

Christopher W. Macosko

RIM Fundamentals of Reaction Injection Molding

CONTENTS

FOREWORD.....	VII
PREFACE.....	IX
Chapter 1:	
INTRODUCTION.....	1
Chapter 2:	
POLYURETHANES	
2.1 Reactions.....	12
2.2 Polymerization.....	16
2.3 Polymerization to Form Segmented Block Copolymers.....	21
2.4 RIM Formulations.....	24
2.5 Polymerization Kinetics.....	29
2.6 Rheology and Properties of Crosslinking Urethanes.....	39
2.7 Rheology and Properties of Phase Separating Urethanes.....	46
Chapter 3:	
MATERIAL DELIVERY	
3.1 Process Description.....	73
3.2 Low Pressure Conditioning.....	76
3.3 High Pressure Metering.....	78
3.4 Lab Scale Machines.....	82
Chapter 4:	
MIXING	
4.1 Mixhead Design.....	87
4.2 Measures of Mixing Quality.....	93
4.3 Visualization.....	99
4.4 Micromixing.....	103
Chapter 5:	
MOLD FILLING	
5.1 Laminar Filling.....	111
5.2 Unstable Filling, Air Entrainment.....	115
5.3 Analysis of Mold Filling.....	117
5.4 Adiabatic Filling.....	121
5.5 Moldability Diagrams for Filling.....	127
5.6 Filling Complex Molds.....	130

Chapter 6:

CURING

6.1 Analysis of Conversion and Temperature Profiles	139
6.2 Mold Packing	147
6.3 Demolding	149
6.4 Moldability	160
6.5 Mold Design	166
6.6 Finishing	168
6.7 Influence of Processing on Properties	170

Chapter 7:

NON-URETHANES FOR RIM

7.1 Polyamide 6	182
7.2 Dicyclopentadiene	193
7.3 Other Non-Urethanes	200

Chapter 8:

REINFORCED RIM

8.1 Filled RIM	210
8.2 Fiber Mat Reinforced RIM	218
8.3 Processing Mat Reinforced RIM	222

SUBJECT INDEX	239
