Construction engineering

ARTICLE

**Kasun N. Hewage and
Janaka Y. Ruwanpura** 1075-1089

Engineering materials

ARTICLES

**Naga Shashidhar and
Kasthurirangan Gopalakrishnan** 945-954

Peter J. Tumidajski 1022-1026

Environmental engineering

ARTICLE

**Solomon Tesfamariam, Balvant Rajani,
and Rehan Sadiq** 1050-1064

Hydrotechnical engineering

ARTICLES

**N. Rajaratnam, M.A.F. Sadeque, and
C. Katopodis** 982-988

F. Yazdandoost, H. Shamloo, and A. Adib 1027-1038

NOTE

A. Melih Yanmaz 1098-1102

Ingénierie de la construction

ARTICLE

Carpentry workers issues and efficiencies related to construction productivity in commercial construction projects in Alberta

Matériaux d'ingénierie

ARTICLES

Evaluating the aggregate structure in hot-mix asphalt using three-dimensional computer modeling and particle packing simulations

Effect of slag, silica fume, and finishing on the sorptivities of field concrete

Ingénierie de l'environnement

ARTICLE

Possibilistic approach for consideration of uncertainties to estimate structural capacity of ageing cast iron water mains

Hydraulique

ARTICLES

A simple method to predict flow distribution at vertical angled screens in open channels

Introduction of a stochastic approach in the development of a numerical model for tidal-fluvial interaction analysis and design

NOTE

Temporal variation of clear water scour at cylindrical bridge piers

Continued on inside back cover / Suite au verso

Front cover: Schematic of the loading configuration adopted in testing the hollow core slabs: locations of the loading frames and the dial gauges (see Hosny et al., in this issue, pp. 955-967).

Page couverture : Plan de chargement utilisé lors de la mise à l'essai des dalles à noyau creux : emplacement des bâtis de chargement et des comparateurs à cadran (voir Hosny et al., ce numéro, p. 955-967).
