## Special Issue on Sustainable Development

## Numéro spécial consacré au développement durable

<b>Maria Elektorowicz and Robert Korol</b>	<b>ix–xi</b>	Introduction / Introduction
	ARTICLES	ARTICLES
<b>John Cuddihy, Christopher Kennedy, and Philip Byer</b>	<b>1–15</b>	Energy use in Canada: environmental impacts and opportunities in relationship to infrastructure systems
<b>Andrew Bjorn, Laura Declercq-Lopez, Sabrina Spatari, and Heather L. MacLean</b>	<b>16–29</b>	Decision support for sustainable development using a Canadian economic input–output life cycle assessment model
<b>Shovini Dasgupta and Edwin K.L. Tam</b>	<b>30–44</b>	Indicators and framework for assessing sustainable infrastructure
<b>Joshua Engel-Yan, Chris Kennedy, Susana Saiz, and Kim Pressnail</b>	<b>45–57</b>	Toward sustainable neighbourhoods: the need to consider infrastructure interactions
<b>T.E. El-Diraby, B. Abdulhai, and K.C. Pramod</b>	<b>58–71</b>	The application of knowledge management to support the sustainable analysis of urban transportation infrastructure
<b>Halla R. Sahely, Christopher A. Kennedy, and Barry J. Adams</b>	<b>72–85</b>	Developing sustainability criteria for urban infrastructure systems
<b>Todd A. Randall, Cameron J. Churchill, and Brian W. Baetz</b>	<b>86–98</b>	Geographic information system (GIS) based decision support for neighbourhood traffic calming
<b>R. Rehan, M. Nehdi, and S.P. Simonovic</b>	<b>99–113</b>	Policy making for greening the concrete industry in Canada: a systems thinking approach
<b>Cheryl Nelms, Alan D. Russell, and Barbara J. Lence</b>	<b>114–128</b>	Assessing the performance of sustainable technologies for building projects
<b>Nabil Bouzoubaâ and Benoît Fournier</b>	<b>129–143</b>	Current situation with the production and use of supplementary cementitious materials (SCMs) in concrete construction in Canada
<b>Amin Elshorbagy, Antarpreet Jutla, Lee Barbour, and Jim Kells</b>	<b>144–158</b>	System dynamics approach to assess the sustainability of reclamation of disturbed watersheds

*Continued on inside back cover / Suite au verso*

**Front cover:** Mitigation of undermined land that involved the addition of a paste which can flow to fill underground voids (see Hartshorn et al. in this issue, pp. 170–180).

**Page couverture :** Mesures d'atténuation utilisées pour un terrain sous-miné, comprenant l'addition d'une pâte puissante pour remplir les espaces vides sous le sol (voir Hartshorn et al. dans ce numéro, pp. 170–180).
