Special Issue

Solid-Liquid Separation Systems

A collection of papers presented at the

United Engineering Foundation Conference on Solid–Liquid Separation Systems III,
which took place at Davos, Switzerland, September 30 to October 5, 2001.

edited by

CONTENTS

Preface	63
Characterisation of short-range structure of silica aggregates—implication to sediment compaction M. Hermawan, G. Bushell, G. Bickert and R. Amal	65
Applications of the Reflux Classifier in solid–liquid operations G. Nguyentrannam and K.P. Galvin	83
Lattice-Boltzmann simulation of flow through two-dimensional particle sediments J.R. Quispe and P.G. Toledo	91
A study of the polymer flocculation reaction in a linear pipe with a focused beam reflectance measurement probe J.D. Swift, K. Simic, R.R.M. Johnston, P.D. Fawell and J.B. Farrow	103
Simulation of sedimentation of bidisperse suspensions E.M. Tory and R.A. Ford	119
Settling velocities of particulate systems: 13. A simulator for batch and continuous sedimentation of flocculated suspensions P. Garrido, R. Burgos, F. Concha and R. Bürger	131
Dewatering properties of dual-polymer-flocculated systems S.M. Glover, Y.-d. Yan, G.J. Jameson and S. Biggs	145
The flocculation efficiency of polydisperse polymer flocculants Y.D. Yan, S.M. Glover, G.J. Jameson and S. Biggs	161
Colloid stability and coagulation rate of polystyrene latex particles in a turbulent flow M. Kobayashi, T. Maekita, Y. Adachi and H. Sasaki	177
A mathematical model for batch and continuous thickening of flocculated suspensions in vessels with varying cross-section R. Bürger, J.J.R. Damasceno and K.H. Karlsen	183
Numerical methods for the simulation of continuous sedimentation in ideal clarifier-thickener units R. Bürger, K.H. Karlsen, N.H. Risebro and J.D. Towers	209

Investigations on the flow and separation behaviour of hydrocyclones using computational fluid dynamics S. Schuetz, G. Mayer, M. Bierdel and M. Piesche	229
Separation of flocs in hydrocyclones—significance of floc breakage and floc hydrodynamics D. Woodfield and G. Bickert	239
The reversibility of floc breakage M.A. Yukselen and J. Gregory	251
Filtration experiments with compressible filter cakes in centrifugal fields with superimposed static pressure T. Friedmann, C. Lustenberger and E.J. Windhab	261
Effect of temperature on the dewaterability of hematite suspensions J. Hulston, R.G. de Kretser and P.J. Scales	269
Pore structure analysis of particle beds for fluid transport simulation during filtration C.L. Lin and J.D. Miller	281
Aggregate properties in relation to aggregation conditions under various applied shear environments C. Selomulya, G. Bushell, R. Amal and T.D. Waite	295
