WITH APPLICATIONS

Contents **Volume 16, Number 4, 1988**

	iii	Softstrip® data strip containing the table of contents of this issue
K. N. A. Safwat and **B. D. Brademeyer**	269	Proof of global convergence of an efficient algorithm for predicting trip generation, trip distribution, modal split and traffic assignment simultaneously on large-scale networks
R. Manohar and **T. Y. Ngai**	279	Application of iteration functions to elliptic partial differential equations
P. Achuthan and **S. Sundar**	287	A new application of the extended Euclidean algorithm for matrix Padé approximants
C.-A. Wang	297	Buoyancy-induced flows in porous media
E. Zung and **J. Angeles**	307	Simulation of finite-dimensional linear dynamical systems using zero-order holds and numerical-stabilization methods
P. Góra and **A. Boyarsky**	321	Why computers like Lebesgue measure
D. Greenspan	331	Mechanisms of capillarity via supercomputer simulation
I. J. D. Craig and **A. D. Sneyd**	341	An alternating-direction implicit scheme for parabolic equations with mixed derivatives
	I	*Software Survey Section*
