Contents

Contributions

- J.-P. Allouche, J. Shallit and G. Skordev*
Self-generating sets, integers with missing blocks, and substitutions 1
- J.S. Caughman, M.S. MacLean and P.M. Terwilliger*
The Terwilliger algebra of an almost-bipartite P- and Q-polynomial association scheme 17
- N. De Feyter*
The embedding in $AG(3, q)$ of $(0, 2)$ -geometries containing a planar net 45
- A. Hellwig, D. Rautenbach and L. Volkmann*
Cuts leaving components of given minimum order 55
- A.J.W. Hilton and J. Wojciechowski*
Amalgamating infinite latin squares 67
- P. Jenkins*
Embedding partial G -designs where G is a 4-cycle with a pendant edge 83
- K.-i. Kawarabayashi, A. Nakamoto, Y. Oda and M. Watanabe*
Acute triangles in 4-connected maximal plane graphs 95
- A. K orolova*
Ramsey numbers of stars versus wheels of similar sizes 107
- W. Lin, P.C.B. Lam and Z. Song*
Circular chromatic numbers of some distance graphs 119
- M. Maydanskiy*
The incidence coloring conjecture for graphs of maximum degree 3 131
- H. Mizuno and I. Sato*
Bartholdi zeta functions of line graphs and middle graphs of graph coverings 143
- L. Stacho and D. Szeszl er*
On a generalization of Chvtal's condition giving new hamiltonian degree sequences 159
