

# SIGNAL PROCESSING

## CONTENTS

### Papers

- S. Mukhopadhyay and P. Sircar  
Parametric modelling of non-stationary signals: A unified approach ..... 135
- P.J. Loughlin and B. Tacer  
Instantaneous frequency and the conditional mean frequency of a signal ..... 153
- C. Richard and R. Lengellé  
Joint recursive implementation of time-frequency representations and their modified version by  
the reassignment method ..... 163
- T. Shimamura, S. Semnani and C.F.N. Cowan  
Equalisation of time-variant communications channels via channel estimation based approaches ..... 181
- J. Choi  
Beamforming for the multiuser detection with decorrelator in synchronous CDMA systems:  
Approaches and performance analysis ..... 195
- M.B. El Mashade  
Performance analysis of the excision CFAR detection techniques with contaminated reference  
channels ..... 213
- H.-C. Lin, L.-L. Wang and S.-N. Yang  
Fast heuristics for polygonal approximation of a 2D shape boundary ..... 235
- J. Flussar and T. Suk  
Classification of degraded signals by the method of invariants ..... 243
- Fast communications**
- A.B. Gershman, J. Ringelstein and J.F. Böhme  
Removing the outliers in root-MUSIC via conventional beamformer ..... 251
- J. Bae, I. Song, H. Morikawa and T. Aoyama  
Nonparametric detection of known signals based on ranks in multiplicative noise ..... 255
