Canadian Journal of Civil Engineering

Revue canadienne de génie civil

Volume 30, Number 3, June 2003

Volume 30, numéro 3, juin 2003

Construction engineering

- Peter Pilateris and Brenda McCabe 487-499
Sanjaya De Zoysa and Alan D. Russell 511-522
Osama Moselhi and Ahmed Hassanein 533-542

Engineering materials

- M.M. Reda Taha, A. Noureldin,
N. El-Sheimy, and N.G. Shrive 523-532
P.L. Shrive, A. Azarnejad, G. Tadros,
C. McWhinnie, and N.G. Shrive 543-554
N. Belas Belaribi, M. Semcha et L. Laoufi 580-584

Hydrotechnical engineering

- T. Mahdi et C. Marche 568-579
S.J. Gaskin, J. Pieterse, A. Al Shafie, and
S. Lepage 585-595

NOTE

- Masoud Ghodsian 596-600

DISCUSSIONS

- H. Chanson 601-604

- P.A. Manso and A.J. Schleiss 605

Ingénierie de la construction

- Contractor financial evaluation model (CFEM)
Knowledge-based risk identification in infrastructure
projects
Data acquisition and analysis for highway construction
using geographic information systems

Matériaux d'ingénierie

- Artificial neural networks for predicting creep with an
example application to structural masonry
Strengthening of concrete columns with carbon fibre
reinforced polymer wrap
Influence de la pouzzolane de Beni-saf sur les
caractéristiques mécaniques des bétons

Hydraulique

- Prévision par modélisation numérique de la zone de
risque bordant un tronçon de rivière subissant une crue
exceptionnelle
Erosion of undisturbed clay samples from the banks of
the St. Lawrence River

NOTE

- Supercritical flow over a rectangular side weir

DISCUSSIONS

- Discussion of "Stability of concrete macro-roughness lin-
ings for overflow protection of earth embankment dams"

- Reply to the discussion by H. Chanson on "Stability of
concrete macro-roughness linings for overflow protection
of earth embankment dams"

Continued on inside back cover / Suite au verso

Front cover: Lifting out the hydraulic excavators from 20 m (65 ft) below grade on the Confederation Plaza project, Vancouver, B.C. (photo courtesy of Dr. Alan D. Russell, The University of British Columbia).

Page couverture : Sortie d'excavatrices hydrauliques situées à 20 m (65 pieds) sous le niveau du sol, projet de la Confederation Plaza, Vancouver, C.-B. (photo offerte par M. Alan D. Russell, Université de la Colombie-Britannique).
