Y compris les articles envoyés à

**LA REVUE DU GÉNIE ET DE LA SCIENCE DE L'ENVIRONNEMENT**

National Research  
Council Canada

Conseil national  
de recherches Canada

**NRC-CNRC**

DISCUSSIONS

Anton J. Schleiss 677

G. Carosi and H. Chanson 678-679

**Structural engineering**

ARTICLES

Patrick Paultre and Denis Mitchell 565-579

S. El-Gamal, B. Benmokrane, E. El-Salakawy, P. Cousin, and A. Wiseman 617-627

CORRIGENDUM

Sébastien Mousseau, Patrick Paultre, and Jacky Mazars 676

DISCUSSIONS

S. Guravich and S. Skarborn 680

Yanglin Gong and Antony Gillies 681

**Transportation engineering**

ARTICLES

Dongjoo Park, Soyoun You, Jeonghyun Rho, Hanseon Cho, and Kangdae Lee 580-591

Jonathan D. Regehr, Jeannette Montufar, and Alan Clayton 607-616

**Papers submitted to the Journal of Environmental Engineering and Science**

ARTICLES

Nasr Bensalah, Mohamed F. Ahmadi, and Abdelatif Gadri 683-689

J. Mena, R. Gómez, J. Villaseñor, and A. de Lucas 690-700

Mohamed Abdallah, Leta Fernandes, Mostafa Warith, and Septa Rendra 701-708

DISCUSSIONS

Discussion of "Turbulence characteristics in skimming flows on stepped spillways"

Reply to discussion by G. Carosi and H. Chanson on "Turbulence characteristics in skimming flows on stepped spillways"

**Ingénierie des structures**

ARTICLES

Background to seismic design provisions in CSA A23.3-04 for high-strength concrete

Durability and structural performance of carbon fibre reinforced polymer - reinforced concrete parking garage slabs

RECTIFICATIF

Corrigendum: Seismic performance of a full-scale, reinforced high-performance concrete building. Part II: Analytical study

DISCUSSIONS

Discussion of "Double-angle shear connections with short outstanding legs"

Reply to discussion by S. Guravich and S. Skarborn on "Double-angle shear connections with short outstanding legs"

**Ingénierie des transports**

ARTICLES

Investigating optimal aggregation interval sizes of loop detector data for freeway travel-time estimation and prediction

Lessons learned about the impacts of size and weight regulations on the articulated truck fleet in the Canadian prairie region

**Articles soumis à la Revue du génie et de la science de l'environnement**

ARTICLES

Electrochemical treatment of wastewaters containing 4-nitrocathecol using boron-doped diamond anodes

Influence of polyphenols on low-loaded synthetic winery wastewater constructed wetland treatment with different plant species

A fuzzy logic model for biogas generation in bioreactor landfills

Revue canadienne de

# GÉNIE CIVIL

Volume 36, numéro 4, avril 2009

## Construction engineering

ARTICLE

**Kasun N. Hewage  
and Janaka Y. Ruwanpura** 659-671

## Engineering materials

ARTICLES

**David Conciatori, Eugen Brühwiler  
et André-Gilles Dumont** 628-638

**Dieter Stolle, Peijun Guo, and Ying Liu** 639-654

TECHNICAL NOTE

**Yi-Hua Cui and Jie Tao** 672-675

## Environmental engineering

ARTICLE

**Y.P. Li and G.H. Huang** 592-606

## Hydrotechnical engineering

ARTICLE

**Mahmoud Debabeche, Sonia Cherhabil,  
Amin Hafnaoui, and Bachir Achour** 655-658

## Ingénierie de la construction

ARTICLE

A novel solution for construction on-site communication – the information booth

## Matériaux d'ingénierie

ARTICLES

Actions microclimatique et environnementale des ouvrages d'art routiers

Resilient modulus properties of granular highway materials

NOTE TECHNIQUE

A new type of ductile composite reinforcing bar with high tensile elastic modulus for use in reinforced concrete structures

## Ingénierie de l'environnement

ARTICLE

Interval-parameter robust optimization for environmental management under uncertainty

## Hydraulique

ARTICLE

Hydraulic jump in a sloped triangular channel

*Continued on inside back cover / Suite au verso*

Front cover: *top left*, stepped spillway in operation at Wilde Lake in Columbia, Maryland, on 23 March 2005 after a 1-year storm event (photo courtesy of Christopher Goodell; see Chanson in the August 2007 issue, pp. 946-951); *top right*, aerial photo (taken July 1999) of the Annacis Island Wastewater Treatment Plant showing the completed secondary treatment facilities designed to treat wastewater from about one million people, with an average dry weather flow of 480 million litres per day (photo courtesy of Colin Jewall, when under assignment to the Greater Vancouver Regional District); *bottom left*, oil tank damaged due to fire during the Kocaeli, Turkey, earthquake, 17 August 1999 (photo courtesy of Dr. Kenneth Elwood, The University of British Columbia); *bottom right*, diagonally divided concrete cubes placed as an erosion protection at diversion tunnel No. 1 of the Seymareh Dam in Iran (see Emami and Schleiss in the January 2006 issue, pp. 81-92).

**Page couverture :** *gauche supérieure*, passage de la crue dans l'évacuateur de crues en marches d'escalier au Wilde Lake, à Columbia (Maryland), le 23 mars 2005 après un événement pluvio-hydrologique d'un an (photo courtoisie de Christopher Goodell; voir Chanson, numéro de août 2007, p. 946-951); *droite supérieure*, photo aérienne (juillet 1999) de la station d'épuration des eaux usées de l'île Annacis qui montre les installations d'épuration secondaire conçues pour traiter les eaux usées d'environ un million de personnes, avec un débit moyen par temps sec de 48 millions de litres par jour (photo courtoisie de Colin Jewall, lors de son affectation au district régional du Grand Vancouver); *gauche inférieure*, réservoir d'huile endommagé par le feu durant le séisme de Kocaeli en Turquie, 17 août 1999 (photo courtoisie de Kenneth Elwood, The University of British Columbia); *droite inférieure*, cubes de béton séparés en diagonale et utilisés comme mesure de protection contre l'érosion à la sortie de la galerie de dérivation n 1 du barrage de Seymareh en Iran (voir Emami and Schleiss, numéro de juin 2006, p. 81-92).
