Engineering materials

ARTICLES

N. Banthia, R. Gupta, and S. Mindess 126-133

Vikas Sharma and Shweta Goyal 134-139

V. Aleo, M.K.S. Madugula, and
R. Balachandar 151-160

NOTES

Hamid R. Soleymani 199-205

Peter J. Tumidajski and B. Gong 206-213

Hydrotechnical engineering

ARTICLE

Rajkumar V. Raikar and Subhasish Dey 140-150

NOTE

Jueyi Sui, Faye E. Hicks, and
Brian Menounos 214-218

Structural engineering

ARTICLES

Abolghasem Nezamian, Riadh Al-Mahaidi,
and Paul Grundy 111-125

M.T. Kazemi and V. Broujerdian 161-168

Matériaux d'ingénierie

ARTICLES

Development of fiber reinforced concrete repair materials

Comparative study of performance of natural fibres and
crumb rubber modified stone matrix asphalt mixtures

Development of an equation for aluminum alloys to
determine the width of the zone affected by welding

NOTES

Structural design properties of concrete for a bridge in
Alberta

Effect of coarse aggregate size on strength and workability
of concrete

Hydraulique

ARTICLE

Pier scour and thin layered bed scour within a long
contraction

NOTE

Observations of riverbed scour under a developing
hanging ice dam

Ingénierie des structures

ARTICLES

Bond strength of concrete plugs embedded in tubular steel
piles under cyclic loading

Reinforced concrete beams without stirrups considering
shear friction and fracture mechanics

Continued on inside back cover / Suite au verso

Front cover: All-steel buckling-restrained brace prototype under a
simulated earthquake loading at École Polytechnique of Montréal
(see Tremblay et al. in this issue, pp. 183-198).

Page couverture : Prototype de diagonale de contreventement confiné
en acier soumise à un chargement sismique à l'École Polytechnique de
Montréal (voir Tremblay et al. dans ce numéro, p. 183-198).
