design, showing a return to more humanized concepts based on the profound relationship of humankind with its inhabited space.

You will find solutions of the most diverse types, an effort to strike a balance between function and aesthetics, between the essential and the non-essential.

Included are floor plans, technical specifications, materials used and commentary on each project, all provided by the designing architects themselves. Eldridge Smerin, Drewes Architects, GAP Architetti Associati are just some of the architectural luminaries who have contributed to this fine selection.
