Contents

<i>Preface</i>	xvi
<i>Authors' CVs</i>	xviii
1 Introduction	1
1.1 Definition and purposes of dams	1
1.2 Worldwide importance of dams and reservoirs	2
1.3 Historical overview and challenges of dam engineering	6
1.4 Dams as critical water infrastructures	8
1.5 Safe operation of dams and reservoirs through advanced dam safety concepts: example of Switzerland	8
1.6 Appurtenant structures of dams	11
1.6.1 Overview	11
1.6.2 Spillways including overflow and dissipation structures	11
1.6.3 Bottom outlets	12
1.6.4 Intakes	13
1.6.5 River diversion	13
1.7 Hydraulic engineering of dams: structure of the book	14
References	15
2 Frontal crest overflow	19
2.1 Introduction	19
2.1.1 Overflow structures	19
2.1.2 Overflow types	23
2.1.3 Significance of overflow structure	27
2.2 Frontal overflow	28
2.2.1 Crest shapes and standard crest	28
2.2.2 Free surface profile and discharge characteristics	32
2.2.3 Bottom pressure characteristics	34
2.2.4 Velocity distribution	35
2.2.5 Cavitation design	37
2.2.6 Crest piers	38
2.2.7 Overflow crest gates	40
2.3 Additional weir effects	44

2.3.1	Influence of weir face slopes	44
2.3.2	Embankment weir	53
2.4	Scale effects	67
2.4.1	Real fluid effects in weir flow	67
2.4.2	Boundary layer development	70
2.4.3	Discharge coefficient	75
2.4.4	Round-crested weir flow analogy	78
	Notation	81
	References	84
	Bibliography	88
3	Spatial crest overflow	95
3.1	Introduction	95
3.2	Side channel	96
3.2.1	Typology	96
3.2.2	Hydraulic design	99
3.2.3	Spatial flow features	101
3.2.4	Examples of physical model studies	103
3.3	Morning glory overfall	117
3.3.1	Hydraulic concept	117
3.3.2	Crest shape	120
3.3.3	Discharge and pressure characteristics	122
3.3.4	Vertical shaft structure	123
3.3.5	Shaft air supply	125
3.3.6	Case study	128
3.4	Labyrinth weir	136
3.4.1	Historical evolution	136
3.4.2	Design criteria	144
3.5	Piano key weir	148
3.5.1	Historical evolution	148
3.5.2	PKW types and notation	150
3.5.3	Rating curve	151
3.5.4	Further design aspects	157
3.5.5	Downstream toe scour on riverbed	161
3.5.6	Upstream riverbed	164
3.6	Siphon	165
3.6.1	Description	165
3.6.2	Black-water siphon	166
3.6.3	White-water siphon	168
	Notation	170
	References	174
	Bibliography	180

4 Spillway chute	185
4.1 Introduction	185
4.2 Smooth chute	186
4.2.1 Hydraulic design	186
4.2.2 Surface air entrainment	188
4.2.3 Development of aerated chute flow	201
4.2.4 Spacing of chute aerators	209
4.2.5 Air transport phenomena	213
4.3 Uniform-aerated chute flow	222
4.3.1 Experimental approach	222
4.4 Chute aerator	229
4.4.1 Motivation and historical development	229
4.4.2 Cavitation potential	231
4.4.3 Cavitation protection	233
4.4.4 Aerator geometry and air supply system	235
4.4.5 Air transport downstream of aerator	239
4.4.6 Jet length and air entrainment coefficient	244
4.4.7 Downstream air concentration development	245
4.4.8 Effect of pre-aerated approach flow	247
4.4.9 Steep deflectors and cavity sub-pressure	249
4.4.10 Design procedure	252
4.5 Shock waves	254
4.5.1 Introduction	254
4.5.2 Chute expansion	258
4.5.3 Chute bend	260
4.5.4 Chute contraction	265
4.6 Roll waves	269
4.6.1 Definition and early advances	269
4.6.2 Advances from Montuori	274
4.7 Stepped chute	277
4.7.1 Introduction	277
4.7.2 Main application	280
4.7.3 General considerations	284
4.7.4 Hydraulic design	295
Notation	319
References	324
Bibliography	337
5 Dissipation structures	347
5.1 Introduction	347
5.2 Hydraulic jump	350
5.2.1 Classical hydraulic jump	350
5.2.2 Hydraulic approach	354
5.2.3 Undular hydraulic jump	361

5.3	Stilling basins	369
5.3.1	General	369
5.3.2	Baffle-sill basin	369
5.3.3	Baffle-block basin	372
5.3.4	Abruptly expanding stilling basin	373
5.3.5	Slotted-bucket stilling basin	377
5.3.6	Basin characteristics	377
5.4	Drop structures	381
5.4.1	Basic flow features	381
5.4.2	Drop impact structures	382
5.4.3	Scour characteristics at unlined drop structures	382
5.5	Free fall outlets	384
5.5.1	Introduction	384
5.5.2	Jet trajectory	385
5.5.3	Jet impact	387
	Notation	389
	References	392
	Bibliography	394
6	Ski jump and plunge pool	407
6.1	Introduction	407
6.2	Ski jump	408
6.2.1	Description of structure and takeoff	408
6.2.2	Jet trajectory and disintegration	411
6.2.3	Bucket pressure, energy dissipation and choking features	415
6.2.4	Ski jump with triangular bucket	422
6.2.5	Air entrainment in ski-jump jets	432
6.2.6	Generalized jet air concentration features	440
6.3	Flip bucket	442
6.3.1	Types of bucket geometries	442
6.3.2	Horizontal triangular-shaped flip bucket	446
6.4	Granular scour	451
6.4.1	Granular scour and assessment methods	451
6.4.2	Effect of jet air content	453
6.4.3	Hydraulics of plane plunge pool scour	461
6.4.4	Hydraulics of spatial plunge pool scour	473
6.4.5	3D Flow features in plunge pool	483
6.4.6	Temporal evolution of spatial plunge pool scour	490
6.5	Rock scour	498
6.5.1	Introduction and challenges	498
6.5.2	Comprehensive scour method	501
6.5.3	CSM with active jet air entrainment	509
6.5.4	Difficulties in estimating scour depth	512

6.5.5	Measures for scour control	516
6.5.6	Case study: Kariba Dam scour hole	521
	Notation	525
	References	532
	Bibliography	538
7	River diversion structures	547
7.1	Introduction	547
7.2	Diversion tunnel	549
7.2.1	Introduction	549
7.2.2	Inlet flow	550
7.2.3	Tunnel flow	551
7.2.4	Choking flow	556
7.2.5	Outlet structure	560
7.2.6	Erosion protection at tunnel outlet	561
7.2.7	Surface protection of cofferdams	567
7.3	River diversion	572
7.3.1	Effect of constriction	572
7.3.2	Transitional flow	573
7.3.3	Subcritical flow	574
7.4	Culvert	575
7.4.1	Introduction	575
7.4.2	Hydraulic design	579
7.5	Pier and abutment scour	580
7.5.1	Introduction	580
7.5.2	Experimental setup	582
7.5.3	Scour depth equation	583
7.5.4	Limitations and further results	586
7.5.5	Effect of flood wave	588
7.5.6	Protection against scour using riprap	594
	Notation	605
	References	608
	Bibliography	611
8	Intakes and outlets	621
8.1	Introduction	621
8.2	High submergence intakes	623
8.2.1	Design principles	623
8.2.2	Orifice flow	624
8.2.3	Inlet geometry	626
8.3	Low submergence intakes	628
8.3.1	Vortex flow	628
8.3.2	Vertical intake vortex	630

8.3.3	Limit or critical intake submergence	632
8.3.4	Air entrainment	634
8.3.5	Design recommendations	639
8.4	Practical aspects	641
8.4.1	Floating debris and trash-rack vibrations	641
8.4.2	Emergency gate closure	644
8.5	Gate flow	644
8.5.1	Introduction	644
8.5.2	Vertical planar gate flow	646
8.5.3	Hinged sloping flap gate	655
8.5.4	Hydraulics of standard vertical gate	662
8.6	Low-level outlet	672
8.6.1	Design principles	672
8.6.2	Gate types	676
8.6.3	Gate vibrations	680
8.6.4	Hydraulics of high-head gates	682
8.6.5	Cavitation and cavitation damage	684
8.6.6	Passive and active air entrainment	690
8.6.7	Interaction of water flow and air entrainment	693
8.6.8	Recent experimentation on air demand	702
	Notation	715
	References	720
	Bibliography	727
9	Reservoir sedimentation	737
9.1	Involved processes and sustainable reservoir use	737
9.2	Sedimentation rate and sediment distribution	738
9.3	Evolution of knowledge and management competence	740
9.4	Measures against reservoir sedimentation	741
9.4.1	Overview	741
9.4.2	Measures in catchment area	743
9.4.3	Measures in reservoir	745
9.4.4	Measures at dam	755
9.5	Sediment bypass tunnel	758
9.5.1	General	758
9.5.2	Suitable bypassing discharge and target sediment granulometry	761
9.5.3	Hydraulic design	762
9.5.4	Hydro-abrasion processes	767
9.5.5	Bed load particle motion dynamics	769
9.5.6	Mechanistic abrasion model	770
9.5.7	Lining material	772
9.5.8	Design of tunnel invert lining	773
9.5.9	Tunnel operation, maintenance, and rehabilitation	777

9.5.10	Instrumentation and monitoring techniques	780
9.5.11	Ecological impacts of SBT operation	780
9.6	Turbidity currents	782
9.6.1	Definition	782
9.6.2	Plunge point and equilibrium flow	784
9.6.3	Flow over obstacle	787
9.6.4	Flow across screen	789
9.6.5	Control by opposing jets	791
9.6.6	Intrusion	795
9.7	Sedimentation control	795
9.7.1	Turbulent suspension	795
9.7.2	Recommendations on turbidity current venting	797
9.7.3	Sediment flushing	799
9.7.4	Selection of reservoir geometry and locations of inlets and outlets	799
9.8	Secondary hydraulic effects	799
9.8.1	Upstream river	799
9.8.2	Downstream river	800
9.8.3	Replenishment or disposal of sediments	803
