## Special Issue on Proposed Earthquake Design Requirements of the National Building Code of Canada, 2005 edition

## Numéro spécial consacré aux exigences de calcul des séismes proposées au Code national du bâtiment, édition de 2005

Ronald H. DeVall	v-xviii	Introduction
Ronald H. DeVall	xix-xxxiii	Introduction
Arthur C. Heidebrecht	241-254	Overview of seismic provisions of the proposed 2005 edition of the National Building Code of Canada
John Adams and Gail Atkinson	255-271	Development of seismic hazard maps for the proposed 2005 edition of the National Building Code of Canada
W.D. Liam Finn and Adrian Wightman	272-278	Ground motion amplification factors for the proposed 2005 edition of the National Building Code of Canada
Ronald H. DeVall	279-286	Background information for some of the proposed earthquake design provisions for the 2005 edition of the National Building Code of Canada
JagMohan Humar and Mohamed A. Mahgoub	287-307	Determination of seismic design forces by equivalent static load method
Denis Mitchell, Robert Tremblay, Erol Karacabeyli, Patrick Paultre, Murat Saatcioglu, and Donald L. Anderson	308-327	Seismic force modification factors for the proposed 2005 edition of the National Building Code of Canada
JagMohan Humar, Soheil Yavari, and Murat Saatcioglu	328-337	Design for forces induced by seismic torsion
Murat Saatcioglu and JagMohan Humar	338-359	Dynamic analysis of buildings for earthquake-resistant design
Donald L. Anderson	360-365	Effect of foundation rocking on the seismic response of shear walls
W.E. McKeivitt	366-377	Proposed Canadian code provisions for seismic design of elements of structures, nonstructural components, and equipment
