CONTENTS

PREFACE xxvii

ACKNOWLEDGMENTS xxxiii

PART ONE
SYSTEMS ANALYSIS FUNDAMENTALS

1 ASSUMING THE ROLE OF THE SYSTEMS ANALYST 1

Information As an Organizational Resource 1
- Managing Information as a Resource 1
- Managing Computer-Generated Information 1

Systems Analysis and Design Concepts 2
- Transaction Processing Systems 2
- Office Automation Systems and Knowledge Work Systems 2
- Management Information Systems 2
- Decision Support Systems 3
- Expert Systems and Artificial Intelligence 3
- Group Decision Support Systems 3
- Executive Support Systems 4
- Need for Systems Analysis and Design 4
- End Users 5

Role of the Systems Analyst 5
- Systems Analyst as a Consultant 5
- Systems Analyst as Supporting Expert 6

Systems Analyst as Agent of Change 6
Qualities of the Systems Analyst 6
The Systems Development Life Cycle 7
Identifying Problems, Opportunities, and Objectives 7
Determining Information Requirements 8
Analyzing System Needs 9
Designing the Recommended System 9
Developing and Documenting Software 10
Testing and Maintaining the System 10
Implementing and Evaluating the System 10
The Impact of Maintenance 11
Using CASE Tools 12
Increasing Analyst Productivity 13
Improving Analyst-User Communication 13
Integrating Life Cycle Activities 13
Accurately Assessing Maintenance Changes 14
Upper and Lower CASE 14
Upper CASE Tools 14
Lower CASE Tools 15
Software Reverse Engineering and Reengineering 17
Object-Oriented Systems Analysis and Design 18
Need for Structured Analysis and Design 19
Alternative Methodologies 19
Summary 20
HyperCase® Experience 1 22
Keywords and Phrases 22
Review Questions 23
CPU Case Episode 1: The CASE Opens 25

2 UNDERSTANDING ORGANIZATIONAL STYLE AND ITS IMPACT ON INFORMATION SYSTEMS 27
Organizational Fundamentals 27
Organizations As Systems 27
Interrelatedness and Interdependence of Systems 28
Organizational Boundaries 28
System Feedback for Planning and Control 28
Environments for Organizational Systems 29
Openness and Closedness in Organizations 29
Taking a Systems Perspective 29
Depicting Systems Graphically 30
Systems and the Context Level Data Flow Diagram 30
Systems and the Entity-Relationship Model 33
Levels Of Management 35

PART TWO
INFORMATION REQUIREMENTS ANALYSIS

4 SAMPLING AND INVESTIGATING HARD DATA 79
Sampling 79
The Need for Sampling 79
Sampling Design 80
The Sample Size Decision 82
Kinds of Information Sought in Investigation 88
Types of Hard Data 89
Abstracting Data from Archival Documents 96
Summary 98
Keywords and Phrases 99
Review Questions 99
HyperCase® Experience 4 100
Problems 101
Group Project 104
CPU Case Episode 4: Minding the Memos 106

5 INTERVIEWING 109
Kinds of Information Sought 109
Planning the Interview 110
Five Steps in Interview Preparation 110
Question Types 112
Question Pitfalls 115
Arranging Questions in a Logical Sequence 115
Structured Versus Unstructured Interviews 117
Making a Record of the Interview 118
Before the Interview 121
Conducting the Actual Interview 121
Beginning the Interview 121
Writing the Interview Report 123
Joint Application Design 123
Conditions That Support the Use of JAD 124
Who Is Involved 124
Planning for the JAD Session 125
Where to Hold JAD Meetings 126
Accomplishing a Structured Analysis of Project Activities 126
Potential Benefits of Using JAD in Place of Traditional Interviewing 126
Potential Drawbacks of Using JAD 127
Summary 127

HyperCase® Experience 5 *128*
Keywords and Phrases *129*
Review Questions *129*
Problems *130*
Group Projects *132*
CPU Case Episode 5: Tell Me More, I'll Listen *134*

6 USING QUESTIONNAIRES 147
Kinds of Information Sought *147*
Planning for the Use of Questionnaires *148*
Writing Questions *148*
Using Scales in Questionnaires *152*
Scaling Fundamentals *152*
Constructing Scales *154*
Designing and Administering the Questionnaire *156*
Designing the Questionnaire *156*
Administering the Questionnaire *162*
Summary *163*
Keywords and Phrases *165*
Review Questions *165*
HyperCase® Experience 6 *166*
Problems *166*
Group Projects *168*
CPU Case Episode 6: The Quest Continues . . . *170*

7 OBSERVING DECISION-MAKER BEHAVIOR AND OFFICE ENVIRONMENT 175
Kinds of Information Sought *175*
Observing a Decision Maker's Behavior *175*
Observing a Typical Manager's Decision-Making Activities *176*
Time and Event Sampling *176*
Observing a Decision Maker's Body Language *177*
Observing the Physical Environment *179*
Structured Observation of the Environment *179*
Summary *187*
HyperCase® Experience 7 *188*
Keywords and Phrases *189*
Review Questions *190*
Problems *190*
Group Projects *191*
CPU Case Episode 7: Seeing Is Believing *193*

8 PROTOTYPING 199
Kinds of Information Sought 199
Initial User Reactions 199
User Suggestions 200
Innovations 200
Revision Plans 200
Approaches to Prototyping 200
Kinds of Prototypes 200
Prototyping as an Alternative to the Systems Development Life Cycle 203
Developing a Prototype 204
Guidelines for Developing a Prototype 206
Disadvantages of Prototyping 208
Advantages of Prototyping 209
Users' Role in Prototyping 211
Interaction with the Prototype 211
Summary 213
Keywords and Phrases 214
Review Questions 214
HyperCase® Experience 8 215
Problems 216
Group Projects 217
CPU Case Episode 8: Reaction Time 219

PART THREE
THE ANALYSIS PROCESS

9 USING DATA FLOW DIAGRAMS 229
The Data Flow Approach to Requirements Determination 229
Advantages of the Data Flow Approach 229
Conventions Used in Data Flow Diagrams 230
Developing Data Flow Diagrams 232
Creating the Context Diagram 232
Drawing Diagram 0 (The Next Level) 233
Creating Child Diagrams (More Detailed Levels) 235
Checking the Diagrams for Errors 236
Logical and Physical Data Flow Diagrams 240
Developing Logical Data Flow Diagrams 242
Developing Physical Data Flow Diagrams 243
Partitioning Data Flow Diagrams 246
A Data Flow Diagram Example 248

Creating the Context Diagram 248
Drawing Diagram 0 248
Creating a Child Dia gram 249
Creating a Physical Data Flow Diagram 250
Partitioning the Data Flow Diagram 252
A Second Data Flow Diagram Example 253
Using Data Flow Diagrams 260
Summary 263
HyperCase® Experience 9 266
Keywords and Phrases 266
Review Questions 267
Problems 267
Group Projects 271
CPU Case Episode 9: Just Flowing Along 273

10 ANALYZING SYSTEMS USING DATA DICTIONARIES 291
The Data Dictionary 291
Need for Understanding the Data Dictionary 292
The Data Repository 292
Defining the Data Flow 293
Describing Data Structures 295
Logical and Physical Data Structures 297
Data Elements 298
Data Stores 301
Creating the Data Dictionary 304
Analyzing Input and Output 306
Developing Data Stores 308
Using the Data Dictionary 309
Summary 312
Keywords and Phrases 312
Review Questions 313
Problems 313
HyperCase® Experience 10 314
Group Projects 317
CPU Case Episode 10: Defining What You Mean 318

11 DESCRIBING PROCESS SPECIFICATIONS AND STRUCTURED DECISIONS 335
Methods Available 335
Overview of Process Specifications 335
Process Specification Format 336
Information Required for Structured Decisions 339

Structured English 341
Writing Structured English 341
Data Dictionary and Process Specifications 344
Decision Tables 346
Developing Decision Tables 348
Checking for Completeness and Accuracy 352
More Advanced Decision Tables 353
Decision Trees 354
Drawing Decision Trees 354
Choosing a Structured Decision Analysis Technique 359
Physical and Logical Process Specifications 360
Using Process Specifications: Horizontal Balancing 360
Horizontal Balancing 361
Summary 364
Keywords and Phrases 366
Review Questions 367
HyperCase® Experience 11 368
Problems 369
Group Projects 370
CPU Case Episode 11: Tabling a Decision 372

12 ANALYZING SEMISTRUCTURED DECISION SUPPORT SYSTEMS 381
Methods Available 381
Decision Support Systems 381
Characteristics of a Decision Support System 382
Decision Support System Users 383
Decision-Making Concepts Relevant to DSS 384
Decision Making under Risk 384
Decision-Making Style 385
Problem-Solving Phases 386
Semistructured Decisions 388
Dimensions of Semistructured Decisions 388
Semistructured Decisions in Intelligence, Design, and Choice 390
Multiple-Criteria Decision Making 393
Using a Tradeoff Process 394
Using Weighting Methods 395
Using Sequential Elimination by Lexicography 395
Using Sequential Elimination by Conjunctive Constraints 397
Using Goal Programming 400
Summary 400
HyperCase® Experience 12 401

Keywords and Phrases 401
Review Questions 401
Problems 402
CPU Case Episode 12: Awaiting a Weighty Decision 407

13 PREPARING THE SYSTEMS PROPOSAL 411
Methods Available 411
Ascertaining Hardware and Software Needs 411
Inventorying Computer Hardware 412
Estimating Workloads 413
Evaluating Computer Hardware 414
Acquisition of Computer Equipment 415
Software Evaluation 418
Identifying and Forecasting Costs and Benefits 419
Forecasting Costs and Benefits 420
Identifying Benefits and Costs 425
Comparing Costs and Benefits 427
Break-even Analysis 427
Payback 428
Cash-flow Analysis 429
Present Value 430
Guidelines for Analysis 430
Examining Alternative Systems 431
Summary 432
Keywords and Phrases 433
Review Questions 433
HyperCase® Experience 13 434
Problems 434
CPU Case Episode 13: Proposing to Go Forth 439

14 WRITING AND PRESENTING THE SYSTEMS PROPOSAL 443
Methods Available 443
The Systems Proposal 443
Organizing the Systems Proposal 443
Choosing a Writing Style 448
Using Figures for Effective Communication 448
Adopting a Unifying Proposal Style 458
Presenting the Systems Proposal 460
Understanding the Audience 460
Organizing the Systems Proposal Presentation 460
Using Presentation in Graphics Packages 462
Principles of Delivery 466

Summary 469
HyperCase® Experience 14 470
Keywords and Phrases 470
Review Questions 471
Problems 471
CPU Case Episode 14: Show and Tell 473

PART FOUR
THE ESSENTIALS OF DESIGN

15 DESIGNING EFFECTIVE OUTPUT 481
Output Design Objectives 481
Designing Output to Serve the Intended Purpose 481
Designing Output to Fit the User 482
Delivering the Appropriate Quantity of Output 482
Making Sure the Output Is Where It Is Needed 482
Providing the Output on Time 483
Choosing the Right Output Method 483
Relating Output Content to Output Method 483
Choosing Output Technology 484
Realizing How Output Bias Affects Users 496
Recognizing Bias in the Way Output Is Used 496
Avoiding Bias in the Design of Output 499
Designing Printed Output 500
Guidelines for Printed Report Design 500
Steps in Preparing the Printer Layout Worksheet 505
Designing Screen Output 506
Guidelines for Screen Design 506
Tabular Output for Decision Support Systems 510
Graphical Output for Decision Support Systems 510
Summary 513
HyperCase® Experience 15 514
Keywords and Phrases 514
Review Questions 515
Problems 515
Group Projects 519
CPU Case Episode 15: Reporting on Outputs 520

16 DESIGNING EFFECTIVE INPUT 527
Input Design Objectives 527
Good Form Design 527
Four Guidelines for Form Design 528
Making Forms Easy to Fill Out 528

Meeting the Intended Purpose *532*
Assuring Accurate Completion *534*
Keeping Forms Attractive *534*
Computer-Assisted Form Design *537*
Controlling Business Forms *537*
Good Screen Design *538*
Four Guidelines for Screen Design *538*
Keeping the Screen Simple *539*
Keeping the Screen Consistent *541*
Facilitating Movement *542*
Designing an Attractive Screen *546*
Differences in Mainframe and Microcomputer Screen Design *548*
Using Icons in Screen Design *552*
Graphical User Interface Design *554*
Using Color in Screen Design *557*
Summary *558*
Keywords and Phrases *559*
Review Questions *559*
HyperCase® Experience 16 *560*
Problems *561*
Group Projects *564*
CPU Case Episode 16: Forming Screens and Screening Forms *566*

17 DESIGNING THE FILE OR DATABASE 575
Design Objectives *575*
Conventional Files and Databases *575*
Conventional Files *576*
Databases *578*
Data Concepts *580*
Reality, Data, and Metadata *580*
File Organization *585*
Database Organization *589*
Normalization *594*
The Three Steps of Normalization *595*
A Normalization Example *595*
Using the Entity-Relationship Diagram to Determine Record Keys *603*
One-to-Many Relationship *605*
Many-to-Many Relationship *605*
Guidelines for File/Database Relation Design *607*
Making Use of the Database *609*
Steps in Retrieving and Presenting Data *609*

Summary 614
Keywords and Phrases 616
HyperCase® Experience 17 618
Review Questions 619
Problems 619
CPU Case Episode 17: Back to Data Basics 622

18 DESIGNING THE USER INTERFACE 635
User Interface Objectives 635
Types of User Interface 635
Natural-Language Interfaces 636
Question-and-Answer Interfaces 636
Menus 639
Form-Fill Interfaces (Input/Output Forms) 640
Command-Language Interfaces 642
Graphical User Interfaces (GUIs) 644
Dialogs and Desktops 647
Guidelines for Dialog Design 647
Customizing Desktops 651
Other User Interfaces 653
Feedback for Users 654
Designing Queries 659
Query Types 659
Productivity and Ergonomics Design 667
Computer Room Color and Lighting 670
Visual Display Terminals and Keyboards 672
Computer Furniture 673
Summary 673
HyperCase® Experience 18 674
Keywords and Phrases 675
Review Questions 675
Problems 676
Group Projects 677
CPU Case Episode 18: Up to the Users 679

19 DESIGNING ACCURATE DATA-ENTRY PROCEDURES 689
Data-Entry Objectives 689
Effective Coding 689
Keeping Track of Something 690
Classifying Information 691
Concealing Information 693

Revealing Information *694*
Requesting Appropriate Action *695*
General Guidelines for Coding *696*
Effective and Efficient Data Capture *699*
Deciding What to Capture *699*
Letting the Computer Do the Rest *700*
Avoiding Bottlenecks and Extra Steps *702*
Starting with a Good Form *702*
Choosing a Data-Entry Method *702*
Assuring Data Quality Through Input Validation *707*
Validating Input Transactions *708*
Validating Input Data *709*
Summary *712*
HyperCase® Experience 19 *714*
Keywords and Phrases *715*
Review Questions *715*
Problems *716*
Group Projects *718*
CPU Case Episode 19: Entering Naturally *720*

PART FIVE
Software Engineering and Implementation

20 QUALITY ASSURANCE THROUGH SOFTWARE ENGINEERING 731
Approaches to Quality *731*
The Total Quality Management Approach *731*
Responsibility for Total Quality Management *732*
Structured Walkthrough *734*
Systems Design and Development *734*
Modular Development *738*
Modularity in the Windows Environment *738*
Structure Charts *739*
Types of Modules *749*
Module Subordination *753*
Software Engineering and Documentation *755*
Design and Documentation Techniques *757*
The HIPO Method *757*
Flowcharts *762*
Nassi-Shneiderman Charts *763*
Warnier-Orr Diagrams *766*
Pseudocode *768*
Procedure Manuals *770*

The FOLKLORE Method 773
Choosing a Design and Documentation Technique 774
Code Generation and Design Reengineering 774
Testing, Maintenance, and Auditing 778
The Testing Process 778
Maintenance Practices 783
Auditing 784
Summary 785
HyperCase® Experience 20 786
Keywords and Phrases 787
Review Questions 788
Problems 789
Group Projects 791
CPU Case Episode 20: Charting the Structure 792

21 SUCCESSFULLY IMPLEMENTING THE INFORMATION SYSTEM 803
Implementation Approaches 803
Establishing an Information Center 804
A New Role for the Information Systems Department 804
Information Center Practices 806
Implementing Distributed Systems 808
Network Modeling 810
Groupware 814
Training Users 818
Training Strategies 818
Guidelines for Training 820
Conversion 821
Conversion Strategies 821
Security 824
Other Conversion Considerations 826
Organizational Metaphors and Their Relationship to Successful Systems 826
Evaluation 827
Evaluation Techniques 827
The Information System Utility Approach 829
Evaluating the System 830
Summary 831
Keywords and Phrases 832
Review Questions 832
HyperCase® Experience 21 833
Problems 834
Group Project 835
CPU Case Episode 21: Semper Redundate 838

22 OBJECT-ORIENTED SYSTEMS ANALYSIS AND DESIGN 841
The Object-Oriented Idea 842
Objects 842
Classes 842
Messages 843
Encapsulation 843
Inheritance 844
Polymorphism 845
Object-Oriented Analysis 845
Analyzing Classes and Objects 846
Kayjay World Example 1 848
Analyzing Structures 850
Kayjay World Example 2 851
Analyzing Attributes 852
Kayjay World Example 3 853
Analyzing Services 854
Assembling the Specification Template 857
Kayjay World Example 4 857
Analyzing Subjects 859
Kayjay World Example 5 859
Object-Oriented Design 860
Designing the Problem Domain Component 863
Kayjay World Example 6 864
Designing the Human Interface Component 865
Kayjay World Example 7 866
Designing Task and Data Management Components 867
Kayjay World Example 8 870
Alternative Approaches and Notation 873
Summary 873
Keywords and Phrases 875
Review Questions 876
Problems 876

INDEX 881
