R. Herken (eds.)

mental ray Handbooks Vol.2

# PROGRAMMING MENTAL RAY®

 SpringerWienNewYork

# Table of Contents

<b>Series Editor's Foreword</b>	1
<b>Introduction</b>	3
Organization of this Book	3
Introduction to mental ray	4
WWW Resources	6
Acknowledgements	7
<b>1 Functionality</b>	9
1.1 Parallelism	9
1.2 Free-Form Surfaces	10
1.3 Edge Merging and Adjacency Detection	12
1.4 Special Points and Curves	12
1.5 Atmospheres and Volumes	13
1.6 Materials	13
1.7 Light Sources	15
1.8 Area Light Sources	16
1.9 Shadow Maps	16
1.10 Texture, Bump, Displacement, and Reflection Mapping	16
1.11 Texture Filtering	20
1.11.1 Pyramid Filtering	21
1.11.2 Elliptical Projection Filter Lookup	22
1.12 User-Defined Shaders	23
1.13 The Camera	24
1.14 Lens Effects	24
1.15 Depth of Field	24
1.16 Animation	25
1.17 Motion Blur	25
1.18 Sampling Algorithms	25
1.19 OpenGL Acceleration	26
1.20 Color Calculations	26
1.21 Output Shaders	26
1.22 Contours	29
1.23 Memory-mapped Textures	29
1.24 Caustics	30
1.24.1 Light Sources	31
1.24.2 Objects	33

1.24.3	Material Shaders and Photon Shaders for Caustics .....	34
1.24.3.1	Physically Plausible Material Shaders .....	34
1.24.4	Shader Functions .....	35
1.24.5	Fine-tuning Caustics .....	35
1.25	Global Illumination <sup>2.1</sup> .....	36
1.25.1	Light Sources .....	36
1.25.2	Objects .....	37
1.25.3	Fine-tuning Global Illumination .....	37
1.26	Final Gathering <sup>2.1</sup> .....	38
1.27	Volume Caustics .....	38
1.28	Global Illumination in Participating Media <sup>2.1</sup> .....	39
1.29	Diagnostic modes <sup>2.1</sup> .....	40
<b>2</b>	<b>Scene Description Language</b> .....	<b>41</b>
2.1	Shader Declarations .....	42
2.1.1	Parameter Types .....	43
2.1.2	Shader Apply Flags .....	45
2.1.3	Declaration Options .....	45
2.2	Shader Definitions .....	47
2.3	Shader Lists .....	49
2.4	Shader Graphs .....	50
2.5	Phenomena .....	51
2.5.1	Phenomenon Interface Parameters .....	52
2.5.2	Phenomenon Roots .....	54
2.6	Commands .....	55
2.7	Scene Entities .....	59
2.7.1	Options .....	60
2.7.1.1	Sampling Quality .....	61
2.7.1.2	Tessellation Quality .....	63
2.7.1.3	Motion Blur .....	64
2.7.1.4	Trace Depth .....	64
2.7.1.5	Shadows .....	64
2.7.1.6	Rendering Algorithms .....	66
2.7.1.7	Feature Disabling .....	68
2.7.1.8	Caustics .....	68
2.7.1.9	Global illumination <sup>2.1</sup> .....	69
2.7.1.10	Frame Buffer Control .....	71
2.7.1.11	Scene Geometry .....	72
2.7.1.12	Contours .....	72
2.7.1.13	Diagnostic Modes <sup>2.1</sup> .....	73

2.7.1.14	Miscellaneous .....	73
2.7.2	Cameras .....	74
2.7.3	Textures .....	78
2.7.4	Materials .....	80
2.7.5	Lights .....	83
2.7.6	Objects .....	86
2.7.7	Polygonal Geometry .....	94
2.7.8	Free-Form Surface Geometry .....	96
2.7.8.1	Bases .....	97
2.7.8.2	Surfaces .....	100
2.7.8.3	Surface Derivatives .....	103
2.7.8.4	Texture Surfaces .....	103
2.7.8.5	Curves .....	106
2.7.8.6	Trimming, Hole, and Special Curves; Special Points .....	107
2.7.8.7	Space Curve Geometry .....	109
2.7.8.8	Approximations .....	110
2.7.8.9	Connections .....	114
2.7.8.10	Example .....	115
2.7.9	Instances .....	118
2.7.10	Instance Groups .....	121
2.8	Contours .....	122
2.8.1	Where to Place Contours .....	122
2.8.2	Color and Width of Contours .....	123
2.8.3	Contour Output .....	125
2.8.4	Faster Contours .....	126
2.9	Scene Example .....	126
<b>3</b>	<b>Using and Writing Shaders</b> .....	<b>129</b>
3.1	Dynamic Linking of Shaders .....	130
3.2	Coordinate Systems .....	133
3.3	Shader Type Overview .....	135
3.4	State Variables .....	141
3.4.1	Frame .....	143
3.4.2	Image Samples .....	148
3.4.3	Rays .....	149
3.4.4	Intersection .....	152
3.4.5	Textures, Motion, Derivatives .....	155
3.4.6	User Fields .....	156
3.4.7	State Variables by Shader Type .....	157
3.5	Shader Parameter Declarations .....	159

3.6	Parameter Assignments and <code>mi_eval</code> .....	165
3.7	Shader Versioning .....	168
3.8	Material Shaders .....	170
3.9	Texture Shaders .....	174
3.10	Volume Shaders .....	177
3.11	Environment Shaders .....	180
3.12	Light Shaders .....	182
3.13	Shadow Shaders .....	184
3.14	Photon Shaders .....	186
3.15	Photon Emitter Shaders .....	192
3.16	Lens Shaders .....	195
3.17	Output Shaders .....	196
3.17.1	Parallel Output Shaders .....	198
3.18	Displacement Shaders .....	200
3.19	Geometry Shaders .....	201
3.20	Contours .....	202
3.20.1	Contour Computation .....	202
3.20.2	Contour Store Function .....	203
3.20.3	Contour Contrast Function .....	204
3.20.4	Contour Shaders .....	205
3.20.5	Contour Output Shaders .....	207
3.21	Functions for Shaders .....	208
3.21.1	DB Functions .....	218
3.21.2	RC Functions .....	220
3.21.3	Sampling with <code>mi_sample</code> .....	224
3.21.4	RC Photon Functions .....	226
3.21.5	RC Direction Functions .....	231
3.21.6	IMG Functions .....	234
3.21.7	Math Functions .....	237
3.21.8	Noise Functions .....	247
3.21.9	Auxiliary Functions .....	249
3.21.10	Obsolete Auxiliary Functions .....	263
3.21.11	Contour Functions .....	264
3.21.12	Memory Allocation .....	265
3.21.13	Thread Parallelism and Locks .....	266
3.21.14	Messages and Errors .....	269
3.21.15	Callable Functions by Shader Type .....	271
3.22	Initialization and Cleanup .....	274
3.23	Automatic Source Generation with <code>mkmishader</code> .....	276

---

3.24	Shaders and Trace Functions .....	279
3.25	Example Scene with Custom Shader .....	280
<b>4</b>	<b>Geometry Shaders</b> .....	<b>285</b>
4.1	Introduction .....	285
4.2	Examples .....	287
4.3	Geometry Shader API .....	293
4.3.1	Symbol Tables .....	293
4.3.2	Dynamic Lists .....	296
4.3.3	Incremental Changes .....	298
4.3.4	Options, Cameras, and Outputs .....	298
4.3.5	Lights, Materials, Textures .....	302
4.3.6	User Data .....	304
4.3.7	Instances and Instance Groups .....	305
4.3.8	Geometric Objects .....	307
4.3.8.1	Objects .....	307
4.3.8.2	Bases .....	308
4.3.8.3	Polygonal Geometry .....	309
4.3.8.4	Free-Form Surface Geometry .....	312
4.3.8.5	Curves .....	315
4.3.8.6	Space Curves <sup>2.1</sup> .....	316
4.3.8.7	Subdivision Surfaces <sup>2.1</sup> .....	317
4.3.9	Function Declarations .....	320
4.3.10	Function Definitions .....	322
4.3.11	Phenomenon Definitions .....	326
4.3.12	Verbatim C Sources .....	326
4.3.13	Scopes .....	327
4.3.14	Miscellaneous .....	328
4.4	Geometry Shader Data Structures .....	329
4.4.1	Instances .....	330
4.4.2	Groups .....	333
4.4.3	Cameras .....	334
4.4.4	Lights .....	336
4.4.5	Functions .....	340
4.4.6	User Data .....	343
4.4.7	Function Declarations .....	344
4.4.8	Boxes .....	348
4.4.9	Objects .....	353
4.4.10	Approximations .....	360
4.4.11	Polygon Lists .....	363

4.4.12	Polygon Indices .....	363
4.4.13	Polygon Vertices .....	364
4.4.14	Polygon Vectors .....	364
4.4.15	Surfaces: Face List .....	364
4.4.16	Surfaces: Surface List .....	365
4.4.17	Surfaces: Curve Segment List .....	367
4.4.18	Surfaces: Scalar Lists .....	368
4.4.19	Surfaces: Curve Point Lists .....	369
4.4.20	Surfaces: Basis Lists .....	369
4.4.21	Surfaces: Algebraic Lists .....	370
4.4.22	Space Curves <sup>2.1</sup> .....	371
4.4.23	Books and Pages .....	371
4.4.24	Subdivision Surfaces .....	375
4.4.25	Materials .....	375
4.4.26	Rendering Options .....	376
4.4.27	Images .....	383
4.4.28	Strings .....	385
4.4.29	Tag Lists .....	385
<b>5</b>	<b>Usage and Command Line Options</b> .....	<b>387</b>
5.1	Command Line Options .....	387
5.2	Startup File .....	403
5.3	Stack Size .....	404
<b>6</b>	<b>Upgrading from mental ray 1.9 to 2.x</b> .....	<b>405</b>
6.1	Rendering Algorithms .....	405
6.2	Scene Description Language .....	406
6.3	Shader Writing .....	406
<b>A</b>	<b>Scene File Grammar</b> .....	<b>409</b>
	<b>Index</b> .....	<b>457</b>
