Probability and Random Variables: Theory and Applications

 Springer

Contents

1 Preliminaries	1
1.1 Set Theory	1
1.1.1 Sets	1
1.1.2 Set Operations	5
1.1.3 Laws of Set Operations	9
1.1.4 Uncountable Sets	12
1.2 Functions	19
1.2.1 One-to-One Correspondence	22
1.2.2 Metric Space	23
1.3 Continuity of Functions	25
1.3.1 Continuous Functions	25
1.3.2 Discontinuities	27
1.3.3 Absolutely Continuous Functions and Singular Functions	29
1.4 Step, Impulse, and Gamma Functions	32
1.4.1 Step Function	33
1.4.2 Impulse Function	36
1.4.3 Gamma Function	45
1.5 Limits of Sequences of Sets	55
1.5.1 Upper and Lower Limits of Sequences	55
1.5.2 Limit of Monotone Sequence of Sets	57
1.5.3 Limit of General Sequence of Sets	59
Appendices	63
Exercises	84
References	91
2 Fundamentals of Probability	93
2.1 Algebra and Sigma Algebra	93
2.1.1 Algebra	93
2.1.2 Sigma Algebra	95
2.2 Probability Spaces	99

2.2.1	Sample Space	99
2.2.2	Event Space	101
2.2.3	Probability Measure	105
2.3	Probability	108
2.3.1	Properties of Probability	108
2.3.2	Other Definitions of Probability	112
2.4	Conditional Probability	116
2.4.1	Total Probability and Bayes' Theorems	117
2.4.2	Independent Events	122
2.5	Classes of Probability Spaces	125
2.5.1	Discrete Probability Spaces	125
2.5.2	Continuous Probability Spaces	130
2.5.3	Mixed Spaces	136
	Appendices	137
	Exercises	151
	References	160
3	Random Variables	161
3.1	Distributions	161
3.1.1	Random Variables	161
3.1.2	Cumulative Distribution Function	163
3.1.3	Probability Density Function and Probability Mass Function	169
3.2	Functions of Random Variables and Their Distributions	174
3.2.1	Cumulative Distribution Function	174
3.2.2	Probability Density Function	178
3.3	Expected Values and Moments	188
3.3.1	Expected Values	190
3.3.2	Expected Values of Functions of Random Variables	191
3.3.3	Moments and Variance	192
3.3.4	Characteristic and Moment Generating Functions	198
3.3.5	Moment Theorem	206
3.4	Conditional Distributions	208
3.4.1	Conditional Probability Functions	208
3.4.2	Expected Values Conditional on Event	214
3.4.3	Evaluation of Expected Values via Conditioning	215
3.5	Classes of Random Variables	216
3.5.1	Normal Random Variables	216
3.5.2	Binomial Random Variables	218
3.5.3	Poisson Random Variables	222
3.5.4	Exponential Random Variables	224
	Appendices	227
	Exercises	242
	References	253

Contents	xi
4 Random Vectors	255
4.1 Distributions of Random Vectors	255
4.1.1 Random Vectors	255
4.1.2 Bi-variate Random Vectors	260
4.1.3 Independent Random Vectors	266
4.2 Distributions of Functions of Random Vectors	270
4.2.1 Joint Probability Density Function	271
4.2.2 Joint Probability Density Function: Method of Auxiliary Variables	275
4.2.3 Joint Cumulative Distribution Function	280
4.2.4 Functions of Discrete Random Vectors	284
4.3 Expected Values and Joint Moments	286
4.3.1 Expected Values	286
4.3.2 Joint Moments	287
4.3.3 Joint Characteristic Function and Joint Moment Generating Function	294
4.4 Conditional Distributions	298
4.4.1 Conditional Probability Functions	299
4.4.2 Conditional Expected Values	306
4.4.3 Evaluation of Expected Values via Conditioning	308
4.5 Impulse Functions and Random Vectors	309
Appendices	315
Exercises	325
References	335
5 Normal Random Vectors	337
5.1 Probability Functions	337
5.1.1 Probability Density Function and Characteristic Function	337
5.1.2 Bi-variate Normal Random Vectors	339
5.1.3 Tri-variate Normal Random Vectors	343
5.2 Properties	348
5.2.1 Distributions of Subvectors and Conditional Distributions	348
5.2.2 Linear Transformations	351
5.3 Expected Values of Nonlinear Functions	356
5.3.1 Examples of Joint Moments	356
5.3.2 Price's Theorem	358
5.3.3 General Formula for Joint Moments	367
5.4 Distributions of Statistics	371
5.4.1 Sample Mean and Sample Variance	371
5.4.2 Chi-Square Distribution	377
5.4.3 t Distribution	379
5.4.4 F Distribution	384

Appendices	389
Exercises	404
References	412
6 Convergence of Random Variables	415
6.1 Types of Convergence	415
6.1.1 Almost Sure Convergence	415
6.1.2 Convergence in the Mean	418
6.1.3 Convergence in Probability and Convergence in Distribution	420
6.1.4 Relations Among Various Types of Convergence	422
6.2 Laws of Large Numbers and Central Limit Theorem	425
6.2.1 Sum of Random Variables and Its Distribution	426
6.2.2 Laws of Large Numbers	432
6.2.3 Central Limit Theorem	437
Appendices	443
Exercises	454
