## Chapter 1 — MATERIALS RESEARCH UNDER MICROGRAVITY (Symp. 16)

Introduction	3
<i>Section 1. Results of Materials Sciences Experiments in Space</i>	
Immiscible Alloys under Microgravity Conditions <i>L. Ratke</i>	7
Crystal Growth from the Melt by Capillary Shaping Techniques <i>Y. A. Ossipyan and V. Tatarchenko</i>	17
Mass Diffusion in Liquids <i>H. U. Walter</i>	35
<i>Section 2. Ground-Based Studies</i>	
A Space Instrument for Fundamental Materials Science Problems: The Mephisto Program <i>A. Rouzaud, J. J. Favier and D. Thévenard</i>	49
A Facility for Precise Temperature Control Applications in Microgravity <i>M. E. Glicksman, E. Winsa, T. A. Lograsso, S. H. Tirmizi, R. C. Hahn and M. E. Selleck</i>	61
Fluid Physics Experiments under Microgravity Conditions <i>J. C. Legros and P. Queeckers</i>	69
The Japanese FMPT and Related Ground Experiments — Material Experiments Aspects <i>T. Nishinaga</i>	77
<i>Section 3. Utilization Studies</i>	
Planning for the Scientific Use of the International Space Station Complex <i>R. E. Halpern</i>	89
ESA Microgravity Payloads for the 1990s <i>G. Seibert</i>	97
<b>Chapter 2 — FLUID PHYSICS AND MATERIALS SCIENCES IN SPACE (Mtg G1)</b>	
EURECA and SGF Performances <i>D. Frimout and O. Minster</i>	113
Measurement of Surface Temperature in Microgravity Experimentation — Problems and Solutions <i>R. Monti and G. Mannara</i>	121

2-D Differential Interferometer <i>B. Biran, F. De Schryver and F. Dubois</i>	133
A New Module for the CSK-1 Crystallizer: Thermographic DTA Probe for the Study of Metastable Phase Equilibria Under Microgravity Conditions <i>Č. Barta, J. Trnka, A. Tříska, N. Ryšavá, R. Kuhl, R. Röstel and D. Schultze</i>	137
Simulation of Launch and Re-entry Acceleration Profiles for Testing of Shuttle and Unmanned Microgravity Research Payloads <i>J. M. Cassanto, H. I. Ziserman, D. K. Chapman, Z. R. Korszun and P. Todd</i>	141
The Optical Bidirectional Accelerometer <i>O. Dupont and J. C. Legros</i>	147
Experimental Drop Tube of the Metallurgy Department of Grenoble <i>J. P. Praizey, B. Vinet and J. Bost</i>	155
Payload Design for Microgravity Science in the Context of Space Materials Research in Mexico <i>R. Peralta-Fabi and F. J. Mendieta-Jiménez</i>	163
Directional Solidification of Complex-Forming Eutectic Melt of the $PbCl_2$ -AgCl Dielectric System Under Conditions of Zero, Normal and Increased Gravity <i>Č. Barta, F. Fendrych, E. Krčová, J. Trnka and A. Tříska</i>	167
Eutectic Solidification of Al-Cu Alloys Influenced by Convection <i>N. V. Stoichev, S. B. Yaneva, L. L. Regel and I. V. Videnskiy</i>	171
Marangoni and Buoyant Convection in an Open Cavity Under Reduced and Under Normal Gravity <i>D. Schwabe and A. Scharmann</i>	175
Convective Stability of Immiscible Fluids in Parallel Shearing Motion — Role of the Diffusion <i>R. Wang and A. Sanfeld</i>	187
Marangoni Convection when the Surface Tension Increases with the Temperature in Normal and Low Gravity Conditions <i>M. C. Limbourg, M. Hennenberg and J. C. Legros</i>	195
Time-Dependent Dynamical Behavior of Surface Tension on Rotating Fluids Under Microgravity Environment <i>R. J. Hung, Y. D. Tsao, B. B. Hong and F. W. Leslie</i>	205
Natural Convection Driven by Buoyancy and Surface Tension Forces Under External Magnetic Field <i>T. Maekawa and I. Tanasawa</i>	215
Forces Acting on a Foreign Particle Near a Solidification Front <i>M. A. Azouni and W. Kalita</i>	219
Computational Fluid Dynamics and Material Processing (Buoyancy and Thermocapillary Convections in Melts During Directional Crystallization) <i>B. Roux, H. Ben Hadid and P. Laure</i>	225
Macrosegregation During Crystal Growth in Horizontal Bridgman Boat <i>H. Ben Hadid and B. Roux</i>	251

Convective Motions in Liquid Metals for Material Processings. Numerical Simulation of Oscillation Regimes and Effect of Rotation	265
<i>J. P. Fontaine, E. Crespo del Arco, A. Randriamampianina, G. P. Extrémet and P. Bontoux</i>	
Steady and Oscillatory Convection in Vertical Cylinders Heated from Below. Numerical Simulation of Asymmetric Flow Regimes	281
<i>E. Crespo del Arco, P. Bontoux, R. L. Sani, G. Hardin and G. P. Extrémet</i>	
Surface Tension-Driven Flows in Horizontal Liquid Metal Layers	293
<i>H. Ben Hadid, B. Roux, P. Laure, P. Tison, D. Camel and J. J. Favier</i>	
Benefits of Microgravity for Measuring Thermomigration Coefficients in Liquid Metallic Alloys	305
<i>J.-P. Praizey</i>	
Liquid Phase Sintering of Tungsten Composites in Space: Results of Tests Performed in Texas	315
<i>L. B. Ekbohm and A. Eliasson</i>	
Undercooling Studies on Nb-Pt and Nb-Si Alloys Using the 105 Meter Drop Tube	321
<i>M. B. Robinson, R. J. Bayuzick and W. H. Hofmeister</i>	
Author Index	331
