

VOLUME 36

NUMBER 1 / NUMÉRO 1

JANUARY / JANVIER

2009

An NRC Research Press
JOURNAL
Une REVUE des
Presses scientifiques du CNRC

CIVIL ENGINEERING

Canadian Journal of

cjce.nrc.ca

Including papers submitted to the

JOURNAL OF ENVIRONMENTAL ENGINEERING AND SCIENCE

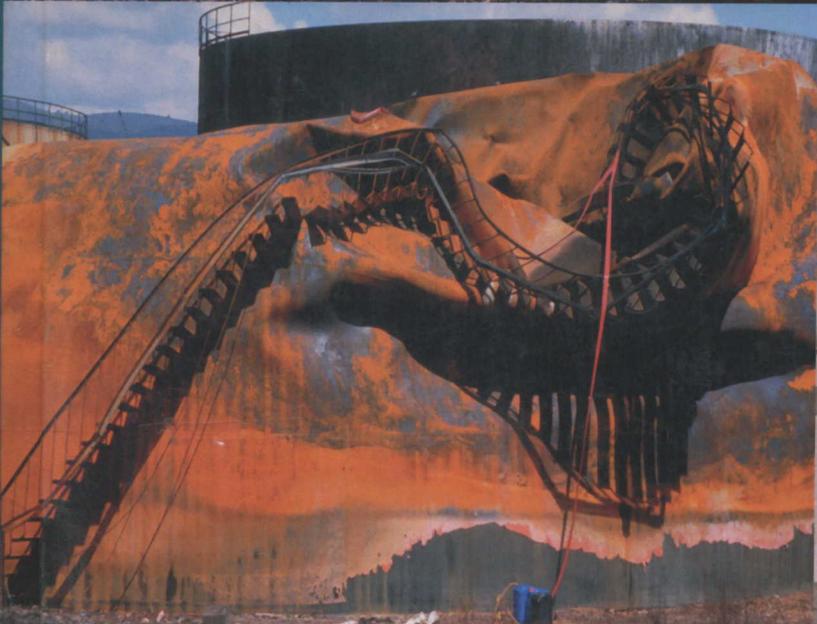

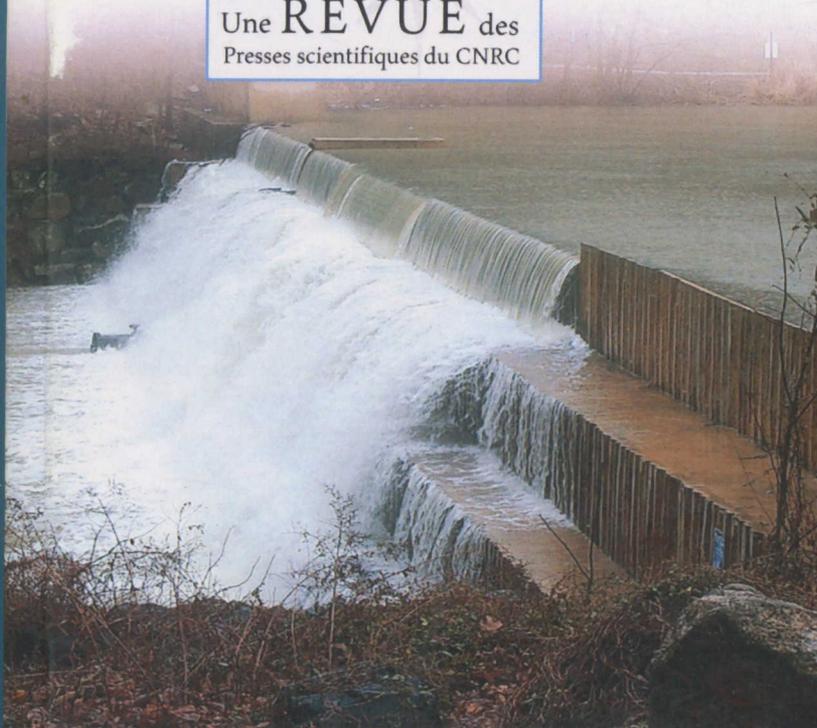

Revue canadienne de

GÉNIE CIVIL

rcgc.cnrc.ca

Y compris les articles envoyés à

LA REVUE DU GÉNIE ET DE LA SCIENCE DE L'ENVIRONNEMENT

National Research
Council Canada

Conseil national
de recherches Canada

NRC-CNRC

Paraic H. Rattigan, Arturo González, and Eugene J. OBrien 73-84

Transportation engineering

ARTICLES

Jonathan D. Regehr, Jeannette Montufar, and Garreth Rempel 40-49

Nedal T. Ratrouf and Maen Abdullatif Abu Olba 95-102

Ryan Bakay, Ezzeldin Yazeed Sayed-Ahmed, and Nigel Graham Shrive 103-121

TECHNICAL NOTE

Zübeyde Öztürk and Turgut Öztürk 122-125

Engineering Materials

CORRIGENDUM

Amjad Naseer, Abdul Jabbar, Akhtar Nazeem Khan, Qaisar Ali, Zakir Hussain, and Jahangier Mirza 126

Papers submitted to the Journal of Environmental Engineering and Science

ARTICLES

Maruf Mortula, Shannon M. Bard, Margaret E. Walsh, and Graham A. Gagnon 127-136

K.I. Ashley, D.S. Mavinic, and K.J. Hall 137-147

R. Subha and C. Namasivayam 148-159

Siva Sarathy and Madjid Mohseni 160-169

Influence of pre-existing vibrations on the dynamic response of medium span bridges

Ingénierie des transports

ARTICLES

Safety performance of longer combination vehicles relative to other articulated trucks

Adequacy of TRANSYT-7F and Synchro models along a major arterial in Saudi Arabia

Interfacial debonding failure for reinforced concrete beams strengthened with carbon-fibre-reinforced polymer strips

NOTE TECHNIQUE

Study on the effect of two different projects on commuter rail line capacity

Matériaux d'ingénierie

RECTIFICATIF

Corrigendum: Performance of Pakistani volcanic ashes in mortars and concrete

Articles soumis à la Revue du génie et de la science de l'environnement

ARTICLES

Aluminum toxicity and ecological risk assessment of dried alum residual into surface water disposal

Effect of orifice diameter, depth of air injection, and air flow rate on oxygen transfer in a pilot-scale, full lift, hypolimnetic aerator

Kinetics and isotherm studies for the adsorption of phenol using low cost micro porous ZnCl₂ activated coir pith carbon

The fate of natural organic matter during UV/H₂O₂ advanced oxidation of drinking water

Canadian Journal of

CIVIL ENGINEERING

Volume 36, Number 1, January 2009

Revue canadienne de

GÉNIE CIVIL

Volume 36, numéro 1, janvier 2009

Construction engineering

ARTICLE

Curtis Berthelot, Brent Marjerison, Rock Gorlick, Diana Podborochynski, Jena Fair, and Erin Stuber 14–25

Engineering mechanics

ARTICLE

Yail J. Kim, T. Ivan Campbell, Colin MacDougall, and Mark F. Green 85–94

Hydrotechnical engineering

ARTICLES

E. Kordi, S.A. Ayyoubzadeh, M.Z. Ahmadi, and A. Zahiri 1–13

Turgay Partal 26–39

Structural engineering

ARTICLES

P.L. Shrive, T.G. Brown, J.P. Newhook, J. Kroman, G.S. Tadros, and N.G. Shrive 50–62

Woo Bum Kim, Kangmin Lee, and Gil Hee Kim 63–72

Ingénierie de la construction

ARTICLE

Field investigation of granular base rehabilitation project incorporating a woven geotextile separation layer, sand, and cement stabilization

Mécanique appliquée

ARTICLE

Mechanical behaviour of a hyperelastic pad for an integrated cross-tie trackwork system

Hydraulique

ARTICLES

Prediction of the lateral flow regime and critical depth in compound open channels

River flow forecasting using different artificial neural network algorithms and wavelet transform

Ingénierie des structures

ARTICLES

Initial performance of the lower deck of the Centre Street Bridge, Calgary

Application of friction pendulum system to the main control room of a nuclear power plant

Continued on inside back cover / Suite au verso

Front cover: *top left*, stepped spillway in operation at Wilde Lake in Columbia, Maryland, on 23 March 2005 after a 1-year storm event (photo courtesy of Christopher Goodell; see Chanson in the August 2007 issue, pp. 946–951); *top right*, aerial photo (taken July 1999) of the Annacis Island Wastewater Treatment Plant showing the completed secondary treatment facilities designed to treat wastewater from about one million people, with an average dry weather flow of 480 million litres per day (photo courtesy of Colin Jewall, when under assignment to the Greater Vancouver Regional District); *bottom left*, oil tank damaged due to fire during the Kocaeli, Turkey, earthquake, 17 August 1999 (photo courtesy of Dr. Kenneth Elwood, The University of British Columbia); *bottom right*, diagonally divided concrete cubes placed as an erosion protection at diversion tunnel No. 1 of the Seymareh Dam in Iran (see Emami and Schleiss in the January 2006 issue, pp. 81–92).

Page couverture : *gauche supérieure*, passage de la crue dans l'évacuateur de crues en marches d'escalier au Wilde Lake, à Columbia (Maryland), le 23 mars 2005 après un événement pluvio-hydrologique d'un an (photo courtoisie de Christopher Goodell; voir Chanson, numéro de août 2007, p. 946–951); *droite supérieure*, photo aérienne (juillet 1999) de la station d'épuration des eaux usées de l'île Annacis qui montre les installations d'épuration secondaire conçues pour traiter les eaux usées d'environ un million de personnes, avec un débit moyen par temps sec de 48 millions de litres par jour (photo courtoisie de Colin Jewall, lors de son affectation au district régional du Grand Vancouver); *gauche inférieure*, réservoir d'huile endommagé par le feu durant le séisme de Kocaeli en Turquie, 17 août 1999 (photo courtoisie de Kenneth Elwood, The University of British Columbia); *droite inférieure*, cubes de béton séparés en diagonale et utilisés comme mesure de protection contre l'érosion à la sortie de la galerie de dérivation n 1 du barrage de Seymareh en Iran (voir Emami and Schleiss, numéro de juin 2006, p. 81–92).
