Preface xiii

PART I BACKGROUND AND BASICS 1

Chapter 1 The Soil and Rock of Planet Earth: Geologic Overview 3	
1.1 Rock: The Source of Soils 4	
1.2 Soil Categories: Residual, Transported 8	
Residual Soils 8	
Transported Soils 9	
1.3 Plate Tectonics 23	
1.4 Earthquakes 31	
1.5 Effect on Design and Construction 54	
Problems 55	
Chapter 2 Soil Composition: Terminology and Definitions 57	
2.1 Soil Composition: Analytical Representation Weight-Volume, Mass-Volume Relationship 58	
2.2 Basic Terms Relating to Soil Composition and Condition	60
2.3 Submerged Soil 68	
Problems 70	
Chapter 3 Soil Types and Soil Structure 72	
3.1 Major Soil Types 72	
3.2 Particle Shapes and Sizes 74	
3.3 Clay and Water 76	
3.4 Soil Structure 80	
3.5 Some Special Soil Categories 84	
Collapsible Soils 85	
Liquelaction 86	

Expansive Clays	86	
Dispersive Clays	88	
Laterites 90		
Problems 91		
	ex Properties and G sification Systems	Classification Tests, 92

PART II ENGINEERING PROPERTIES AND BEHAVIOR OF SOIL DEPOSITS 187

Chapter 6 Movement of Water through Soil: Basic Hydrogeology, Subsurface Flow, Permeability, Capillarity 189

6.1 Basic Hydrogeology 190 Subsurface Flow, Basic Facts 190

6.2 Permeability (Hydraulic Conductivity) 194

Factors Affecting Flow 197
Darcy's Law for Flow 199

Darcy's Law for Flow 199

Laminar and Turbulent Flow 201

Effect of Soil Type 201

Empirical Relationships 202

Permeability Texts 203

Laboratory Permeability Tests 204

Field Permeability Tests 207

6.3 Capillarity 208

Water in Capillary Tubes 209

Capillary Rise in Soil 212

Time Rate of Capillary Rise 215

Suspended Capillaries 215

Elimination of Capillary Water in Soil 215

Effects of Surface Tension 216

Problems 216

Chapter 7 Movement of Water through Soil: Practical Effects: Seepage, Drainage, Frost Heave, Contamination 220

7.1 Flow Nets and Seepage 220

Flow of Subsurface Water 220

The Need for Flow Nets and Flow Net Theory 221

Boundaries for the Flow Net 220

Flow Nets for Nonisotropic Soils 230

Uplift Forces 231

Other Seepage Forces 231

Practical Considerations 234

Quicksand 234

7.2 Drainage 234

Conditions Requiring Drainage 236

Dewatering Shallow Excavations 236

Dewatering Intermediate Depths 236

Deep Drainage 241

Consolidation Drainage 241

Summary: Techniques for Subsurface Drainage 241

Drainage after Construction 242

Foundation Drains 242

Blanket Drains 243

Interceptor Drains 243

Flow through a Structure 245

Filter Design 245

Effects of Drainage 257 Soil Percolation Rate 257 7.3 Frost Heave in Soils 258 Permafrost 263 7.4 Soil and Groundwater Contamination 265 Soil Gas 271 Use of Geosynthetics to Prevent Ground Contamination 276 Problems 278 Chapter 8 Combined Stresses in Soil Masses: Stress at a Point and Mohr's Circle 281 8.1 Stress at a Point: Analytical Development 281 8.2 Mohr's Circle 285 Problems 292 Chapter 9 Subsurface Stresses 295 9.1 Stresses Caused by the Soil Mass 295 Vertical Stresses 295 Effect of Groundwater Table 296 Horizontal (Lateral) Stresses 297 9.2 Stress within the Soil Mass Resulting from Vertical Surface Loading Uniform Homogeneous Soils 300 Boussinesy Stress Distribution 300 Westergaard Stress Distribution 300 Westergaard Stress Distribution 301 Computational Aids 302 Application for Foundation Loading 303 Sixty-Degree Approximation 306 Layered Soils Having Different Properties 307 Effect of Changing the Surface Grade 310 Problems 312 Chapter 10 Settlement: Soil Compression, Volume Distortion, Consolidation 316 10.1 Basic Considerations 316 10.2 Settlement of Foundations on Sand 320 Schmertmann Method 320 Approximations for Estimating Settlement of Foundation on Sand 325 Volume Distortion Settlement for Clays 327 Primary Compression Settlement for Clays 327 Primary Compression Settlement for Clays 331		Drainage, Filtration, and Separation with Geosynthetics (Synthetic Fabrics) Land Drainage 253	247
Soil Percolation Rate 257 7.3 Frost Heave in Soils 258 Permafrost 263 7.4 Soil and Groundwater Contamination 265 Soil Gas 271 Use of Geosynthetics to Prevent Ground Contamination 276 Problems 278 Chapter 8 Combined Stresses in Soil Masses: Stress at a Point and Mohr's Circle 281 8.1 Stress at a Point: Analytical Development 281 8.2 Mohr's Circle 285 Problems 292 Chapter 9 Subsurface Stresses 295 9.1 Stresses Caused by the Soil Mass 295 Vertical Stresses 295 Effect of Groundwater Table 296 Horizontal (Lateral) Stresses 297 9.2 Stress within the Soil Mass Resulting from Vertical Surface Loading Uniform Homogeneous Soils 300 Boussinesg Stress Distribution 300 Westergaard Stress Distribution 301 Computational Aids 302 Application for Foundation Loading 303 Sixty-Degree Approximation 306 Layered Soils Having Different Properties 307 Effect of Changing the Surface Grade 310 Problems 312 Chapter 10 Settlement: Soil Compression, Volume Distortion, Consolidation 316 10.1 Basic Considerations 316 10.2 Settlement of Foundations on Sand 320 Schmertmann Method 320 Approximations for Estimating Settlement of Foundation on Sand 325 Volume Distortion Settlement for Clays 327 Primary Compression Settlement for Clays 327 Primary Compression Settlement for Clays 331			
7.3 Frost Heave in Soils 258 Permafrost 263 7.4 Soil and Groundwater Contamination 265 Soil Gas 271 Use of Geosynthetics to Prevent Ground Contamination 276 Problems 278 Chapter 8 Combined Stresses in Soil Masses: Stress at a Point and Mohr's Circle 281 8.1 Stress at a Point: Analytical Development 281 8.2 Mohr's Circle 285 Problems 292 Chapter 9 Subsurface Stresses 295 9.1 Stresses Caused by the Soil Mass 295 Vertical Stresses 295 Effect of Groundwater Table 296 Horizontal (Lateral) Stresses 297 9.2 Stress within the Soil Mass Resulting from Vertical Surface Loading Uniform Homogeneous Soils 300 Boussinesy Stress Distribution 300 Westergaard Stress Distribution 300 Westergaard Stress Distribution 301 Computational Aids 302 Application for Foundation Loading 303 Sixty-Degree Approximation 306 Layered Soils Having Different Properties 307 Effect of Changing the Surface Grade 310 Problems 312 Chapter 10 Settlement: Soil Compression, Volume Distortion, Consolidation 316 10.1 Basic Considerations 316 10.2 Settlement of Foundations on Sand 320 Schmertmann Method 320 Approximations for Estimating Settlement of Foundation on Sand 325 Volume Distortion Settlement for Clays 327 Primary Compression Settlement for Clays 327 Primary Compression Settlement for Clays 331		4.75% B.4.5% C.4.6% B.4.6% C.4.5% C.4	
7.4 Soil and Groundwater Contamination 265 Soil Gas 271 Use of Geosynthetics to Prevent Ground Contamination 276 Problems 278 Chapter 8 Combined Stresses in Soil Masses: Stress at a Point and Mohr's Circle 281 8.1 Stress at a Point: Analytical Development 281 8.2 Mohr's Circle 285 Problems 292 Chapter 9 Subsurface Stresses 295 9.1 Stresses Caused by the Soil Mass 295 Vertical Stresses 295 Effect of Groundwater Table 296 Horizontal (Lateral) Stresses 297 9.2 Stress within the Soil Mass Resulting from Vertical Surface Loading Uniform Homogeneous Soils 300 Boussinesy Stress Distribution 300 Westergaard Stress Distribution 301 Computational Aids 302 Application for Foundation Loading 303 Sixty-Degree Approximation 306 Layered Soils Having Different Properties 307 Effect of Changing the Surface Grade 310 Problems 312 Chapter 10 Settlement: Soil Compression, Volume Distortion, Consolidation 316 10.1 Basic Considerations 316 10.2 Settlement of Foundations on Sand 320 Schmertmann Method 320 Approximations for Estimating Settlement of Foundation on Sand 325 Volume Distortion Settlement for Clays 327 Primary Compression Settlement for Clays 327 Primary Compression Settlement for Clays 331	7.3	Frost Heave in Soils 258	
Problems 278 Chapter 8 Combined Stresses in Soil Masses: Stress at a Point and Mohr's Circle 281 8.1 Stress at a Point: Analytical Development 281 8.2 Mohr's Circle 285 Problems 292 Chapter 9 Subsurface Stresses 295 9.1 Stresses Caused by the Soil Mass 295 Vertical Stresses 295 Effect of Groundwater Table 296 Horizontal (Lateral) Stresses 297 9.2 Stress within the Soil Mass Resulting from Vertical Surface Loading Uniform Homogeneous Soils 300 Boussinesy Stress Distribution 300 Westergaard Stress Distribution 301 Computational Aids 302 Application for Foundation Loading 303 Sixty-Degree Approximation 306 Loyered Soils Having Different Properties 307 Effect of Changing the Surface Grade 310 Problems 312 Chapter 10 Settlement: Soil Compression, Volume Distortion, Consolidation 316 10.1 Basic Considerations 316 10.2 Settlement of Foundations on Sand 320 Schmertmann Method 320 Approximations for Estimating Settlement of Foundation on Sand 325 Volume Distortion Settlement for Clays 327 Primary Compression Settlement for Clays 327 Primary Compression Settlement for Clays 331	7.4	Soil and Groundwater Contamination 265 Soil Gas 271
