

AIChE JOURNAL

Chemical Engineering Research and Development

JANUARY 1997

CONTENTS

MECLU DU PRAT

Correct Is Not Enough (*Editorial*)..... Matthew Tirrell 1

FLUID MECHANICS AND TRANSPORT PHENOMENA

Radiation Heat Transfer Down an Elongated Spheroidal Cavity Sean P. Fitzgerald, William Strieder 2

Nonequilibrium Modeling of Condensed Mode Cooling of Polyethylene Reactors Yan Jiang, Kim B. McAuley, James C. C. Hsu 13

Diffusion of Proteins and Nonionic Micelles in Agarose Gels by Holographic Interferometry Donna D. Kong, T. Fettah Kosar, Stephanie R. Dungan, Ronald J. Phillips 25

Analysis of Cake Growth in Cake Filtration: Effect of Fine Particle Retention Chi Tien, Renbi Bai, B. V. Ramarao 33

Influence of Particle-Size Distribution on Entrainment Solid Rate in Fluidized Bed (*R&D Note*) A. M'chirgui, L. Tadrist, J. Pantaloni 260

Intensity of Segregation Revisited (*R&D Note*) H. L. Toor 263

Rheological Simulation of In-Line Bubble Interactions (*R&D Note*) Huai Z. Li, Youssef Mouline, Lionel Choplin, Noël Midoux 265

PARTICLE TECHNOLOGY AND FLUIDIZATION

Characteristics of High-Pressure Liquid-Solid Fluidization Tsao-Jen Lin, Liang-Shih Fan 45

SEPARATIONS

Asymptotic Models for H₂S Absorption into Single and Blended Aqueous Amines Edward B. Rinker, Owen T. Hanna, Orville C. Sandall 58

Robust Design of Countercurrent Adsorption Separation Processes: 4. Desorbent in the Feed Marco Mazzotti, Giuseppe Storti, Massimo Morbidelli 64

Equilibrium and Kinetic Exchange Processes of Weak Electrolytes Marcel L. Jansen, Joop Houwers, Adrie J. J. Straathof, Luuk A. M. van der Wielen, Karel Ch. A. M. Luyben, Will J. J. van den Tweel 73

Permeation Studies on Oriented Single-Crystal Ferrierite Membranes John E. Lewis, Jr., George R. Gavalas, Mark E. Davis 83

Analysis of Nucleation and Crystal Growth Data Using the Interfacial Supersaturation (*R&D Note*) Clifford Y. Tai, Cheng-Yi Shih 268

(Continued on back cover)

CONTENTS (Continued)

PROCESS SYSTEMS ENGINEERING

Synthesis of Drowning-Out Crystallization-Based Separations *David A. Berry, Susan R. Dye, Ka M. Ng* 91

Filter Medium Clogging During Cake Filtration (R&D Note)..... *D. J. Lee* 273

REACTORS, KINETICS, AND CATALYSIS

Simulations of a LDPE Reactor Using Computational Fluid Dynamics *Nolan K. Read, Simon X. Zhang, W. Harmon Ray* 104

Simulation of Decoking of Thermal Cracking Coils by Steam/Air-Mixtures..... *Evy M. Schools, Gilbert F. Froment* 118

Steady-State Multiplicity in Cocurrently Cooled Autothermal Reactors *Marisa Pedernera, Daniel O. Borio, José A. Porras* 127

Kinetic Study of Acrylic Acid Solution Polymerization..... *Robert A. Scott, Nikolaos A. Peppas* 135

Dynamics of Semibatch Polymerization Reactors: I. Theoretical Analysis..... *F. Teymour* 145

Dynamics of Semibatch Polymerization Reactors: II. Pilot-Plant Study..... *R. W. Chylla, J. David Campbell, F. Teymour* 157

Analysis of Rate Enhancement in a Periodically Operated Trickle-Bed Reactor..... *L. Gabarain, A. T. Castellari, J. Cechini, A. Tobolski, P. Haure* 166

Enhanced SO₂ Abatement with Water-Hydrated Dolomitic Particles *Ali Al-Shawabkeh, Hitoki Matsuda, Masanobu Hasatani* 173

THERMODYNAMICS

Recent Advances in Modeling Thermodynamic Properties of Aqueous Strong Electrolyte Systems (Journal Review)..... *Joseph R. Loehe, Marc D. Donohue* 180

Molecular Interactions in Chloroform-Diluent Mixtures *K. Choi, D. W. Tedder* 196

Vapor-Liquid Equilibria of the Ternary Mixture CH₄ + C₂H₆ + CO₂ from Molecular Simulation..... *Jadran Vrabec, Johann Fischer* 212

Analysis of \bar{v}_i/κ_{Tx} in Solvent Mixtures at the Critical Line (R&D Note)..... *E. H. Chimowitz, G. Afrane* 277

BIOENGINEERING, FOOD, AND NATURAL PRODUCTS

Phase Equilibria for the Mean-Force Potential of Globular Protein Solutions *Frederico W. Tavares, Stanley I. Sandler* 218

Recovery and Purification of Paclitaxel Using Low-Pressure Liquid Chromatography *D.-J. Wu, Z. Ma, B. W. Au, N.-H. L. Wang* 232

Diffusion Coefficients of Phenol and Oxygen in a Biofilm of *Pseudomonas putida* *Haluk Beyenal, Şule Şeker, Abdurrahman Tanyolaç, Bekir Salih* 243

ENVIRONMENTAL AND ENERGY ENGINEERING

Removal of Oil Films from Stainless Steel Tubes *Jenn-Feng Yan, A. Eduardo Sáez, Christine S. Grant* 251

Letters to the Editor 281

Book Reviews 283
