Construction engineering

ARTICLE

Yong-Woo Kim and Glenn Ballard 712-718

Engineering mechanics

ARTICLES

Márcio R.S. Corrêa and Adrian W. Page 601-614

Maria Anna Polak 665-677

Hydrotechnical engineering

ARTICLES

M.K. EL-Kamash, M.R. Loewen, and N. Rajaratnam 636-643

M. Stone and B.G. Krishnappan 658-664

Spyros Beltaos and Brian C. Burrell 687-698

Spyros Beltaos and Brian C. Burrell 699-711

Joyce-Li Zhang and K. Ponnambalam 719-725

NOTE

Rajkumar V. Raikar and Subhasish Dey 775-781

Ingénierie de la construction

ARTICLE

Profit-point analysis: A tool for general contractors to measure and compare costs of management time expended on different subcontractors

Mécanique appliquée

ARTICLES

A novel approach for assessing the interaction of masonry walls under vertical loads

Analysis of polyethylene pipe behaviour in horizontal directional drilling field tests

Hydraulique

ARTICLES

Measurements of void fraction and bubble properties on a stepped chute using a fiber-optic probe

Fractal dimensions of cohesive sediment during settling in steady state flow with different initial sediment concentrations

Determining ice-jam-surge characteristics from measured wave forms

Field measurements of ice-jam-release surges

Stochastic control for risk under deregulated electricity market — a case study using a new formulation

NOTE

Clear-water scour at bridge piers in fine and medium gravel beds
