# MAGNETIC ENERGY CONVERSION

---

Edited by G. E. Brueckner  
B. V. Somov

Pergamon Press

## CONTENTS

Preface	1
<i>Section 1. Basic Physical Processes; Stellar Atmospheres and the Interstellar Medium</i>	
On the Propagation of Alfvén Waves in a Doubly-Diffusive Atmosphere <i>L. M. B. C. Campos</i>	5
Solar and Stellar Coronae <i>E. N. Parker</i>	17
Magnetodynamical Jets and Flows in the Interstellar and Intergalactic Space <i>Y. Uchida</i>	31
On Electron Acceleration in Extended Radio Sources by Kinetic Alfvén Waves <i>T. M. Kirchner and J. Büchner</i>	39
Three Dimensional Reconnection in Astrophysical Plasmas <i>D. S. Spicer</i>	43
<i>Section 2. Magnetic Energy Conversion in the Laboratory and on the Sun</i>	
Laboratory Experiments on Magnetic Reconnection and Current Systems <i>R. L. Stenzel, J. M. Urrutia, W. Gekelman and H. Pfister</i>	55
Laboratory Experiments on Solar Flare Energy Release <i>A. T. Altyntsev, N. V. Lebedev and N. A. Strokin</i>	73
<i>Section 3. Magnetic Energy Conversion in Solar Flares</i>	
Magnetic Field Reconnection in Solar and Stellar Flares <i>M. R. Kundu and S. M. White</i>	85
Observations of Energy Conversion in the Solar Flare Plasma <i>E. Antonucci, M. A. Dodero and R. Martin</i>	91
Magnetic Energy Release in Interacting Loops Observed in a Solar Flare from Skylab <i>C. C. Cheng and K. G. Widing</i>	97
Acceleration Phases in High-Energy Solar Flares <i>C. de Jager</i>	101
Magnetic Reconnection on the Separator as a cause of a Two-Ribbon Flare <i>V. S. Gorbachev and B. V. Somov</i>	105
Discussion of the role of Turbulence for the Flare Energy Release <i>J. Jakimiec</i>	109
Observed Signatures of Magnetic Energy Conversion in Solar Flares and Microflares <i>C. H. Mandrini, M. E. Machado, A. M. Hernandez and M. G. Rovira</i>	115

<i>Section 4. Magnetic Energy Conversion in the Terrestrial Environment</i>	
Reconnection and Solar Terrestrial Coupling <i>D. Southwood</i>	123
Extreme Energetic Particle Decreases Near Geostationary Orbit: A Manifestation of Current Diversion within the Inner Plasma Sheet <i>D. N. Baker and R. L. McPherron</i>	131
Magnetic Reconnection in the Tail of the Magnetosphere <i>A. Nishida</i>	135
Mechanisms of Disruption of the Energy Storage in Magnetotail-Like Systems <i>J. Büchner and L. M. Zelenyi</i>	145
<i>Section 5. Magnetic Energy Conversion on the Sun</i>	
Solar Magnetic Fields and Large-Scale Electric Currents in the Active Regions <i>S. I. Gopasyuk</i>	151
Magnetic Energy Conversion in the Solar Transition Zone <i>G. E. Brueckner</i>	161
Heating of the Solar Transition Region in Fine-Scale Structures <i>K. P. Dere</i>	169
Acceleration Mechanism of the Periodic Tearing Modes and the Time Scale of the Solar Radio Spikes <i>H. Guang-Li</i>	173
Electrodynamic Conversion of Energy: Magnetic Field Amplification in the Solar Photosphere <i>J. C. Héroux and B. V. Somov</i>	179
The Correspondence between Small-Scale Coronal Structures and the Evolving Solar Magnetic Field <i>D. F. Webb and J. D. Moses</i>	185
Fine Structure Observation in a Solar Prominence <i>P. Lemaire, D. Samain and J. C. Vial</i>	191
Relationship between a Spot and a Filament Observed during Spacelab 2 Mission <i>B. Schmieder, K. P. Dere, M. A. Raadu, P. Démoulin and C. E. Alissandrakis</i>	195
Author Index	201
