Environmental engineering

ARTICLE

Nafeth Abdel Rahman M. Abdel Hadi 1193-1199

Hydrotechnical engineering

ARTICLE

Stefano Pagliara, Rajib Das, and Iacopo Carnacina 1285-1293

DISCUSSIONS

E.F.R. Bollaert 1347-1348

Anton J. Schleiss 1349-1350

S.M. Borghei and P. Zarnani 1351

Structural engineering

ARTICLES

K. Sennah, M. Saliba, M. Al-Hashimy, and J. Wahba 1221-1238

C. Ward, N. Rattanawangcharoen, and C. Gheorghiu 1251-1260

Ahmed Elrefai, Jeffrey S. West, and Khaled A. Soudki 1294-1307

R.G. Zhao, R.F. Huang, H.A. Khoo, and J.J.R. Cheng 1318-1330

ERRATUM

Osama Bedair 1352

Transportation engineering

ARTICLES

Angel Ibeas, Hernan Gonzalo Orden, Luigi Dell'Olio, and Jose Luis Moura 1200-1209

Soon-Jae Lee, Hakseo Kim, Chandra K. Akisetty, and Serji N. Amir Khanian 1308-1317

Ingénierie de l'environnement

ARTICLE

Stabilization of the phosphatic wastes using high calcium ash in Jordan

Hydraulique

ARTICLE

Flow resistance in large-scale roughness condition

DISCUSSIONS

Discussion of "Jet impact geometry and plunge pool dimensions effects on dynamic pressures at pool sidewalls"

Discussion of "Jet impact geometry and plunge pool dimensions effects on dynamic pressures at pool sidewalls"

Reply to discussions by E.F.R. Bollaert and A.J. Schleiss on "Jet impact geometry and plunge pool dimensions effects on dynamic pressures at pool sidewalls"

Ingénierie des structures

ARTICLES

Experimental evaluation of the compressive resistance of non-stress-relieved solid round steel columns

Impact resonance method for damage detection in carbon-fibre-reinforced polymer-strengthened reinforced concrete beams subjected to fatigue and thermal cycling

Effect of overloading on fatigue performance of reinforced concrete beams strengthened with externally post-tensioned carbon-fibre-reinforced polymer tendons

Experimental study on slotted rectangular and square hollow structural section (HSS) tension connections

ERRATUM

Erratum: Discussion of "Proposals for limit states torsional strength design of wide-flange steel members"

Ingénierie des transports

ARTICLES

Sectional mapping of local roads in Spain

Laboratory characterization of recycled crumb-rubber-modified asphalt mixture after extended aging

Volume 35, numéro 11, novembre 2008

Construction engineering

ARTICLE

Changwan Kim, Hyojoo Son, Hyoungkwan Kim, and Seung Heon Han 1331-1341

TECHNICAL NOTE

Rifat Sonmez and Furkan Uysal 1342-1346

Engineering materials

ARTICLES

Seung-Tae Lee, Dae-Wook Park, and Ki-Yong Ann 1210-1220

N. Bouzoubaâ, A. Bilodeau, B. Fournier, R.D. Hooton, R. Gagné, and M. Jolin 1261-1275

Burcu Akçay and Mehmet Ali Tasdemir 1276-1284

Engineering mechanics

ARTICLES

A.H. ElSheikh, S.E. Chidiac, and S. Smith 1239-1250

Ingénierie de la construction

ARTICLE

Applicability of flash laser distance and ranging to three-dimensional spatial information acquisition and modeling on a construction site

NOTE TECHNIQUE

Geographic information system-based visualization system for planning and monitoring of repetitive construction projects

Matériaux d'ingénierie

ARTICLES

Mitigating effect of chloride ions on sulfate attack of cement mortars with or without silica fume

Deicing salt scaling resistance of concrete incorporating supplementary cementing materials: laboratory and field test data

Internal curing of mortars by lightweight aggregates and its effects on hydration

Mécanique appliquée

ARTICLE

Assessment of two a posteriori error estimators for elasticity problems

Continued on inside back cover / Suite au verso

Front cover: *top left*, oblique aerial photograph of an unimpeded ice run on the Porcupine River, Yukon Territory, Canada, 15 May 1993 (see Jasek. 2003. *Canadian Journal of Civil Engineering*, 30(1): 113-127); *top right*, merging of Greater Vancouver EEME/2 model traffic volumes with digital orthophotos (C. Lim and B. Clement, Strategic Planning Department, Greater Vancouver Transportation Authority), EEME/2 is a registered trademark of Les Conseillers INRO Consultants, Inc. [digital orthophoto (1999) courtesy of McElhanney Consulting, Vancouver, B.C., Canada]; *bottom left*, damage from the 26 December 2004 tsunami, showing impact loads (over and above those caused by wave pressures) caused by floating debris, such as a police car on a building near downtown Banda Aceh, Indonesia (photo courtesy of Dr. Murat Saatcioglu, University of Ottawa); *bottom right*, lifting out the hydraulic excavators from 20 m below grade on the Confederation Plaza project, Vancouver, B.C., Canada (photo courtesy of Dr. Alan Russell, The University of British Columbia).

Page couverture : *gauche supérieure*, dérive des glaces libres sur la rivière Porcupine, Territoire du Yukon, Canada, le 15 mai 1993, en photographie aérienne oblique (voir Jasek. 2003. *Revue canadienne de génie civil*, 30(1) : 113-127); *droite supérieure*, fusionnement des modèles de volumes de circulation EEME/2 du Grand Vancouver à l'aide d'orthophotos digitales (C. Lim et B. Clement, Strategic Planning Department, Greater Vancouver Transportation Authority), EEME/2 est une marque déposée de Les Conseillers INRO Consultants, Inc. [orthophoto digitale (1999) courtoisie de McElhanney Consulting, Vancouver, C.-B., Canada]; *gauche inférieure*, lors du tsunami du 26 décembre 2004, dommages dus aux charges dynamiques causées par des débris flottants, tel cette auto-patrouille près du centre-ville de Banda Aceh, Indonésie, en plus des dommages dus à la pression des vagues (photo courtoisie de Murat Saatcioglu, Université d'Ottawa); *droite inférieure*, sortie d'excavatrices hydrauliques situées à 20 m sous le niveau du sol, projet de la Confederation Plaza, Vancouver, C.-B., Canada (photo offerte par Alan Russell, The University of British Columbia).
