice Husks--Rice Bran--  
Rice Straw--Literature Cited.

SESSION VI: By-Product Conversion and Utilization

24. INDUSTRIAL USES OF DRY-MILLED CORN PRODUCTS--  
T. P. Shukla.....489  
Introduction--Dry-Milling Process--Dry Milled  
Corn Products--Demand of Dry Milled Corn  
Products--End-Use Technology--Research Needs and  
Future Direction--Acknowledgement--Literature  
Cited.
25. PROPERTIES AND INDUSTRIAL USES OF CORNCOBS--  
K. M. Foley and D. I. B. Vander Hooven.....523  
Elemental Analysis--Selected Physical and Chemical  
Properties--Furfural Yield--Selected Feed Related  
Properties--Some Pesticides Formulated on Corncob  
Granules--Industrial Uses--Bibliography.
26. UTILIZATION OF CEREAL PROCESSING BY-PRODUCTS--  
J. W. Finley.....545  
Waste Streams--Dilute Waste from Gluten-Starch  
Separation Plants--Press water from Brewer Spent  
Grains--References.
27. INDUSTRIAL UTILIZATION OF STRAW--F. Rønnen.....563  
Production of Cattle Feed--Single Cell Protein  
Production (SCP)--Paper and Board--Building  
Boards--Chemicals and Energy--Conclusions.
28. THE BIOCONVERSION OF WASTE STRAW INTO ANIMAL  
FEEDSTUFFS--K. J. Seal and I. Burrows.....571  
Introduction--Use and Disposal of Straw--  
Microbiological Conversion Processes--Isolation  
of Fungi for Use in Bioconversion Process--The  
Development of a Process to Increase the  
Digestibility of Straw--The Value of *C. Cinereus*  
in the Process--Future Developments in the Pro-  
cess--The Future of Microbiological Upgrading--  
References.
29. PROCESSED FEED FROM STRAW FOR RUMINANTS--V. F.  
Kristensen, M. Israelsen and A. Neimann-Sørensen....589  
Treatment of Straw for Feeding Purposes--Nutri-  
tional Properties of Processed Straw--Use of  
straw in Rations for Ruminants--Conclusions--  
Literature Cited.

SESSION VII: Utilization as Fuel Sources

30. SMALL-SCALE ETHANOL PRODUCTION FROM CEREAL  
FEEDSTOCKS--C. G. Coble, E. A. Hiler, J. M.  
Sweeten, H. P. O'Neal, V. G. Reidenbach, W. A.  
LePori, W. H. Aldred, G. T. Schelling and.....611  
R. D. Kay  
Introduction--Small-Scale Ethanol Production  
Plant--By-Product Utilization--Sweet Sorghum as  
Feedstock for Ethanol Production--Experimental  
Investigations--Equipment and Procedure--  
Conclusions--Literature Cited.
31. GASOHOL: THE U.S. EXPERIENCE--W. A. Scheller.....633  
Introduction--Nebraska's Gasohol Program--  
National Gasohol Program--Gasohol Performance  
and Economics--Energy Savings with Gasohol--  
By-Product Values and Use--Literature Cited.
32. PROCESS CONSIDERATIONS FOR THE PRODUCTION OF  
ETHANOL FROM CEREALS--B. E. Norman and N. W.  
Lützen.....651  
Introduction--Alternative Processes--Conclusion--  
Acknowledgement--References.
33. LOW REFINED PLANT MATERIAL AS DIESEL FUEL--  
R. F. Madsen, W. K. Nielsen and O. Hansen.....667  
Emulsions--Test Results--References.
34. POTENTIAL FUEL PRODUCTION FROM CEREALS--AN  
AUSTRALIAN ASSESSMENT--G. A. Stewart.....675  
Summary--Introduction--Methodology of Assess-  
ment--Potential Production of Raw Materials and  
Alcohols--Cost of Ethanol and Methanol--Potential  
for Use of Straw as a Substitute for Oil--  
Conclusions--References.
35. ECONOMIC EVALUATION OF INDUSTRIAL USE OF CEREALS--  
THE ALCOHOL FUEL CASE--L. W. Schruben.....685  
Introduction--Historical Perspective--Impact on  
Different Segments of Economy--Impact on General  
Welfare--Food vs Fuel--Summary--Literature Cited.
- CEREALS--A RENEWABLE RESOURCE: WRAP-UP OF SYMPOSIUM--  
Y. Pomeranz.....709
