Special Issue

"The neglected gender – males in bees" Gudrun Koeniger

- Editorial 143
- Male mating behaviour and mating systems of bees: an overview
R.J. PAXTON (UK) 145
- The evolutionary significance of long copulation duration in bumble bees
M.J.F. BROWN, B. BAER (Ireland, Denmark) 157
- The males of *Melipona* and other stingless bees, and their mothers
H.H.W. VELTHUIS, D. KOEDAM, V.L. IMPERATRIZ-FONSECA (The Netherlands, Brazil) 169
- Sexual selection in *Apis* bees
B. BAER (Denmark) 187
- Paternity skew in seven species of honeybees (Hymenoptera: Apidae: *Apis*)
H. SCHLÜNS, R.F.A. MORITZ, H.M.G. LATTORFF, G. KOENIGER (Germany) 201
- Drone competition at drone congregation areas in four *Apis* species
N. KOENIGER, G. KOENIGER, M. GRIES, S. TINGEK (Germany, Malaysia) 211
- Using drones for estimating colony number by microsatellite DNA analyses of haploid males in *Apis*
F.B. KRAUS, N. KOENIGER, S. TINGEK, R.F.A. MORITZ (Germany, Malaysia) 223
- She's my girl - male accessory gland products and their function in the reproductive biology of social bees
N.A. COLONELLO, K. HARTFELDER (Brazil) 231
- Morphological and ultrastructural changes in the mucus glands of *Apis mellifera* drones during pupal development and sexual maturation
L. MOORS, O. SPAAS, G. KOENIGER, J. BILLEN (Belgium, Germany) 245
- Differences in drone and worker physiology in honeybees (*Apis mellifera*)
N. HRASSNIGG, K. CRAILSHEIM (Austria) 255
- Variance in spermatozoa number among *Apis dorsata* drones and among *Apis mellifera* drones
G. KOENIGER, N. KOENIGER, S. TINGEK, M. PHIANCHAROEN (Germany, Malaysia, Thailand) 279
