

HAYT | THIRD EDITION

ENGINEERING ELECTRO- MAGNETICS

CONTENTS

	PREFACE	xi
1	VECTOR ANALYSIS	1
	Scalars and Vectors • Vector Algebra • The Cartesian Coordinate System • Vector Components and Unit Vectors • The Vector Field • The Dot Product • The Cross Product • Other Coordinate Systems: Circular Cylindrical Coordinates • The Spherical Coordinate System • Transformations between Coordinate Systems • Suggested References • Problems	
2	COULOMB'S LAW AND ELECTRIC FIELD INTENSITY	30
	The Experimental Law of Coulomb • Electric Field Intensity • Field of n Point Charges • Field Due to a Continuous Volume Charge Distribution • Field of a Line Charge • Field of a Sheet of Charge • Streamlines and Sketches of Fields • Suggested References • Problems	
3	ELECTRIC FLUX DENSITY, GAUSS'S LAW, AND DIVERGENCE	59
	Electric Flux Density • Gauss's Law • Application of Gauss's Law: Some Symmetrical Charge Distributions • Application of Gauss's Law: Differential Volume Element • Divergence • Maxwell's First Equation (Electrostatics) • The Vector Operator ∇ and the Divergence Theorem • Suggested References • Problems	

4	ENERGY AND POTENTIAL	89
	Energy Expended in Moving a Point Charge in an Electric Field • The Line Integral • Definition of Potential Difference and Potential • The Potential Field of a Point Charge • The Potential Field of a System of Charges: Conservative Property • Potential Gradient • The Dipole • Energy Density in the Electrostatic Field • Suggested References • Problems	
5	CONDUCTORS, DIELECTRICS, AND CAPACITANCE	127
	Current and Current Density • Continuity of Current • Metallic Conductors • Conductor Properties and Boundary Conditions • Semiconductors • The Nature of Dielectric Materials • Boundary Conditions for Perfect Dielectric Materials • Capacitance • Several Capacitance Examples • Capacitance of a Two-wire Line • Suggested References • Problems	
6	EXPERIMENTAL MAPPING METHODS	171
	Curvilinear Squares • Physical Models • Current Analogies • Fluid-flow Maps • The Iteration Method • Suggested References • Problems	
7	POISSON'S AND LAPLACE'S EQUATIONS	199
	Poisson's and Laplace's Equations • Uniqueness Theorem • Examples of the Solution of Laplace's Equation • Example of the Solution of Poisson's Equation • Product Solution of Laplace's Equation • Suggested References • Problems	
8	THE STEADY MAGNETIC FIELD	231
	Biot-Savart Law • Ampère's Circuital Law • Curl • Stokes' Theorem • Magnetic Flux and Magnetic Flux Density • The Scalar and Vector Magnetic Potentials • Derivation of Steady-magnetic-field Laws • Suggested References • Problems	
9	MAGNETIC FORCES, MATERIALS, AND INDUCTANCE	283
	Force on a Moving Charge • Force on a Differential Current Element • Force between Differential Current Elements • Force and Torque on a Closed Circuit • The Nature of Magnetic Materials • Magnetization and Permeability • Magnetic Boundary Conditions • The Magnetic Circuit • Potential Energy and Forces on Magnetic Materials • Inductance and Mutual Inductance • Suggested References • Problems	
10	TIME-VARYING FIELDS AND MAXWELL'S EQUATIONS	329
	Faraday's Law • Displacement Current • Maxwell's Equations in Point Form • Maxwell's Equations in Integral Form • The Retarded Potentials • Suggested References • Problems	
11	THE UNIFORM PLANE WAVE	359
	Wave Motion in Free Space • Wave Motion in Perfect Dielectrics • Plane Waves in Lossy Dielectrics • The Poynting Vector and Power Considerations • Propagation in Good Conductors: Skin Effect • Reflection of Uniform Plane Waves • Standing-wave Ratio • Suggested References • Problems	

12	TRANSMISSION LINES	407
	The Transmission-line Equations • Transmission-line Parameters • Some Transmission-line Examples • Graphical Methods • Several Practical Problems • Suggested References • Problems	
13	SEVERAL OTHER APPLICATIONS OF MAXWELL'S EQUATIONS	439
	The Laws of Circuit Theory • The Resonant Coaxial Cavity • Radiation • Suggested References • Problems	
	APPENDIX A VECTOR ANALYSIS	467
	General Curvilinear Coordinates • Divergence, Gradient, and Curl in General Curvilinear Coordinates • Vector Identities	
	APPENDIX B UNITS	472
	APPENDIX C MATERIAL CONSTANTS	478
	APPENDIX D ANSWERS TO ODD-NUMBERED PROBLEMS	482
	INDEX	487
