Differential Geometry

Contents

1	Curves in the Plane	1
1.1	Curvature and the Frenet–Serret Formulas	3
1.2	Osculating Circles	6
1.3	The Total Curvature of a Closed Plane Curve	7
1.4	Four-Vertex Theorem	10
1.5	The Natural Equation of a Plane Curve	13
1.6	Whitney–Graustein Theorem	14
1.7	Tube Area and Steiner’s Formula	15
1.8	The Envelope of a Family of Curves	16
1.9	Evolute and Involute	21
1.10	Isoperimetric Inequality	23
1.11	Affine Unimodular Differential Geometry	26
1.12	Projective Differential Geometry	29
1.13	The Measure of the Set of Lines Intersecting a Given Curve	33
1.14	Solutions of Problems	36
2	Curves in Space	47
2.1	Curvature and Torsion: The Frenet–Serret Formulas	47
2.2	An Osculating Plane	51
2.3	Total Curvature of a Closed Curve	53
2.4	Bertrand Curves	55
2.5	The Frenet–Serret Formulas in Many-Dimensional Space	56
2.6	Solutions of Problems	57
3	Surfaces in Space	65
3.1	The First Quadratic Form	66
3.2	The Darboux Frame of a Curve on a Surface	68
3.3	Geodesics	70
3.4	The Second Quadratic Form	72
3.5	Gaussian Curvature	75
3.6	Gaussian Curvature and Differential Forms	77
3.7	The Gauss–Bonnet Theorem	80

3.8	Christoffel Symbols	84
3.9	The Spherical Gauss Map	87
3.10	The Geodesic Equation	88
3.11	Parallel Transport Along a Curve	89
3.12	Covariant Differentiation	92
3.13	The Gauss and Codazzi–Mainardi Equations	97
3.14	Riemann Curvature Tensor	99
3.15	Exponential Map	100
3.16	Lines of Curvature and Asymptotic Lines	104
3.17	Minimal Surfaces	108
3.18	The First Variation Formula	111
3.19	The Second Variation Formula	113
3.20	Jacobi Vector Fields and Conjugate Points	116
3.21	Jacobi's Theorem on a Normal Spherical Image	122
3.22	Surfaces of Constant Gaussian Curvature	124
3.23	Rigidity (Unbendability) of the Sphere	127
3.24	Convex Surfaces: Hadamard's Theorem	129
3.25	The Laplace–Beltrami Operator	129
3.26	Solutions of Problems	134
4	Hypersurfaces in $\mathbb{R}^{n+1}$: Connections	145
4.1	The Weingarten Operator	145
4.2	Connections on Hypersurfaces	148
4.3	Geodesics on Hypersurfaces	149
4.4	Convex Hypersurfaces	149
4.5	Minimal Hypersurfaces	150
4.6	Steiner's Formula	152
4.7	Connections on Vector Bundles	153
4.8	Geodesics	156
4.9	The Curvature Tensor and the Torsion Tensor	159
4.10	The Curvature Matrix of a Connection	163
4.11	Solutions of Problems	167
5	Riemannian Manifolds	169
5.1	Levi-Civita Connection	169
5.2	Symmetries of the Riemann Tensor	171
5.3	Geodesics on Riemannian Manifolds	173
5.4	The Hopf–Rinow Theorem	175
5.5	The Existence of Complete Riemannian Metrics	178
5.6	Covariant Differentiation of Tensors	180
5.7	Sectional Curvature	183
5.8	Ricci Tensor	186
5.9	Riemannian Submanifolds	187
5.10	Totally Geodesic Submanifolds	191
5.11	Jacobi Fields and Conjugate Points	192
5.12	Product of Riemannian Manifolds	197

Contents	xi
5.13 Holonomy	199
5.14 Commutator and Curvature	200
5.15 Solutions of Problems	205
6 Lie Groups	211
6.1 Lie Groups and Algebras	211
6.2 Adjoint Representation and the Killing Form	218
6.3 Connections and Metrics on Lie Groups	220
6.4 Maurer–Cartan Equations	223
6.5 Invariant Integration on a Compact Lie Group	225
6.6 Lie Derivative	228
6.7 Infinitesimal Isometries.....	232
6.8 Homogeneous Spaces	235
6.9 Symmetric Spaces	239
6.10 Solutions of Problems	241
7 Comparison Theorems, Curvature and Topology, and Laplacian	245
7.1 The Simplest Comparison Theorems	245
7.2 The Cartan–Hadamard Theorem.....	247
7.3 Manifolds of Positive Curvature	249
7.4 Manifolds of Constant Curvature	251
7.5 Laplace Operator	253
7.6 Solutions of Problems	255
8 Appendix	257
8.1 Differentiation of Determinants.....	257
8.2 Jacobi Identity for the Commutator of Vector Fields	258
8.3 The Differential of a 1-Form	259
Bibliography	261
Index	265
