4.2.5	Apertures.....	41
4.2.6	Filters.....	41
4.2.7	Modulators.....	42
4.3	Light Generation and Detection.....	44
4.3.1	Incoherent Sources.....	44
4.3.2	Lasers.....	45
4.3.3	Detectors.....	46
<b>5</b>	<b>Electricity and Electronic Devices</b>	
5.1	Electricity.....	49
5.1.1	Potential and Current.....	49
5.1.2	Resistance.....	54
5.1.3	Capacitance and Inductance.....	55
5.2	Semiconductor Devices.....	58
5.2.1	Diodes.....	58
5.2.2	Transistors.....	59
5.2.3	Integrated Circuits.....	60
5.3	Amplifiers.....	60
5.4	Digitization.....	63
<b>6</b>	<b>Ionizing Radiation</b>	
6.1	Introduction.....	67
6.2	Types of Ionizing Radiation.....	69
6.2.1	Energetic Electromagnetic Waves.....	69
6.2.2	Energetic Particles.....	70
6.3	Sources.....	71
6.3.1	Nuclear Decay.....	71
6.3.2	X-Ray Generators.....	72
6.3.3	Cosmic Rays.....	73
6.4	Detectors.....	73
6.4.1	Counters.....	73
6.4.2	Imaging Devices.....	74
6.5	Safety Considerations.....	77
<b>7</b>	<b>Conventional Sensors</b>	
7.1	Introduction.....	79
7.2	Temperature Sensors.....	79
7.2.1	Thermistors.....	80
7.2.2	Thermocouples.....	82
7.2.3	Infrared Thermometers.....	83
7.3	Pressure Sensors.....	85
7.3.1	Diaphragms.....	85
7.3.2	Capacitance Manometers.....	87
7.3.3	Strain Gauges.....	87
7.4	Level Sensors.....	88
7.4.1	Capacitive Sensors.....	88
7.4.2	Ultrasonic and Acoustic Sensors.....	88
7.4.3	Radar Time-Domain Reflectometers.....	89
7.5	Flow Rate Sensors.....	90
7.5.1	Heat Transfer Sensors.....	90
7.5.2	Ultrasonic Sensors.....	90
7.5.3	Electromagnetic Sensors.....	90
7.5.4	Differential Pressure Sensors.....	90
<b>8</b>	<b>Particle Size</b>	
8.1	Introduction.....	91
8.1.1	Representation of Particle Size.....	91
8.1.2	Types of PSD Instruments.....	91
8.2	Particle Counting.....	92
8.2.1	Electrical Counting.....	92
8.2.2	Optical Counting.....	92
8.2.3	The Normalization of Counting Data.....	92
8.2.4	Focused Back-Reflection Method.....	92
8.3	Optical Scattering Techniques.....	93
8.3.1	Static Light Scattering.....	93
8.3.2	Dynamic Light Scattering.....	93
8.4	Ultrasonic Attenuation Spectroscopy.....	94
8.4.1	Theoretical Background.....	94
8.4.2	Hardware Considerations.....	94
8.4.3	A Practical Ultrasonic Spectrometer.....	94
8.4.4	Validation of the Technique.....	94
8.4.5	Applications.....	94
8.5	Appendix on Recovery of the PSD.....	95
8.6	Appendix on the X-ray Disc Centrifuge.....	95
<b>9</b>	<b>Process Imaging</b>	
9.1	Introduction.....	96
9.2	Direct Imaging.....	96
9.3	Tomographic Imaging.....	96
9.4	Case Study: Crystallization.....	96
9.5	Case Study: Granulation.....	96
9.6	Case Study: Media Milling.....	96
<b>10</b>	<b>Thickness Gauging</b>	
10.1	Radiation Gauges.....	97
10.2	Ultrasonic Thickness Gauging of Ultrathin Films.....	97
10.2.1	Theory of Measurement.....	97
10.2.2	Measurement Sensitivity.....	97
10.2.3	Effect of Ambient Conditions.....	97

Preface .....	xi
Acknowledgments.....	xiii
About the Author.....	xv
<b>1 Introduction</b>	
1.1 Motivation for Process Measurement .....	1
1.2 Process Sensors .....	2
1.3 The Physics of Measurement.....	4
<b>2 Measurement</b>	
2.1 The Sensor Model .....	7
2.2 Units of Measure.....	8
2.3 Simple Statistics .....	9
2.4 Sources of Error .....	11
2.5 Analysis of Error.....	13
<b>3 Sound and Wave Phenomena</b>	
3.1 Sound.....	17
3.2 Waves.....	19
3.3 The Wave Equation and Its Solutions.....	21
3.4 Wave Phenomena.....	23
3.4.1 Reflection .....	23
3.4.2 Refraction.....	23
3.4.3 Superposition and Interference .....	25
3.4.4 Resonance .....	27
3.4.5 Doppler Shift.....	27
3.4.6 Diffraction.....	29
3.5 Sound Generation and Detection .....	30
3.6 Appendix on the Wave Equation .....	31
<b>4 Light</b>	
4.1 Electromagnetic Waves.....	35
4.2 Optical Elements.....	38
4.2.1 Mirrors .....	38
4.2.2 Prisms and Gratings.....	39
4.2.3 Beam Splitters.....	39
4.2.4 Lenses.....	40

10.2.4	Transducer Effects .....	168
10.2.5	Summary .....	177
10.3	Optical Thickness Measurements for Single and Multilayer Films.....	178
10.3.1	Principle of Operation .....	179
10.3.2	The Optical Sensor and Test Block.....	180
10.3.3	Single Film Thickness Measurements .....	182
10.3.4	Application to Multilayer Films .....	184
10.4	Appendix on the Thin-Plate Approximation .....	185
10.5	Appendix on Depth of Focus.....	190
10.5.1	Laser Beams and Gaussian Optics .....	190
10.5.2	Beam Concentration .....	192
10.5.3	Depth of Focus .....	192
10.6	Appendix on Thickness Correction.....	193
10.6.1	Single-Ply Films .....	194
10.6.2	Multi-Ply Laminates.....	195
<b>11</b>	<b>Plastics and Composite Materials</b> .....	<b>199</b>
11.1	Identification of Polymer Type .....	200
11.1.1	NIR Absorbance Spectra .....	202
11.1.2	Neural Networks.....	203
11.1.3	Hardware Implementation .....	205
11.2	Contamination Detection in Molten Polymer.....	207
11.3	Characterization of Reinforced Polymers .....	207
11.3.1	Applications of Reinforced Polymers .....	209
11.3.2	Measurement Principles .....	211
11.3.3	Hardware Implementation .....	212
11.3.4	Experimental Results .....	214
11.4	Measurement of Part Dimensions Using Radioscopy .....	215
11.4.1	Concept .....	216
11.4.2	Implementation.....	216
11.4.3	Depth-of-Flaw Measurements .....	218
11.4.4	Wall Thickness Measurements .....	219
11.5	Appendix on the Calculation of Loading .....	223
	Notes .....	227
	References.....	235
	Index .....
