Limit of Liability/Disclaimer of Warranty

In view of ongoing research, equipment modifications, changes in governmental regulations, and the constant flow of information relating to the use of experimental reagents, equipment, and devices, the reader is urged to review and evaluate the information provided in the package insert or instructions for each chemical, piece of equipment, reagent, or device for, among other things, any changes in the instructions or indication of usage and for added warnings and precautions. While the publisher and authors have used their best efforts in preparing this work, they make no representations or warranties with respect to the accuracy or completeness of the contents of this work and specifically disclaim all warranties, including without limitation any implied warranties of merchantability or fitness for a particular purpose. No warranty may be created or extended by sales representatives, written sales materials or promotional statements for this work. The fact that an organization, website, or product is referred to in this work as a citation and/or potential source of further information does not mean that the publisher and authors endorse the information or services the organization, website, or product may provide or recommendations it may make. This work is sold with the understanding that the publisher is not engaged in rendering professional services. The advice and strategies contained herein may not be suitable for your situation. You should consult with a specialist where appropriate. Further, readers should be aware that websites listed in this work may have changed or disappeared between when this work was written and when it is read. Neither the publisher nor authors shall be liable for any loss of profit or any other commercial damages, including but not limited to special, incidental, consequential, or other damages.

Library of Congress Cataloging-in-Publication Data

Names: Zhai, Zhiqiang (John), author.

Title: Energy efficient buildings : fundamentals of building science and thermal systems / John Zhai.

Description: Hoboken, NJ : Wiley, 2023.

Identifiers: LCCN 2022017503 (print) | LCCN 2022017504 (ebook) | ISBN 9781119881933 (cloth) | ISBN 9781119881957 (adobe pdf) | ISBN 9781119881940 (epub)

Subjects: LCSH: Architecture and energy conservation. | Heat engineering.

Classification: LCC NA2542.3 .Z42 2023 (print) | LCC NA2542.3 (ebook) | DDC 720/.472-dc23/eng/20220715

Contents

1	Sustainable Building	1
1.1	Building Functions	1
1.2	Building Elements	2
1.2.1	Input: Energy	2
1.2.2	Input: Water	3
1.2.3	Input: Materials	5
1.2.4	Output: Waste	6
1.2.5	Output: Pollution	7
1.2.6	Output: Poor Health	7
1.3	Definition of Sustainable Building	7
1.4	Origin and Significance of Sustainable Building	8
1.5	Sustainable Principles	11
1.5.1	Reduce	12
1.5.2	Reuse	13
1.5.3	Recycle	13
1.5.4	Regenerate	13
1.6	Three-Layer Design Approach	14
1.7	Three-Tier Design Approach	16
1.8	Two Case Studies	18
	Homework Problems	20
	References	21
2	Life Cycle Cost Analysis	23
2.1	Life Phases of a Building	23
2.2	Design Process of a Building	24
2.3	Integrated Design Process of a Sustainable Building	27
2.4	Basics of Cost and Economic Analysis	30
2.5	Life Cycle Cost Analysis	35
2.5.1	Terminologies	35
2.5.2	Life Cycle Cost	36
2.5.3	Life Cycle Savings	37

2.6	Life Cycle Cost Analysis Based Optimization	40
	Homework Problems	43
3	Building Standards and Codes	45
3.1	Impacts of Building Codes	45
3.2	Types of Design Regulations	45
3.2.1	Federal Regulations	45
3.2.2	Building Codes	48
3.2.3	Building Standards	49
3.2.4	Building Guidelines	50
3.2.5	Building Assessment and Rating Systems	51
3.3	Integrative Use of All	56
3.3.1	Integrated Design	56
3.3.2	Life Cycle Cost Analysis Based Design	57
3.3.3	Building Information Modeling	58
	Homework Problems	59
	References	59
4	Air Properties and Psychrometric Chart	61
4.1	Air Composition	61
4.2	Moist Air and Its Properties	62
4.2.1	Ideal Gas Law	62
4.2.2	Properties	62
4.2.2.1	Pressure: P (Unit: Pa)	62
4.2.2.2	Temperature: T (Unit: K, C, F, R)	64
4.2.2.3	Humidity Ratio: W (Unit: Kg/Kg _{dry-air})	64
4.2.2.4	Relative Humidity: ϕ (Unit: %)	65
4.2.2.5	Dewpoint Temperature: T_{dew} (Unit: K, C, F, R)	66
4.2.2.6	Wet-Bulb Temperature: T_{wet} (Unit: K, C, F, R)	66
4.2.2.7	Enthalpy: h (Unit: kJ/kg _{dry-air} , Btu/lb _{dry-air})	67
4.3	Construction of a Psychrometric Chart	70
4.3.1	Construction of Air Saturation Line as a Function of Temperature	70
4.3.2	Construction of Relative Humidity Lines	71
4.3.3	Construction of Enthalpy Lines	71
4.3.4	Construction of Wet-Bulb Temperature Lines	72
4.3.5	The Final Format of a Psychrometric Chart	74
	Homework Problems	77
5	Climate and Site Analysis	79
5.1	Climate Analysis	79
5.1.1	Meteorological Year Data	79
5.1.2	Typical Meteorological Year (TMY) Data on Psychrometric Chart	80
5.2	Heating and Cooling Design Climatic Data	99

- 5.3 Site Analysis 104
- Homework Problems 108

- 6 Indoor Thermal Comfort 109**
- 6.1 Indoor Environment Quality 109
- 6.2 Indoor Thermal Comfort 109
- 6.2.1 Heat and Mass Transfer Mechanisms 109
- 6.2.2 Energy Conservation Equation 111
- 6.2.3 Predicted Mean Vote (PMV) and Predicted Percentage Dissatisfied (PPD) due to Thermal Comfort 114
- 6.3 Comfort Zone 118
- 6.4 Approaches to Improving Indoor Thermal Comfort 125
- 6.5 Other Thermal Comfort Factors 127
- 6.5.1 Draft 127
- 6.5.2 Asymmetry of Radiation 127
- 6.5.3 Thermal Stratification 128
- 6.5.4 Thermal Variations with Time 129
- 6.5.5 Floor Surface Temperature 129
- Homework Problems 130
- References 131

- 7 Indoor Air Quality, Ventilation, and Infiltration 133**
- 7.1 Indoor Air Quality 133
- 7.1.1 Causes of Sickness 133
- 7.1.2 Control of Indoor Contaminants 136
- 7.2 Ventilation 137
- 7.2.1 Ventilation Rate Procedure (VRP) 137
- 7.2.2 Indoor Air Quality Procedure (IAQP) 141
- 7.3 Air Purification 143
- 7.4 Infiltration 149
- 7.5 Blower Door Test 153
- Homework Problems 157
- References 158

- 8 Heat Transfer through Building Envelope 159**
- 8.1 Latent Heat Transfer 159
- 8.2 Sensible Heat Transfer 160
- 8.2.1 Heat/Thermal Storage 160
- 8.2.2 Conduction: Conductive Heat Transfer 163
- 8.2.3 Convection: Convective Heat Transfer 173
- 8.2.4 Radiation: Radiative Heat Transfer 181
- 8.3 Practical Heat Transfer through Building Envelope 189
- 8.4 Ground Heat Transfer 196

8.4.1	Slab-on-Grade	196
8.4.2	Below-Grade Heat Transfer: Basement Wall and Floor	198
	Homework Problems	203
9	Sun and Solar Radiation	207
9.1	Sun and Solar	207
9.2	Solar Angles	209
9.3	Sky Dome and Sun-Path Diagrams	212
9.4	Solar Shading	215
9.5	Solar Radiation on External Walls	218
9.6	Solar Radiation on Windows	221
	Homework Problems	229
10	Passive Building Systems	233
10.1	Introduction	233
10.2	Overview of Passive Cooling	234
10.3	Overview of Passive Heating	235
10.4	Prescreening Feasibility of Passive Cooling and Heating Techniques	236
10.5	Natural Ventilation	239
10.5.1	Principle	239
10.5.2	Performance	239
10.5.3	Design Considerations	240
10.6	Night Cooling with Thermal Mass	243
10.6.1	Principle	243
10.6.2	Performance	244
10.6.3	Design Considerations	244
10.7	Direct/Indirect Evaporative Cooling	246
10.7.1	Principle	246
10.7.2	Performance	247
10.7.3	Design Considerations	249
10.8	Trombe Wall	250
10.8.1	Principle	250
10.8.2	Performance	251
10.8.3	Design Considerations	251
10.9	Sunspace	252
10.9.1	Principle	252
10.9.2	Performance	252
10.9.3	Design Considerations	253
10.10	Double Skin Façade	254
10.10.1	Principle	254
10.10.2	Performance	254
10.10.3	Design Considerations	255
10.11	Phase Change Material	258

10.11.1	Principle	258
10.11.2	Performance	258
10.11.3	Design Considerations	260
	Homework Problems	262
	References	263
11	Building Load Calculation	265
11.1	Residential and Light Commercial Buildings	265
11.1.1	Heating Load Calculation	266
11.1.1.1	Through Envelope Structures and Windows	267
11.1.1.2	Through Infiltration	267
11.1.2	Cooling Load Calculation	267
11.1.2.1	Through Envelope Structures	267
11.1.2.2	Through Envelope Glasses	268
11.1.2.3	Through Infiltration	270
11.1.2.4	Due to Occupants and Appliances	270
11.2	Commercial Buildings	271
	Homework Problems	276
12	Heating, Cooling, and Ventilation Systems	279
12.1	Basics of Heating and Cooling Systems	279
12.1.1	Heating Systems	279
12.1.1.1	Fire Pit and Fireplace	279
12.1.1.2	Hot Water Heating Systems	279
12.1.1.3	Hot Air Heating Systems	281
12.1.1.4	Electrical Heating Systems	286
12.1.2	Cooling Systems	286
12.1.2.1	Principles of Compressive Refrigeration	286
12.1.2.2	Various Air-Conditioning Systems	289
12.2	Basics of Heating and Cooling Distribution Systems	289
12.2.1	All Air System	290
12.2.2	All Water System	292
12.2.3	Air Water System	292
12.3	Heating and Cooling on Psychrometric Chart	293
12.3.1	Change of Sensible Heat	293
12.3.2	Humidification and Dehumidification	297
12.3.3	Cooling and Dehumidification	298
12.3.4	Heating and Humidification	299
12.3.5	Adiabatic Mixing of Air	301
12.4	Central HVAC Systems on Psychrometric Chart	302
12.5	Coil Sizing and Selection	305
	Homework Problems	311
	Reference	314

13	Building Energy Consumption	315
13.1	Manual Calculation	315
13.1.1	The Degree-Day Method	315
13.1.2	The Bin Method	318
13.2	Computer Simulation	318
13.2.1	Introduction	318
13.2.2	Fundamentals of EnergyPlus (E+)	321
13.2.2.1	General Descriptions of EnergyPlus	321
13.2.2.2	Heat Balance Method of EnergyPlus	322
13.2.3	A Case Study of EnergyPlus (E+)	326
13.2.3.1	EnergyPlus Model Input Uncertainty	329
13.2.3.2	EnergyPlus Model Calibration	329
13.2.3.3	EnergyPlus Model Results	330
13.2.3.4	Summary	335
	Homework Problems	336
	References	337
14	Building Energy Analysis and Optimization	339
14.1	Overview	339
14.2	Simulation Tools	341
14.3	Benchmark Model Development	341
14.3.1	Developing the Benchmark Model	341
14.3.2	Chinese Office Benchmark Description for the Cold Climate Region	341
14.3.3	Chinese Office Benchmark Performance	343
14.4	Parametric Analysis	344
14.5	Energy Efficiency Measures	344
14.5.1	Selecting Energy Efficiency Measures for the Initial Optimization	344
14.5.2	Energy Efficiency Measures for the Initial Optimization	345
14.6	Initial Optimization	345
14.6.1	Optimization Fundamentals	345
14.6.2	Chinese Office Benchmark Initial Optimization	346
14.7	Sensitivity Analysis	347
14.8	Second Optimization and Recommendations	348
14.9	Conclusions	349
	Homework Problems	350
	References	352
	Index	353
