CONTENTS

FORMAL THEORIES OF POLITICS: MATHEMATICAL MODELLING IN POLITICAL SCIENCE

Ervin Y. Rodin vii Editorial Foreword

Paul E. Johnson 397 Formal theories of politics: the scope of mathematical modelling in political science

1. Multidimensional Models of Legislative Decision

Scott L. Feld, 405 Limits on agenda control in spatial voting games
Bernard Grofman and
Nicholas R. Miller

Norman Schofield 417 Smooth social choice

2. Spatial Competition Among Candidates for Public Office

John H. Aldrich and 437 A model of party constraints on optimal candidate Michael D. McGinnis positions

Gary W. Cox

451 Undominated candidate strategies under alternative voting rules

James M. Enclow and 461 The location of American Presidential candidates: an Melvin J. Hinich empirical test of a new spatial model of elections

Amihai Glazer, 471 A model of candidate convergence under uncertainty about voter preferences

Guillermo Owen

Daniel E. Ingberman 479 Reputational dynamics in spatial competition

3. Game and Decision Theory

Randall L. Calvert 497 Political decision making with costly and imperfect information

Mark Gradstein and 511 Advantageous multiple rent seeking Shmuel Nitzan

Emerson M. S. Niou and 519 The geographical imperatives of the balance of power in 3-country systems
