<b>SECTION I</b>		<b>1</b>
<b>1</b>	<b>Introduction to Software Engineering</b>	<b>5</b>
	The Software Developer	6
	The SDLC: Systems Development Life Cycle	8
	The Feasibility Study: The First Step	9
	Information-Gathering Channels	10
	Diagramming or Modeling the System	12
	Developmental Methodologies	14
	System Design	20
	Object-Oriented Methodologies	22
	Testing	25
	Standards and Metrics	27
	Procedure	29
	Installation	30
	Documentation	30
	Maintenance	31
	Training	32
	Conclusion	32
<b>2</b>	<b>The Feasibility Study and Cost/Benefit Analysis</b>	<b>35</b>
	Feasibility Study Components	35
	Cost/Benefit Analysis	38
	Scheduling the Feasibility Study	40
	The Feasibility Study Process	41
	Conclusion	45
<b>3</b>	<b>Writing the Project Plan</b>	<b>47</b>
	Why Write a Project Plan?	47
	Who Writes the Project Plan?	48
	What Goes into the Project Plan?	48
	The Project Plan Unwrapped	49
	Is It Worth It?	58
<b>4</b>	<b>Requirements Elicitation</b>	<b>61</b>
	Stakeholder Analysis	61

	Elicitation Techniques.....	62
	A Checklist for Requirements Management.....	71
	Conclusion .....	71
<b>5</b>	Designing User-Oriented Systems .....	75
	Secrets of the Trade.....	75
	Tailoring the System to End Users' Needs .....	76
	Drumming Up Enthusiasm .....	77
	Methodologies .....	78
	Distributing Data to Its Rightful Owner — the End User ...	80
	The Systems Choice .....	81
	Conclusion .....	83
<b>6</b>	The Outsourcing Decision .....	85
	Phase 1: Analysis and Evaluation.....	85
	Phase 2: Needs Assessment and Vendor Selection .....	85
	Phase 3: Implementation.....	86
	An Outsourcing Example .....	86
	Should You Outsource?.....	91
	Questions to Ask Potential Outsourcing Companies .....	94
	Outsourcing Models .....	95
	Conclusion .....	95
<b>7</b>	Methodology Selection .....	97
	A Brief Summary of Common Generic Methodologies .....	97
	Rating Your Methodology.....	99
	Determining Your Methodology's Rating .....	107
<b>8</b>	Selecting and Integrating a Repository for Effective Resource Management .....	109
	Effective Information Resource Management .....	109
	How to Use This Chapter .....	111
	Scoring the Repository Workbench.....	126
<b>9</b>	Structured Methodology Review .....	129
	Rapid Applications Development (RAD).....	131
	Joint Application Design (JAD) .....	133
	Group Support Systems (GSS) .....	134
	CASE Tools .....	134
	A Variety of Structured Methodologies.....	135
	Extreme Programming.....	137
	Conclusion .....	138
<b>10</b>	Extreme Programming Concepts .....	139
	The Rules of Extreme Programming .....	139
	Conclusion .....	145
<b>11</b>	Development Before the Fact Technology .....	147

	What Is Wrong with Systems .....	147
	Development Before the Fact .....	149
	The Technology .....	150
	Integrated Modeling Environment .....	152
	Primitive Structures .....	154
	Defined Structures .....	156
	FMaps, TMaps, and Their Integration .....	159
	Universal Primitive Operations .....	160
	Performance Considerations .....	163
	Inherent Integration with System-Oriented Objects .....	164
<b>12</b>	The Design Specification .....	169
	The Process .....	169
	The Details of Design .....	169
	Logical and Physical Design .....	175
	The Systems Specification .....	178
	A System Spec Walkthrough .....	179
	Conclusion .....	179
<b>13</b>	Object-Oriented Design .....	181
	What Is OO? .....	181
	OO from the Bottom Up .....	182
	OOAD Methodologies .....	185
	OOAD Simplified .....	189
<b>14</b>	User Interface Design .....	199
	User Interface (UI) Design Principles .....	199
	The UI Design Process .....	202
	Designing Effective Input and Output .....	203
	Usability Testing .....	207
	Summary .....	208
<b>15</b>	Software Re-Engineering .....	211
	What is Software Re-Engineering? .....	211
	Why We Need Software Re-Engineering .....	211
	Software Re-Engineering Strategies .....	212
	The Process of Re-Engineering .....	213
	Forward Engineering .....	218
	Conclusion .....	220
<b>16</b>	Software Testing .....	221
	What Is Software Testing? .....	221
	Software Testing Strategy .....	224
	Test Automation .....	225
	Practical Approach to Automated Software Testing .....	227
	Using Automated Testing Tools .....	228
	Conclusion .....	229

<b>17</b>	The Process of EDP Auditing .....	231
	Organizing Your Audit .....	231
	Systemic Audit .....	234
	Security and Quality .....	236
	Ergonomics .....	241
	Customer Service .....	243
	Legality .....	244
	Conclusion .....	244
<b>18</b>	The Management of Software Maintenance .....	245
	The Maintenance Process .....	245
	Types of Maintenance .....	247
	Maintenance Costs .....	248
	A Model for Maintenance .....	249
	Managing Maintenance Personnel .....	250
	Measuring Effectiveness .....	250
	Controlling Maintenance Requests .....	251
	Conclusion .....	252
<b>19</b>	The Science of Documentation .....	255
	What Exactly Is Documentation? .....	255
	Methods and Standards .....	258
	Generating Documentation the Right Way .....	259
	Maintaining Documentation .....	268
	Conclusion .....	269
<b>20</b>	Survey on IT Productivity and Quality .....	271
	Planning for Quality .....	272
	The Process of Measurement .....	273
	The Original Metric .....	275
	The HP Way .....	277
	The Function Point Advantage .....	278
	The Quality Equation .....	281
	Conclusion .....	282
<b>SECTION II .....</b>		<b>283</b>
<b>21</b>	Putnam's Software Equation and SLIM .....	287
	Abstract .....	287
	Procedures/Issues/Policies .....	287
<b>22</b>	The COCOMO II Model .....	291
	Abstract .....	291
	Application Composition Model .....	291
	The Early Design Model .....	292
	The Post-Architecture Model .....	293

<b>23</b>	Putnam's Cost Estimation Model.....	297
	Abstract .....	297
	Procedures/Issues/Policies .....	297
<b>24</b>	Malcolm Baldrige Quality Award.....	299
	Abstract .....	299
	Procedures/Issues/Policies .....	299
<b>25</b>	Zachman's Framework .....	303
	Abstract .....	303
	Procedures/Issues/Policies .....	303
<b>26</b>	Linkman's Method for Controlling Programs through Measurement .....	305
	Abstract .....	305
	Procedure .....	305
<b>27</b>	Kellner's Nontechnological Issues in Software Engineering.....	309
	Abstract .....	309
	Procedures/Issues/Policies .....	309
<b>28</b>	Martin and Carey's Survey of Success in Converting Prototypes to Operational Systems .....	313
	Abstract .....	313
	Procedures/Issues/Policies .....	314
<b>29</b>	Putnam's Trends in Measurement, Estimation, and Control.....	317
	Abstract .....	317
	Procedures/Issues/Policies .....	318
<b>30</b>	Sprague's Technique for Software Configuration Management in a Measurement-Based Software Engineering Program.....	319
	Abstract .....	319
	Procedures/Issues/Policies .....	321
	Procedures for Developing an SCM Process .....	321
<b>31</b>	Corbin's Methodology for Establishing a Software Development Environment.....	325
	Abstract .....	325
	Procedures/Issues/Policies .....	325
<b>32</b>	Couger's Bottom-Up Approach to Creativity Improvement in IS Development .....	329
	Abstract .....	329
	Procedures/Issues/Policies .....	329

<b>33</b>	Shetty's Seven Principles of Quality Leaders . . . . .	333
	Abstract. . . . .	333
	Procedures/Issues/Policies. . . . .	333
<b>34</b>	Simmons' Statistics Concerning Communications' Effect on Group Productivity . . . . .	337
	Abstract. . . . .	337
	Procedures/Issues/Policies. . . . .	337
<b>35</b>	Gould's Points on Usability. . . . .	341
	Abstract. . . . .	341
	Procedures/Issues/Policies: . . . . .	341
<b>36</b>	Prescott's Guidelines for Using Structured Methodology . . .	345
	Abstract. . . . .	345
	Procedures/Issues/Policies. . . . .	345
<b>37</b>	Kemayel's Controllable Factors in Programmer Productivity . . . . .	349
	Abstract. . . . .	349
	Procedures/Issues/Policies. . . . .	349
<b>38</b>	AT&T's "Estimeeting" Process for Developing Estimates . . .	355
	Abstract. . . . .	355
	Procedures/Issues/Policies. . . . .	356
<b>39</b>	Burns' Framework for Building Dependable Systems . . . . .	361
	Abstract. . . . .	361
	Procedures/Issues/Policies. . . . .	361
<b>40</b>	Avison's Multiview Meta-Methodology . . . . .	365
	Abstract. . . . .	365
	Procedures/Issues/Policies. . . . .	365
<b>41</b>	Byrne's Reverse Engineering Technique. . . . .	369
	Abstract. . . . .	369
	Procedures/Issues/Policies. . . . .	370
<b>42</b>	Prieto-Diaz' Reusability Model . . . . .	373
	Abstract. . . . .	373
	Procedures/Issues/Policies. . . . .	373
<b>43</b>	Farbey's Considerations on Software Quality Metrics during the Requirements Phase. . . . .	377
	Abstract. . . . .	377
	Procedures/Issues/Policies. . . . .	377
<b>44</b>	Redmill's Quality Considerations in the Management of Software-Based Development Projects . . . . .	381

	Abstract .....	381
	Procedures/Issues/Policies .....	381
<b>45</b>	Contel's Software Metrics in the Process Maturity Framework .....	385
	Abstract .....	385
	Procedures/Issues/Policies .....	385
<b>46</b>	Kydd's Technique to Induce Productivity through Shared Information Technology .....	389
	Abstract .....	389
	Procedures/Issues/Policies .....	389
<b>47</b>	Bellcore's Software Quality Metrics .....	391
	Abstract .....	391
	Procedures/Issues/Policies .....	391
<b>48</b>	Keyes' Value of Information .....	393
	Abstract .....	393
	Procedures/Issues/Policies .....	393
<b>49</b>	Pfleeger's Method for CASE Tool Selection Based on Process Maturity .....	395
	Abstract .....	395
	Procedures/Issues/Policies .....	395
<b>50</b>	McCabe's Complexity Metric .....	399
	Abstract .....	399
	Procedures/Issues/Policies .....	399
<b>51</b>	Halstead's Effort Measure .....	401
	Abstract .....	401
	Procedures/Issues/Policies .....	401
<b>52</b>	DEC's Overview of Software Metrics .....	403
	Abstract .....	403
	Procedures/Issues/Policies .....	403
<b>53</b>	Hewlett Packard's TQC (Total Quality Control) Guidelines for Software Engineering Productivity .....	407
	Abstract .....	407
	Procedures/Issues/Policies .....	407
<b>54</b>	Motorola's Six Sigma Defect Reduction Effort .....	411
	Abstract .....	411
	Procedures/Issues/Policies .....	411
<b>55</b>	Lederer's Management Guidelines for Better Cost Estimating .....	413
	Abstract .....	413

<b>56</b>	Kanter's Methodology for Justifying Investment in Information Technology .....	417
	Abstract .....	417
	Procedures/Issues/Policies .....	417
<b>57</b>	The "Make-Buy" Decision .....	421
	Abstract .....	421
	Procedures/Issues/Policies .....	421
<b>58</b>	Software Selection from Multiple Packages .....	423
	Abstract .....	423
	Procedures/Issues/Policies .....	423
<b>59</b>	The Boehm COCOMO Model .....	425
	Abstract .....	425
	Procedures/Issues/Policies .....	425
<b>60</b>	IEEE Standard Dictionary of Measures to Produce Reliable Software .....	427
	Abstract .....	427
	Procedures/Issues/Policies .....	427
<b>61</b>	IEEE Framework for Measures .....	435
	Abstract .....	435
	Procedures/Issues/Policies .....	435
<b>62</b>	Gillies' Method for Humanization of the Software Factory .....	439
	Abstract .....	439
	Procedure .....	440
<b>63</b>	Pfleeger's Approach to Software Metrics Tool Evaluation .....	443
	Abstract .....	443
	Procedures/Issues/Policie .....	443
<b>64</b>	Maiden's Method for Reuse of Analogous Specifications through Human Involvement in Reuse Process .....	447
	Abstract .....	447
	Procedures .....	448
<b>65</b>	Tate's Approaches to Measuring Size of Application Products with CASE Tools .....	451
	Abstract .....	451
	Procedure .....	452
<b>SECTION III .....</b>		<b>455</b>
<b>Appendices .....</b>		<b>457</b>

<b>Appendix A</b>	System Service Request Form.....	459
<b>Appendix B</b>	Project Statement of Work.....	461
<b>Appendix C</b>	Feasibility Study Template .....	489
<b>Appendix D</b>	Sample Cost/Benefit Analysis Worksheets .....	499
<b>Appendix E</b>	Sample Business Use Case .....	509
<b>Appendix F</b>	Sample Project Plan .....	519
<b>Appendix G</b>	Sample SRS .....	535
<b>Appendix H</b>	Sample Survey.....	577
<b>Appendix I</b>	Sample Architectural Design.....	579
<b>Appendix J</b>	Sample SDS .....	593
<b>Appendix K</b>	Sample Data Dictionary .....	639
<b>Appendix L</b>	Sample OO SDS .....	643
<b>Appendix M</b>	Sample Class Dictionary .....	749
<b>Appendix N</b>	Control Sheet.....	753
<b>Appendix O</b>	Test Plan .....	755
<b>Appendix P</b>	QA Handover Document .....	795
<b>Appendix Q</b>	Software Metrics Capability Evaluation Questionnaires .....	797
<b>Appendix R</b>	IT Staff Competency Survey .....	819
<b>Appendix S</b>	Function Point Counting Guide.....	825
<b>Index</b> .....		859
