This book is a translation of the original German edition „Städtebauliches Entwerfen“ by Reicher, Christa, published by Springer Fachmedien Wiesbaden GmbH in 2017. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
