ARTICLES

ARTICLES

Saeed Mirza 639-649

Durability and sustainability of infrastructure —
a state-of-the-art report

Saeed Mirza 650-672

Durability design of infrastructure and some related issues

Lamya Amleh and Alaka Ghosh 673-682

Modeling the effect of corrosion on bond strength at the
steel-concrete interface with finite-element analysis

Karim Helmi, Amir Fam, Aftab Mufti,
and J. Michael Hall 683-691

Effects of driving forces and bending fatigue on the
structural performance of a novel concrete-filled fibre-
reinforced-polymer tube pile

J. Humar, M. Mahgoub, and
M. Ghorbanie-Asl 692-706

Effect of second-order forces on seismic response

O. Burkan Isgor and A. Ghani Razaqpur 707-718

Advanced modelling of concrete deterioration due to
reinforcement corrosion

Branko Ladanyi 719-725

Creep of frozen slopes and ice-filled rock joints under
temperature variation

Fariborz Majdzadeh,
Sayed Mohamad Soleimani, and
Nemkumar Banthia 726-734

Shear strength of reinforced concrete beams with a fiber
concrete matrix

Sher Ali Mirza 735-747

Comparative strength analyses of structural concrete
columns

Jahangir Mirza, Stéphane Tremblay,
Frédéric Sebbagh, and Gérard Ballivy 748-755

Performance of waterstops at different temperatures

George Morcoux and Zoubir Lounis 756-765

Integration of stochastic deterioration models with
multicriteria decision theory for optimizing maintenance of
bridge decks

Continued on inside back cover / Suite au verso

Front cover: Shear test on fibre reinforced concrete developed at the
University of British Columbia (see Majdzadeh et al. in this issue, pp.
726-734).

Page couverture : Essai de cisaillement sur du béton renforcé de
fibres développé à l'université de la Colombie-Britannique (voir
Majdzadeh et al. dans ce numéro, p. 726-734).
