PREFACE	ix
ACKNOWLEDGMENTS	xi
ABOUT THIS BOOK	xiii
1 KNOWLEDGE ACQUISITION FOR EXPERT SYSTEMS	1
Expert Systems: An Overview	2
Examining the Terminology	
Sampling Expert Systems	
Knowledge Acquisition in Expert System Development	8
Conceptualizing Knowledge Acquisition	
Knowledge Acquisition Modes and Approaches	
Knowledge Acquisition Process	
Identifying and Tapping Knowledge	13
The Nature of Knowledge	
The Relationship Between Knowledge and Expertise	
Impediments to Effective Knowledge Acquisition	18
Lack of Management and Organization	
Incompletely Trained Knowledge Engineers	
Translating Knowledge from Session to Code	
Knowledge Base Flexibility	
Handling Conflicting or Uncertain Information	
Verification and Validation Procedures	
2 A SYSTEMS ENGINEERING PERSPECTIVE ON THE KNOWLEDGE ACQUISITION PROCESS	29
The Process of Solving Conventional Problems	32
Software Engineering for Conventional Problem-Solving	
Knowledge Acquisition in Conventional Problem-Solving	
Knowledge Acquisition: Principles and Guidelines	iii

The Process of Solving Knowledge-Intensive Problems	40
Characteristics of Knowledge-Intensive Problems	
Software Engineering for Knowledge-Intensive Problems	
Documenting the Design Process	
Knowledge Acquisition for Knowledge-Intensive Problems	51
A Systems-Oriented Knowledge Acquisition Methodology	
An Adaptive Waterfall Model for Knowledge Acquisition	
3 ORGANIZING A KNOWLEDGE ACQUISITION PROGRAM	59
Getting Started	61
Domain Familiarization	
Knowledge Acquisition Facilities and Equipment	
Developing Knowledge Acquisition Procedures	70
Knowledge Acquisition Procedures	
Record-Keeping Procedures	
Review Procedures	
Orienting the Participants	86
Knowledge-Engineer Orientation and Training	
Domain-Expert Orientation and Training	
The Anatomy of a Session: A Case Study	89
Planning the Knowledge Acquisition Session	
Conducting the Knowledge Acquisition Session	
Reviewing the Session	
Session Follow-up	
4 WORKING EFFECTIVELY WITH DOMAIN EXPERTS	95
Building the Domain-Expert Pool	97
Factors Affecting the Selection Process	
Selecting the Initial Pool of Experts	
Selecting Specific Experts for Sessions	
Developing and Maintaining Rapport	106
Managing the Environment	
Managing the Session	
Common Problems	115
Analyzing Problem Behaviors	
Types of Problems	
Techniques for Difficult Situations	119
Reflective Listening	
Documenting Problems	

5	CONCEPTUALIZING THE DOMAIN	125
	The Role of Domain Conceptualization	127
	Initial Understanding	
	Estimating Knowledge Acquisition Needs	
	Knowledge-Base Design	
	The Challenge of Domain Conceptualization	
	Techniques for Evoking Domain Conceptualization	129
	Evoking Concept Identification	
	Techniques for Organizing and Analyzing Domain Conceptualizations	135
	Defining Concepts	
	Using Maps and Models	
	Identifying Relationships	
	Moving On	
6	STRUCTURING THE KNOWLEDGE ACQUISITION PROCESS	155
	Extending Systems Analysis to Expert System Development	157
	Knowledge Engineer as Systems Analyst	
	The Role of Analysis in Knowledge Acquisition	162
	Analysis Procedures for Knowledge-Base Development	
	Using Analysis Tools and Techniques	166
	Laying the Groundwork	
	Structuring the Domain	
	Completing the Analysis	178
	Refining the Initial Task Analysis	
	Planning Knowledge Acquisition Sessions	
7	INTERVIEWING FOR CONTENT AND CLARIFICATION	183
	The Interviewing Process	185
	A Model for Knowledge Acquisition Interviews	
	Interviewing for Knowledge Acquisition	
	Planning the Interview	
	Beginning the Interview	
	The Body of the Interview	
	Closing the Interview	
	Special Interview Skills and Techniques	196
	Using Questions Effectively	
	Levels of Questions	
	Sequencing Questions	
	Important Questioning Issues	
	After the Interview is Over	205
	Transcribing Session Information	
	Deciding What Is "Important"	
	Moving Towards Representation	

8 TRACING THE DECISION MAKING PROCESS TO ACQUIRE KNOWLEDGE	213
The Role of Decision Making in Knowledge Acquisition	215
Tracing the Decision Process	
The Usefulness of Verbal Reports	
Techniques to Compile Verbal Reports	
Managing Process Tracing in Knowledge Acquisition Sessions	221
Establishing a Methodology	
Sampling the Methods	
Extracting Knowledge from Process Tracing Sessions	230
Translating Sessions to Protocols	
Selecting the Analysis Framework	
Determining Decision Rules	
Refining the Analysis	
9 ACQUIRING KNOWLEDGE FROM MULTIPLE EXPERTS	241
Characteristics of Problems That Require Multiple Experts	243
Inconsistency Between Problem Domain and Available Expertise	
Subdivision of Knowledge Among Multiple Specialists	
Alternate Solution Sets	
Using Multiple Experts	245
Considerations for Using Multiple Experts	
Multiple Experts--Pros and Cons	
Approaches to the Use of Multiple Experts	251
Individual Consultation	
Group Consultation	
Techniques for Working With Multiple-Expert Teams	255
Brainstorming	
Consensus Decision Making	
Nominal Group Technique	
Computer-Facilitated Sessions	
Managing and Accommodating Multiple Knowledge Sources	264
Documentation	
Conflict Resolution	

10 AIDS AND TOOLS FOR KNOWLEDGE ACQUISITION	273
The Lure of Automation	275
Weaknesses of Manual Approaches	
Domain Expert as Knowledge Engineer	
Automating Knowledge Acquisition--A Continuum	281
Using Simulations for Knowledge Acquisition	
Using Prototypes of the System for Knowledge Acquisition	
Using Computer-Based Knowledge Acquisition Tools	
Types of Knowledge Acquisition Programs	284
Expert System Shells as Knowledge Acquisition Tools	
Tools Designed for Knowledge Acquisition	
Knowledge Acquisition Workbenches and Environments	
Problems to be Resolved	294
11 EVALUATING KNOWLEDGE BASE DEVELOPMENT EFFORTS	299
The Issue of Knowledge-Based System Evaluation	301
Verification and Validation	
Difficulties of V&V in Knowledge-Based Systems	
Attaining Verification of Knowledge-Based Systems	
Attaining Validation of Knowledge-Based Systems	
Evaluating Knowledge Acquisition Sessions	313
The Need for Ongoing Evaluation	
A Tool for Appraising Knowledge Acquisition Session Effectiveness	
APPENDIX	327
Appendix A: Human Knowledge, Memory, and Problem Solving	327
Appendix B: Disadvantages of Verbal Reporting	335
GLOSSARY	339
REFERENCES	351
INDEX	371
Knowledge Acquisition: Principles and Guidelines	vii
