2.3.5	Additional Remarks on Dynamic Nonlinear Analysis . . .	45
2.3.6	Elastic and Inelastic Design Spectra . . . . .	50
2.4	Conclusions . . . . .	54
	References . . . . .	54
<b>3</b>	<b>Force-Based Design of EC8 . . . . .</b>	<b>59</b>
3.1	Introduction . . . . .	59
3.2	Performance Requirements . . . . .	60
3.3	Seismic Action and Soil Types . . . . .	61
3.4	Design of Buildings . . . . .	65
3.4.1	Primary and Secondary Seismic Members . . . . .	65
3.4.2	Building Regularity . . . . .	66
3.4.3	Combination of Seismic Action with Other Actions . . .	67
3.4.4	Structural Modeling Aspects . . . . .	68
3.4.5	Methods of Linear Seismic Analysis . . . . .	68
3.4.6	Methods of Nonlinear Seismic Analysis . . . . .	70
3.4.7	Combination of the Effects of Seismic Actions . . . . .	71
3.4.8	Computation of Displacements . . . . .	71
3.4.9	Conditions Associated with the Two Limit States . . . . .	71
3.5	Specific Rules for Steel Buildings . . . . .	73
3.5.1	Structural Types and Behavior Factors . . . . .	74
3.5.2	Specific Design Rules . . . . .	77
3.6	Numerical Examples . . . . .	82
3.6.1	Seismic Design of Steel Building with MRFs by Lateral Force Method . . . . .	82
3.6.2	Seismic Design of a 3D Steel Building with MRFs by Response Spectrum Analysis . . . . .	92
3.6.3	Seismic Design of a 3D Steel Building with MRFs and CBFs by Response Spectrum Analysis . . . . .	99
3.7	Conclusions . . . . .	110
	References . . . . .	111
<b>4</b>	<b>Direct Displacement-Based Design . . . . .</b>	<b>113</b>
4.1	Introduction . . . . .	113
4.2	Performance and Capacity Design Requirements . . . . .	115
4.3	Basic Steps of DDBD Method for Steel Building Frames . . . . .	117
4.4	Discussion on Various Aspects of the Method . . . . .	124
4.4.1	Displacement Spectra and Equivalent Damping Ratios . . . . .	124
4.4.2	Expressions for the Yield Displacement . . . . .	126
4.4.3	Additional Information on the DDBD Method . . . . .	127
4.5	Numerical Examples . . . . .	128
4.5.1	Seismic Design of Steel Building with MRFs . . . . .	128
4.5.2	Seismic Design of Steel Building with CBFs . . . . .	137
4.5.3	Seismic Design of Steel Building with EBFs . . . . .	143
4.6	Conclusions . . . . .	149
	References . . . . .	150

<b>5</b>	<b>Hybrid Force-Displacement Design</b> . . . . .	153
5.1	Introduction . . . . .	153
5.2	Basic Steps of the HFD Design Method . . . . .	155
5.3	Design Equations for Space Regular Steel MRFs . . . . .	159
5.3.1	Geometry and Seismic Design of Frames Considered . . . . .	159
5.3.2	Nonlinear Modeling and Seismic Motions Considered . . . . .	162
5.3.3	Parametric Analyses and Creation of Response Databank . . . . .	163
5.3.4	Design Equations for the HFD Method . . . . .	164
5.4	Design Equations for Space Irregular MRFs . . . . .	166
5.5	Design Equations for Plane Regular MRFs . . . . .	171
5.6	Design Equations for Plane Regular CBFs . . . . .	172
5.7	Design Equations for Plane Irregular MRFs . . . . .	174
5.8	Seismic Design Examples for Steel Space MRFs . . . . .	176
5.8.1	Six-Storey Four-Bay Regular Steel Space MRF . . . . .	176
5.8.2	Eight-Storey Steel Space MRF with Setbacks . . . . .	179
5.9	Seismic Design Examples for Steel Plane Frames . . . . .	184
5.9.1	Five-Storey Regular Steel Plane MRF . . . . .	184
5.9.2	Five-Storey Regular Steel Plane X-Braced Frame . . . . .	188
5.10	Conclusions . . . . .	189
	References . . . . .	191
