feature articles

- 23 **AVX [Z] Chip and Related Family of Cofired RC Components**
Corporate Technical Achievement Award Winner: AVX Corp.
Andrew P. Ritter
- 24 **Base-Metal Electrode Capacitors**
Experimental observation and continuing R&D throughout the electronic ceramics industry have resulted in the development of a new class of electroceramic materials that has resulted in a decrease in manufacturing costs.
Yukio Sakabe and Tom Reynolds
- 27 **Self-Constrained LTCC Tape**
Free-sintered self-constrained LTCC tapes have shrinkage of less than one-half of conventional, sacrificial-layer constrained tapes, which translates to a significant benefit for large-format LTCC processes.
Frans Lautzenhiser and Edmar Amaya
- 33 **Gel Tape Casting Ceramic Sheets**
Alumina green tapes having high density, high fracture strength and flat surfaces were prepared using an aqueous gel-tape-casting process.
Zhipeng Xie, Chunlei Ma, Yong Huang and Junhui Xiang
- 38 **Stain Resistance of Porcelain Stoneware Tile**
Reliable and repeatable color measurements can be conducted to quantify the amount of stain on the working surface of porcelain stoneware tile.
Leonardo Esposito, Antonella Tucci, Eugenia Rastelli, Carlo Palmonari and Serlio Selli
- 46 **MgO Refractories for Glass Tank Regenerators**
Reflected-light and cathodoluminescence optical microscopy and scanning electron microscopy have been used to explain the creep behavior of two commercial MgO refractories.
M. Velez, M. Karakus, W.L. Headrick, R.E. Moore and S.L. Cabral da Silva
- 51 **Wet-Shotcrete for Refractory Castables**
A systematic investigation has been conducted involving parameters that control the wet-shotcrete technique for refractory castables.
R.G. Pileggi, Y.A. Marques, D. Vasques Filho, A.R. Studart and V.C. Pandolfelli
- 57 **Fused-Alumina Crowns**
Practical experience learned from successful installation, start-up and operation of fused-alumina oxy-fuel furnace crowns under a wide range of glassmelting conditions is reported.
A. Gupta and D. Clendenen
- 62 **The Stamps of Approval**
Postage stamps commemorate many materials and events, including those related to refractory materials and their applications.
