Alan Bundy (Ed.)

Artificial Intelligence Techniques

A Comprehensive Catalogue

Fourth, Revised Edition

Springer

Logical Table of Contents

Automatic Programming

Deductive Program Synthesis . . 63
Delayed Evaluation 66
Lazy Evaluation 143
Partial Evaluation 193
Program Transformation 214
Programming Cliche 215
Rewrite Rules 236

Computer Architecture

Actors 6
Behaviour Based Systems 20
Blackboard 23
Connectionism 48
Dynamical Systems 81
Production Rule System 213
Reflection 228

Data Models

Associative Database 11
Functional Data Model 99
Self-organising Feature Maps . . 240

Expert Systems

Certainty Factors 37
Expert System Shell 87
Protocol Analysis 220

Game Theory

Alpha/Beta Pruning 8
AND/OR Graphs 10
Caching 29
Decision Theory 62
DSSS* 80
Game Theoretic Semantics . . . 105
Minimax 164
SSS* 259

Inference and Reasoning

Abduction 3
Abstraction 4
Analogical Problem Solving . . . 9
AND/OR Graphs 10
Auto-epistemic Logic 14
Bayesian Inference 17
Bayesian Networks 18
Case-Based Reasoning 32
Certainty Factors 37
Circumscription 39
Constraint Logic Programming . 50
Constraint Satisfaction and
Propagation 52
Decision Theory 62
Default Logic 64
Demon 67
Dempster-Shafer Theory 68
Epsilon Semantics 86
Fuzzy Logic 102
Incidence Calculus 128
Inferno 130
Interval Calculus 133
Least General Generalisation . . 145
Logics of Knowledge and Belief . 154
Marker-passing 156
Maximum Cardinality Search . . 158
Meta-level Inference 161
Modal Logic 165
Natural Deduction 176
Non-monotonic Reasoning 182

Pattern Directed Languages . . . 195
Pattern Matching 197
Possibilistic Logic 204
Production Rule System 213
Prolog 216
Proof Editors 217
Qualitative Reasoning 223
Recursion 225
Reflection 228
Rewrite Rules 236
Sequent Calculus 248
Temporal Logic 275
Theorem Proving 276
Truth Maintenance System . . . 283
Typed Languages 284
Variable-valued Logic 290

Knowledge Representation

AND/OR Graphs 10
Associative Database 11
Auto-epistemic Logic 14
Bayesian Networks 18
Certainty Factors 37
Clausal Form 41
Conceptual Graphs 46
Constraint Networks 51
Default Logic 64
Discrimination Net 76
Frame 98
Fuzzy Logic 102
Fuzzy Set Theory 103
Game Theoretic Semantics . . . 105
Incidence Calculus 128
Interval Calculus 133
IS-A Hierarchy 136
Lambda Calculus 141
Logics of Knowledge and Belief . 154
Markov Fields 157
Non-monotonic Reasoning 182
Partitioned Semantic Net 194
Possibilistic Logic 204
Predicate Calculus 209
Procedural Attachment 212
Property Lists 219
Recursion 225
Reflection 228
Script 239
Self-organising Feature Maps . . 240
Semantic Networks 244
Situation Calculus 253
Skolemisation 255
Temporal Logic 275
Truth Maintenance System . . . 283
Typed Languages 284
Universal Graph Representation 288
Variable-valued Logic 290

Learning

Case-Based Reasoning 32
Classification 40
Conceptual Clustering 44
Contradiction Backtracing 57
Discrimination Learning 75
Discrimination Net 76
Explanation-Based Learning . . . 88
Focussing 92
Genetic Algorithm 104
Inductive Logic Programming . . 129
Inverse Resolution 135
Learning from Solution Paths . . 144
Macro Operators 155
Postulating Intrinsic Properties . 205
Precondition Analysis 206
Protocol Analysis 220
Supervised Learning 250
Temporal Difference Methods . . 274
Unsupervised Learning 289

Logic Programming

Clausal Form 41
Constraint Logic Programming . 50
Inductive Logic Programming . . 129
Least General Generalisation . . 145
Logic Programming 153
Modal Logic 165
Negation as Failure 178
Prolog 216
Resolution 234

Skolemisation 255

Natural Language

Augmented Transition Network . 13
Bottom-up Parsing 24
Breadth-first Parsing 27
Cascaded Augmented Transition Network 31
Case Frames 33
Case Grammar 34
Categorial Grammar 35
Chart Parsing 38
Conceptual Dependency 45
Conceptual Graphs 46
Constituent Likelihood Grammar 49
Context-free Grammar 54
Context-sensitive Grammar . . . 55
Definite Clause Grammar 65
Dependency Grammar 72
Depth-first Parsing 70
Deterministic Parsing 73
Discourse Representation Theory 77
Discrimination Net 76
Distributional Analysis 79
Earley's Algorithm 84
Feature Structures 91
Functional Unification Grammar 100
Game Theoretic Semantics . . . 105
Generalised Phrase Structure Grammar 107
Graph Matching 112
Graph Unification 113
Head-driven Phrase Structure Grammar 114
Heterarchy 115
Interlingua 132
Island Parsing 137
Lexical Access 146
Logic Grammar 152
Meta-rules 162
Montague Semantics 170
Partitioned Semantic Net 194
Plan Recognition 201
Predictive Parsing 207
Preference Semantics 210
Relational Database Query Formulation 232
Rhetorical Structure Theory . . . 235
Script 239
Semantic Grammar 242
Semantic Head-Driven Generation 243
Semantic Primitives 245
Semantic Syntax 246
Spelling Correction 257
Symbolic Marker-passing 271
Template Matching 273
Top-down Parsing 279
Transfer 280
Tree-Adjoining Grammars 281
Unification Grammars 287

Neural Networks

Associative Memories 12
Competitive Networks 42
Connectionism 48
Hopfield Nets 123
Multi-layer Perceptrons 173
Perceptrons 198
Self-organising Feature Maps . . 240
Time-delay Neural Networks . . 277
Willshaw Networks 296

Pattern Recognition and Image Processing

Binary and Grey Scale Moments 22
Boundary Detection 25
Cellular Arrays 36
Contrast Sensitivity Function . . 58
Convolution 59
Difference of Gaussians 74
Edge Detection 85
Epsilon Semantics 86
Fast Pattern Recognition Techniques 90
Fourier Transform 97
Golay Neighbourhoods 110
High-emphasis Filtering 121
Hough Technique 124

Image Data Structures 125
Image Segmentation 127
Laplacian 142
Local Grey-level Operations . . . 151
Modulation Transfer Function . . 169
Noise Reduction 180
Perceptrons 198
Propagation in Cellular Arrays . 218
Pyramids 221
Quad Trees 222
Region Finding 230
Self-organising Feature Maps . . 240
Skeletonisation 254
Surface Segmentation 270
Viewpoint Determination 292

Planning

Abstraction 4
Distributed Problem Solving . . 78
Goal Structure 109
Hierarchical Planning 119
Interactions Between Sub-solutions 131
Library-based Planning 147
Macro Operators 155
Meta-action Oriented Planning . 160
Multi-actor System 172
Non-linear Planning 181
Operator Tables 188
Operators 187
Optimistic Plan Execution . . . 191
Plan Recognition 201
Plan Structure 202
Principle of Least Commitment . 208
Situation Calculus 253
Table of Multiple Effects 272
Temporal Logic 275
Time Logic Based Planning . . . 278
Typed Preconditions 285

Problem Solving

Abduction 3
Abstraction 4
Agenda Based Systems 7
Analogical Problem Solving . . . 9
AND/OR Graphs 10
Blackboard 23
Caching 29
Case-Based Reasoning 32
Constraint Satisfaction and Propagation 52
Data-directed Control 61
Decision Theory 62
Distributed Problem Solving . . 78
Generate and Test 108
Maximum Cardinality Search . . 158
Means/ends Analysis 159
Naive Physics 175
One-Then-Best Backtracking . . 186
Opportunistic Search 189
Pattern Matching 197
Production Rule System 213
Reflection 228
Stochastic Simulation 263
Structured Induction 264
Subgoaling 267
Theorem Proving 276

Programming Languages

Actors 6
Associative Database 11
FORTRAN 95
Functional Programming Language 101
Lisp 150
Logic Programming 153
Object-oriented Programming . . 185
Pattern Directed Languages . . . 195
Pattern Directed Retrieval/ Invocation 196
POPLOG 203
Production Rule System 213
Prolog 216
Property Lists 219
Reflection 228
Standard ML 258
Typed Languages 284

Robotics

Active Vision 5
Behaviour Based Systems 20
Kinematics 140
Model-based Systems 166
Navigation 177
Numerically-controlled Machine Tools 183
Robot Dynamics 237
Sensory Feedback and Compliance 247

Search

A* Algorithm 2
Alpha/Beta Pruning 8
AND/OR Graphs 10
B* Algorithm 15
Backwards Search 16
Beam Search 19
Bidirectional Search 21
Branch-and-bound Algorithms . 26
Breadth-first Search 28
Caching 29
Complexity Measures 43
Dependency Directed Backtracking 69
Depth-first Search 71
Discrimination Net 76
DSSS* 80
Forward Search 96
Generate and Test 108
Genetic Algorithm 104
Heuristic Search 116
Hill Climbing 122
Iterative Deepening 138
Minimal Window Search 163
Minimax 164
SSS* 259
State Space 260

Speech

Dynamic Programming 82
Dynamic Time Warping 83
Formant Synthesis 94
Formant 93
Hidden Markov Models 117
Lexical Access 146
Linear Predictive Coding 149
Morphographemics 171
Multi-pulse LPC 174
Pitch Extraction 200
Self-organising Feature Maps . . 240
Vocoder Representation 294
Vowel Quadrilateral 295

Theorem Proving

AND/OR Graphs 10
Clausal Form 41
Connection Calculus 47
Delayed Evaluation 66
Lazy Evaluation 143
Least General Generalisation . . 145
Meta-level Inference 161
Neighbourhood Parallelism . . . 179
Paramodulation 192
Prolog 216
Proof Editors 217
Recursion Analysis 226
Recursion 225
Reflection 228
Refutation Proof 229
Resolution 234
Rewrite Rules 236
Semantic Checking 241
Skolemisation 255
Theorem Proving 276
Unification 286

Vision

2 $\frac{1}{2}$-D Sketch 1
Active Vision 5
Camera Calibration 30
Constructive Solid Geometry . . 53
Contour Generator 56
Convolution 59
Curvature Maps 60
Edge Detection 85
Extended Gaussian Image 89
Generalised Cylinders 106

Golay Neighbourhoods 110
Gradient Space 111
Graph Matching 112
Heterarchy 115
Hierarchical Models 118
Hierarchical Synthesis 120
Image Data Structures 125
Image Flow Estimation 126
Image Segmentation 127
Intrinsic Images 134
Junction Dictionary 139
Line Labelling 148
Local Grey-level Operations . . . 151
Model Matching 168
Model-based Vision 167
Object-centred Co-ordinates . . . 184
Optical Flow 190
Photometric Stereo 199
Primal Sketch 211
Range Finding 224
Reflectance Map 227
Regularisation 231
Relaxation Labelling 233
Scale-Space Representation . . . 238
Shape from Shading 249
Shape from Texture 251
Simulated Annealing 252
Spatial Frequency Channels . . . 256
Stereopsis 261
Stochastic Geometry 262
Structure from Motion 266
Structured Light 265
Superquadrics 268
Surface Reconstruction 269
Trinocular Stereo 282
Viewer-centred Co-ordinates . . . 291
Viewpoint Determination 292
Viewsphere Representation . . . 293
