Special Issue

"Information flow and group decision making in social bees"

M. Spivak, S. Schneider, Guest editors

• Editorial	97
• Group decision making in nest-site selection by honey bees Th. D. SEELEY, P.K. VISSCHER (USA)	101
• The vibration signal, modulatory communication and the organization of labor in honey bees, <i>Apis mellifera</i> S.S. SCHNEIDER, L.A. LEWIS (USA)	117
• Sucrose responsiveness and behavioral plasticity in honey bees (<i>Apis mellifera</i>) R. SCHEINER, R.E. PAGE, J. ERBER (Germany, USA)	133
• Information flow and organization of stingless bee foraging J.C. BIESMEIJER, E.J. SLAA (USA)	143
• Recruitment communication in stingless bees (Hymenoptera, Apidae, Meliponini) J.C. NIEH (USA)	159
• Information flow and regulation of foraging activity in bumble bees (<i>Bombus</i> spp.) A. DORNHAUS, L. CHITTKA (UK)	183
• Collective control of the timing and type of comb construction by honey bees (<i>Apis mellifera</i>) S.C. PRATT (USA)	193
• Group decision making during queen production in colonies of highly eusocial bees D.R. TARPY, D.C. GILLEY (USA)	207
• Cued in: honey bee pheromones as information flow and collective decision-making T. PANKIW (USA)	217
