

CHEMICAL REACTIONS

in

Edited by

ELLIOT R. BERNSTEIN

CLUSTERS

Contents

Contributors, ix

1. Theoretical Approaches to the Reaction Dynamics of Clusters, 3
A. González-Lafont and D. G. Truhlar
 2. Weakly Bound Molecular Complexes as Model Systems for Understanding Chemical Reactions, 40
R. E. Miller
 3. Dynamics of Ground State Biomolecular Reactions, 64
C. Wittig and A. H. Zewail
 4. Photochemistry of van der Waals Complexes and Small Clusters, 100
C. Jouvet and D. Solgadi
 5. Intermolecular Dynamics and Biomolecular Reactions, 147
E. R. Bernstein
 6. Reaction Dynamics in Femtosecond and Microsecond Time Windows: Ammonia Clusters as Paradigm, 197
S. Wei and A. W. Castleman Jr
 7. Magic Numbers, Reactivity, and Ionization Mechanisms in Ar_nX_m Heteroclusters, 221
G. Vaidyanathan and J. F. Garvey
- Index, 259
