ATMOSPHERIC ENVIRONMENT

Air Pollution: Air Quality • Emissions • Transport and Transformations • Atmospheric Composition • Deposition and Fate • Pollution and Climate Change • Environmental Policy • Special Themes

CONTENTS

New Directions

New Directions: Atmospheric methane removal as a way to mitigate climate change?
O. Boucher and G.A. Folberth

Regular papers

- M. Valari and L. Menut 3229 Transferring the heterogeneity of surface emissions to variability in pollutant concentrations over urban areas through a chemistry-transport model
- N. Zheng, J. Liu, Q. Wang and Z. Liang 3239 Heavy metals exposure of children from stairway and sidewalk dust in the smelting district, northeast of China
- J.E. Birdwell and K.T. Valsaraj 3246 Characterization of dissolved organic matter in fogwater by excitation-emission matrix fluorescence spectroscopy
- J. Li, T. Lin, S.-H. Pan, Y. Xu, X. Liu, G. Zhang and X.-D. Li 3254 Carbonaceous matter and PBDEs on indoor/outdoor glass window surfaces in Guangzhou and Hong Kong, South China
- M. Demarcke, J.-F. Müller, N. Schoon, H. Van Langenhove, J. Dewulf, E. Joó, K. Steppe, M. Šimpraga, B. Heinesch, M. Aubinet and C. Amelynck 3261 History effect of light and temperature on monoterpenoid emissions from *Fagus sylvatica* L.
- L. Wang, R. Jayaratne, D. Heuff and L. Morawska 3269 Development of a composite line source emission model for traffic interrupted microenvironments and its application in particle number emissions at a bus station
- Y. Gong, M. Hu, Y. Cheng, H. Su, D. Yue, F. Liu, A. Wiedensohler, Z. Wang, H. Kalesse, S. Liu, Z. Wu, K. Xiao, P. Mi and Y. Zhang 3278 Competition of coagulation sink and source rate: New particle formation in the Pearl River Delta of China
- S. Net, S. Gligorovski and H. Wortham 3286 Light-induced heterogeneous ozone processing on organic coated particles: Kinetics and condensed-phase products
- G. Croteau, R. Dills, M. Beaudreau and M. Davis 3295 Emission factors and exposures from ground-level pyrotechnics
- E. Cuccia, V. Bernardoni, D. Massabò, P. Prati, G. Valli and R. Vecchi 3304 An alternative way to determine the size distribution of airborne particulate matter
