## PREFACE

## INTRODUCTION

<b>Chapter 1</b>	<b>TYPES OF CHARGE TRANSFER REACTIONS</b>	
	1.1 Electron transfer in the condensed phase	1
	1.1.1 Solid-state processes	1
	1.1.2 Liquid-phase chemical reactions	3
	1.1.3 Electron transfer at interfaces	7
	1.1.4 Electron transfer in biological macromolecules	7
	1.2 Proton transfer reactions	8
	1.3 Transfer of ions and atomic groups	9
<b>Chapter 2</b>	<b>ELECTRON TRANSFER REACTIONS. GENERAL THEORETICAL CONCEPTS</b>	
	2.1 Two notes on the nature of the electron transfer process	11
	2.1.1 The electron transition between molecular fragments is a quantum mechanical phenomenon	11
	2.1.2 Self-averaging of observables	12
	2.2 The states of the quantum particles	13
	2.2.1 Harmonic vibrations	14
	2.2.2 Particle in the potential "box"	16
	2.2.3 Harmonic oscillator	18
	2.3 Born-Oppenheimer approximation	19
	2.4 Tunneling	22
	2.4.1 Tunnel passage of a free particle through a static barrier	22
	2.4.2 Resonance splitting of the energy levels in a double-well potential	24
	2.4.3 Landau-Zener transitions	24
	2.5 Fermi golden rule and statistical averaging	28
	2.6 Coordinate distribution function	29

---

Chapter 3	<b>ELECTRON TRANSFER IN POLAR SOLVENT</b>	
	3.1 Inertialess and inertial polarizations of the medium	34
	3.1.1 Different role of fast and slow polarizations	34
	3.1.2 The Franck-Condon principle	37
	3.1.3 Fields and polarization in dielectrics	39
	3.2 Classical equilibrium fluctuations in a uniform dielectric	43
	3.2.1 Separation of high frequency and low frequency polarizations	44
	3.2.2 The Hamiltonian of the reacting system	48
	3.2.3 Diabatic and adiabatic approaches	48
	3.3 Solvent effect on the reaction rate constant	60
	3.3.1 The solvent reorganization energy	60
	3.3.2 The role of the quantum part of the inertial polarization in non-adiabatic and adiabatic reactions	63
	3.3.3 The role of fast polarization in non-adiabatic and adiabatic reactions	65
	3.3.4 Effect of the fluctuation of the cavity size	67
	3.3.5 Inverted region	68
Chapter 4	<b>ELECTROCHEMICAL ELECTRON TRANSFER</b>	
	4.1 Electric current for non-adiabatic reactions	72
	4.2 Adiabatic electrochemical reactions	76
	4.3 Gerischer's view of electron transfer	78
	4.4 Distribution of the electron energy gap in the solution	79
Chapter 5	<b>PROTON TRANSFER PROCESSES</b>	
	5.1 Transition probability in the harmonic approximation	83
	5.2 Partially adiabatic proton transfer	88
	5.3 The kinetic hydrogen isotope effect and the distance dependence of the transition probability	89
Chapter 6	<b>STOCHASTIC APPROACH TO CHEMICAL REACTIONS IN SOLUTIONS</b>	
	<b>APPENDIX A</b>	97
	<b>APPENDIX B</b>	101
	<b>REFERENCES</b>	103
