*Contents (concluded) / Table des matières (suite et fin)*

|  |                |  |
|--|----------------|--|
| <b>U.A. Ebead and K.W. Neale</b>   | <b>367-377</b> | Mechanics of fibre-reinforced polymer – concrete interfaces  |
| <b>Chaochao Yang and John Newhook</b>  | <b>378-388</b> | Developing a structural-health-monitoring model to monitor cracking in steel-free concrete deck slabs          |
| <b>Shamim A. Sheikh, S.A.D. Jaffry, and Ciyan Cui</b>                            | <b>389-402</b> | Investigation of glass-fibre-reinforced-polymer shells as formwork and reinforcement for concrete columns      |
| <b>Shamim A. Sheikh</b>  | <b>403-413</b> | Field and laboratory performance of bridge columns repaired with wrapped glass-fibre-reinforced-polymer sheets |
| <b>Khaled A. Soudki, Ahmad A. Rteil, Rania Al-Hammoud, and Timothy H. Topper</b> | <b>414-421</b> | Fatigue strength of fibre-reinforced-polymer-repaired beams subjected to mild corrosion                        |
| <b>R.C. Tennyson, N. Banthia, E. Rivera, S. Huffman, and I. Sturrock</b>         | <b>422-429</b> | Monitoring structures using long gauge length fibre optic sensors  |
| <b>E. Rivera, A.A. Mufti, and D.J. Thomson</b>                                   | <b>430-437</b> | Civionics for structural health monitoring   |
| <b>A.B. Siddique, B.F. Sparling, and L.D. Wegner</b>                             | <b>438-452</b> | Assessment of vibration-based damage detection for an integral abutment bridge                                 |
| <b>Emile Shehata and Aftab Mufti</b>   | <b>453-462</b> | Development of a glass-fiber-reinforced-polymer bridge deck system   |
| <b>R. El-Hacha, L. Bisby, B. Williams, D. Tung, and J. Ford</b>                  | <b>463-471</b> | First ISIS Canada pedestrian bridge: student design perspective  |

## Special Issue on Intelligent Sensing for Innovative Structures (ISIS Canada)

## Numéro spécial consacré à Innova- tions en structures avec systèmes de détection intégrés (ISIS Canada)

|   |          |  |
|---|----------|--|
|   | iii      | Announcement / Communiqué  |
|   | vii-viii | Introduction / Introduction  |
| ARTICLES  | ARTICLES |  |
| A.A. Mufti, B. Bakht, N. Banthia,<br>B. Benmokrane, G. Desgagné, R. Eden,<br>M.-A. Erki, V. Karbhari, J. Kroman,<br>D. Lai, A. Machida, K. Neale, G. Tadros,<br>and B. Täljsten | 267-283  | New <i>Canadian Highway Bridge Design Code</i> design provisions for fibre-reinforced structures               |
| Rose Mary Chacko, Nemkumar Banthia,<br>and Aftab A. Mufti   | 284-290  | Carbon-fiber-reinforced cement-based sensors   |
| Fabien Ravet, Lufan Zou, Xiaoyi Bao,<br>Togay Ozbakkaloglu, Murat Saatcioglu,<br>and Joe Zhou   | 291-297  | Distributed Brillouin sensor for structural health monitoring  |
| Brahim Benmokrane, Ehab El-Salakawy,<br>Amr El-Ragaby, and Sherif El-Gamal  | 298-310  | Performance evaluation of innovative concrete bridge deck slabs reinforced with fibre-reinforced-polymer bars  |
| Amir Fam and Britton Cole   | 311-322  | Tests on reinforced-concrete-filled, fiber-reinforced-polymer circular tubes of different shear spans          |
| Lixin Wu, Suong V. Hoa, and Heng Wang   | 323-330  | Improvement of flammability resistance of epoxy adhesives used in infrastructure applications                  |
| C. Klowak, A. Memon, and A.A. Mufti   | 331-339  | Static and fatigue investigation of innovative second-generation steel-free bridge decks                       |
| Ali Nour, Bruno Massicotte, Emre Yildiz,<br>and Viacheslav Koval  | 340-354  | Finite element modeling of concrete structures reinforced with internal and external fibre-reinforced polymers |
| A.A. Mufti, M. Onofrei, B. Benmokrane,<br>N. Banthia, M. Boulfiza, J.P. Newhook,<br>B. Bakht, G.S. Tadros, and P. Brett   | 355-366  | Field study of glass-fibre-reinforced polymer durability in concrete   |
