# HYPERVELOCITY IMPACT PROCEEDINGS OF THE 1989 SYMPOSIUM

## Contents

<b>Norman Jones</b>	vii	Editorial
<b>Charles E. Anderson, Jr.</b>	ix	Preface
<b>D. Alwes</b>	1	Columbus-viewport glass pane hypervelocity impact testing and analysis
<b>James A. Ang</b>	23	Impact flash jet initiation phenomenology
<b>J. R. Asay and T. G. Trucano</b>	35	Studies of density distributions in one-dimensional shock-induced debris clouds
<b>J. R. Asay, T. G. Trucano and R. S. Hawke</b>	51	The use of hypervelocity launchers to explore previously inaccessible states of matter
<b>L. M. Barker, L. C. Chhabildas, T. G. Trucano and J. R. Asay</b>	67	High gas pressure acceleration of flier plates—experimental techniques
<b>D. J. Cagliostro, D. A. Mandell, L. A. Schwalbe, T. F. Adams and E. J. Chapyak</b>	81	MESA 3-D calculations of armor penetration by projectiles with combined obliquity and yaw
<b>A. C. Charters, T. L. Menna and Andrew J. Piekutowski</b>	93	Penetration dynamics of rods from direct ballistic tests of advanced armor components at 2–3 km/s
<b>L. C. Chhabildas, L. M. Barker, J. R. Asay and T. G. Trucano</b>	107	Relationship of fragment size to normalized spall strength for materials
<b>Eric L. Christiansen</b>	125	Investigation of hypervelocity impact damage to space station truss tubes
<b>Burton G. Cour-Palais and Jeanne Lee Crews</b>	135	A multi-shock concept for spacecraft shielding
<b>J. H. Cuadros</b>	147	Monolithic and segmented projectile penetration experiments in the 2 to 4 kilometers per second impact velocity regime
<b>S. A. Finnegan, J. C. Schulz and O. E. R. Heimdahl</b>	159	Spatial fragment mass and velocity distributions for ordnance and ultra-ordnance speed impacts
<b>L. Erik Fugelso, James N. Albright, Gerald C. Langner and Kerry L. Burns</b>	171	A hypervelocity projectile launcher for well perforation
<b>Lewis A. Glenn</b>	185	Design limitations on ultra-high velocity projectile launchers

<b>D. E. Grady and S. L. Passman</b>	197	Stability and fragmentation of ejecta in hypervelocity impact
<b>Arthur L. Gurson</b>	213	The effect of geometric scale on impact induced fragmentation, and its application to the design of dual plate armor
<b>Kathleen S. Holian</b>	231	Hydrodynamics code calculations of debris clouds produced by ball-plate impacts
<b>P. M. Holland, J. T. Gordon, T. L. Menna and A. C. Charters</b>	241	Hydrocode results for the penetration of continuous, segmented and hybrid rods compared with ballistic experiments
<b>V. D. Hopper, D. K. B. Sewell and D. K. Aitken</b>	251	Study of melt produced bodies observed at Henbury crater region
<b>G. C. Idzorek, P. W. Keaton, G. L. Stradling, M. T. Collopy, H. L. Curling, Jr. and D. B. McColl</b>	261	Data acquisition system for a hypervelocity-microparticle-impacts laboratory
<b>H. Iglseeder and E. Igenbergs</b>	271	Crater morphology at impact velocities between 8 and 17 km/s
<b>Gordon R. Johnson, Robert A. Stryk, Tim J. Holmquist and Omar A. Souka</b>	281	Recent EPIC code developments for high velocity impact: 3D element arrangements and 2D fragment distributions
<b>P. W. Keaton, G. C. Idzorek, L. J. Rowton, Sr., J. D. Seagrave, G. L. Stradling, S. D. Bergeson, M. T. Collopy, H. L. Curling, Jr., D. B. McColl and J. D. Smith</b>	295	A hypervelocity-microparticle-impacts laboratory with 100-km/s projectiles
<b>J. C. Keith and N. E. Banks</b>	309	Hypervelocity impact and aerodynamic breakup of liquids
<b>R. W. Klopp, D. A. Shockey, J. E. Osher and H. H. Chau</b>	323	Characteristics of hypervelocity impact debris clouds
<b>R. Jeffery Lawrence</b>	337	Enhanced momentum transfer from hypervelocity particle impacts
<b>J. M. McGlaun, S. L. Thompson and M. G. Elrick</b>	351	CTH: a three-dimensional shock wave physics code
<b>J. K. Meier</b>	361	The sensitivity of an Eulerian hydrocode impact analysis to user-selected impact parameters
<b>Robert W. Meier</b>	375	Effects of parametric variations of complex targets on damage from projectile impact
<b>Roger W. Melin</b>	389	Hypervelocity impact testing of heat pipe samples

- S. Miller** 403 A new design criteria for explosively-formed hyper-velocity projectile (EFHP)
- P. Naz and H. F. Lehr** 413 The crater formation due to segmented rod penetrators
- D. L. Orphal and R. R. Franzen** 427 Penetration mechanics and performance of segmented rods against metal targets
- J. Osher, R. Gathers,  
H. Chau, R. Lee,  
G. Pomykal and R. Weingart** 439 Hypervelocity acceleration and impact experiments with the LLNL electric guns
- Andrew J. Piekutowski** 453 A simple dynamic model for the formation of debris clouds
- J. J. Pyun, C. M. Kennedy and  
D. Hruska** 473 A new slideline/eroding algorithm for EPIC2
- Z. Rosenberg, E. Marmor  
and M. Mayseless** 483 On the hydrodynamic theory of long-rod penetration
- Daniel R. Scheffler and  
Jonas A. Zukas** 487 Numerical simulation of segmented penetrator impact
- E. Schneider, A. Stilp,  
R. Bureo and M. Lambert** 499 Micrometeorite and space debris simulation for Columbus hull components
- William P. Schonberg** 509 Hypervelocity impact response of spaced composite material structures
- Yasuki Adachi, Hideshige Ohtaki,  
Fumio Suehiro and Yujiro Shirai** 525 Micrometeoroid and debris impact test on space station bumper
- Omar A. Souka** 535 An automated microcomputer system for analyzing shaped-charge jet radiographs
- A. J. Stilp, V. Hohler,  
E. Schneider and K. Weber** 543 Debris cloud expansion studies
- G. L. Stradling, G. C. Idzorek,  
P. W. Keaton, J. K. Studebaker,  
A. A. Hopkins Blossom, M. T. Collopy,  
H. L. Curling, Jr. and S. D. Bergeson** 555 Searching for momentum enhancement in hyper-velocity impacts
- William J. Sommers, Jr. and  
Ken Dent** 571 Liquid-filled pellet phenomenology
- H. F. Swift** 579 On predicting projectile breakup during thin plate impact
- T. G. Trucano, D. E. Grady and  
J. M. McGlaun** 587 Fragmentation statistics from Eulerian hydrocode calculations

**T. G. Trucano and J. M. McGlaun** 601 Hypervelocity impact calculations using CTH: case studies

**Peter Tsou** 615 Intact capture of hypervelocity projectiles

629 Attendees—Hypervelocity Impact Symposium

635 Author Index

637 Subject Index

643 A simple dynamic model for the formation of debris  
D. J. Hopper, D. K. B. Sewell and D. K. Aiken

647 A new algorithm for EPIC  
G. C. Idzorek, P. W. Keston, G. L. Stradling, M. T. Colopy

683 On the hydrodynamic simulation of segmented penetrator in-  
teractions  
H. J. Wang and J. J. Wang

687 Numerical simulation of segmented penetrator in-  
teractions  
Gordon K. Johnson, Robert A. Stryk, James A. Zukas

693 EPIC code developments  
James A. Zukas

697 Anisotropic and space distribution of  
penetrator debris  
R. Burch and M. Lambert

703 Hypervelocity impact response of  
anisotropic structures  
L. J. Kowalski, Sr., J. D. Seagraves, G. L. Stradling, S. D. Bergeson, D. B. McColl and D. Smith

725 Micrometeoroid and debris impact  
station bumper  
William F. Schumaker, Yuzhi Adachi, Hirohiko Ohtaki, Fumio Saito and Yujiro Shirai

733 Hypervelocity impact microcomputer  
simulation  
R. W. Klopp, D. A. Stutz, E. Schneider and E. Weber

737 Particle cloud expansion studies  
Chia H. H. Chan

743 Interactions of hypervelocity impact  
jetting  
G. E. Swadlow, G. R. Johnson, F. W. Keston, J. R. Stubbaker, A. A. Hopkins, Blossom, M. T. Colopy

753 Hypervelocity impact studies  
T. G. Trucano, J. M. McGlaun, L. S. Thompsett and J. G. Kirk

771 Liquid-filled pellet phenomenology  
William J. Sommer, Jr. and H. R. Swift

779 On predicting projectile breakup during the  
penetration phase  
H. R. Swift

787 Fragmentation statistics from Eulerian hydrocode  
simulations  
T. G. Trucano, D. E. Grady and J. J. Molodtsov
