Contents

General physics			
Sound generated by rubbing objects Z. Ye	91	Stability analysis of nonequilibrium mean field models by means of self-consistency equations T.D. Frank	146
Gravitomagnetic clock effect in the orbit of a spinning particle orbiting the Kerr black hole S.B. Faruque	95	Quantum vs classical mechanics: role of elementary excitations I. Loris and R. Sasaki	152
Quantum physics		High order analysis of nonlinear periodic differential equations P. Amore and H.M. Lamas	158
N-player quantum minority game Q. Chen, Y. Wang, J.-T. Liu and K.-L. Wang	98	Phase synchronization and crisis in coupled periodically driven chaotic oscillators W. Uhm and S. Kim	167
Separability criterion and local information in separable states W. Niu and A.M. Wang	103	Exact solutions for Wick-type stochastic coupled KdV equations Y. Xie	174
Exact solvability of moving boundary problems C. Yüce	107	Strain-induced nucleation at a dislocation pile-up: a nanoscale model for high pressure mechanochemistry V.I. Levitas	180
Quantum relaxation in hydrogen eigenstates and two-state transitions C. Colijn and E.R. Vrscey	113	Atomic, molecular and cluster physics	
Strategies for state-dependent quantum deleting W. Song, M. Yang and Z.-L. Cao	123	Lowest state $n = 1$ of H atom Rydberg matter: many eV energy release in Coulomb explosions S. Badiçi and I. Holmlid	186
Nonlinear science		Plasma and fluid physics	
Sensitivity to initial conditions in quantum dynamics: an analytical semiclassical expansion K.M. Fonseca Romero, M.C. Nemes, J.G. Peixoto de Faria and A.F.R. de Toledo Piza	129	Effect of wakefield on asymmetric self-phase modulation of an intense laser pulse propagating in a plasma in resonant and non-resonant cases M. Liu, H. Guo, B. Li, S. Liu and G. Wu	192
An alternative interpretation of the Beltrametti-Blasi formula by means of differential forms R. Campoamor-Stursberg	138
