

T281  
UNITS 6-7

THE OPEN UNIVERSITY   
TECHNOLOGY: A SECOND LEVEL COURSE

281: BASIC PHYSICAL SCIENCE FOR  
**TECHNOLOGY**

2-541-110-1

PRODUCING CHEMISTRY  
EQUILIBRIUM

# CONTENTS

<b>Aims</b>	5
<b>Objectives</b>	5
<b>1 INTRODUCTION</b>	<b>6</b>
1.1 Chemistry and technology	6
1.2 Chemistry in this course	7
1.3 How to study this unit	7
<b>2 ELEMENTS AND COMPOUNDS</b>	<b>8</b>
2.1 Early chemistry	8
2.2 The atomic theory	8
2.3 Chemical formulae	10
2.4 Inorganic nomenclature	11
2.5 Relative molecular mass	13
2.6 Summary of section 2	13
<b>3 CHEMICAL REACTIONS</b>	<b>14</b>
3.1 General features of a chemical reaction	14
3.2 Chemical equations	15
3.3 Stoichiometry	16
3.4 Measuring the mass of solid compounds	19
3.5 Measuring liquids	20
3.6 Measuring gases	21
3.7 Summary of section 3	23
<b>4 PERIODICITY</b>	<b>24</b>
4.1 Evidence from observed properties	24
4.2 Evidence from chemical formulae	24
4.3 Evidence from physical properties	27
4.4 Mendeleev's periodic table	28
4.5 Summary of section 4	30
<b>5 THE ATOMIC BASIS OF CHEMISTRY</b>	<b>31</b>
5.1 Structure of the atom	31
5.2 Energy levels in atoms	31
5.3 The arrangement of electrons in atoms	32
5.4 Electron arrangements and chemical properties	36
5.5 Bonding	37
5.5.1 Ionic bonds	37
5.5.2 Covalent bonds	38
5.6 The modern periodic table	39
5.7 Summary of section 5	40
<b>6 CONCLUSION</b>	<b>40</b>
<b>ANSWERS TO SELF-ASSESSMENT QUESTIONS</b>	<b>42</b>
