

Donald R. Wulfinghoff

**400**  
ways to save  
energy & money,  
with RATINGS!

# ENERGY EFFICIENCY MANUAL

- ✓ **EASY TO USE.** Get quickly to the information you need. Clear explanations. Hundreds of illustrations and examples.
- ✓ **FOR EVERYONE.** The primary reference for professionals. The best how-to guide for owners and managers. A sourcebook for students, writers, and everyone interested in energy and the environment.
- ✓ **COMPLETE.** Save the most energy in all types of businesses, institutions, industrial plants, factories, farms, and homes.
- ✓ **UP TO DATE.** The latest technology and methods. Get the facts about controversial issues.
- ✓ **QUICK PAYBACK.** Pays for itself the first time you use it. Based on real experience, makes your activities a success.

ENERGY INSTITUTE PRESS

# TABLE OF CONTENTS

Key to the Measures .....	inside front cover
How to Use the <i>Energy Efficiency Manual</i> .....	front endsheet
A Personal Note: The Right Way to Do Energy Conservation .....	7
Expression of Gratitude .....	13
<b>Section 1: BOILER PLANT .....</b>	<b>17</b>
1.1 Equipment Scheduling and Operating Practices .....	19
1.2 Boiler Plant Efficiency Measurement .....	43
1.3 Air-Fuel Ratio .....	59
1.4 Burner and Fan Systems .....	71
1.5 Draft Control .....	93
1.6 Firesides and Watersides .....	109
1.7 Combustion Gas Heat Transfer and Heat Recovery .....	119
1.8 Condensate, Feedwater, and Water Treatment .....	137
1.9 Fuel Oil Systems .....	173
1.10 Steam and Water Leakage .....	181
1.11 Conduction and Radiation Losses .....	211
1.12 System Design for Efficient Low-Load Heating .....	225
<b>Section 2: CHILLER PLANT .....</b>	<b>237</b>
2.1 Equipment Scheduling and Operating Practices .....	239
2.2 Optimum Operating Temperatures .....	263
2.3 Condenser and Evaporator Heat Transfer Efficiency .....	275
2.4 Heat Rejection Equipment .....	289
2.5 Pump Energy Consumption .....	317
2.6 Compressors .....	331
2.7 Refrigerant Condition .....	337
2.8 System Design for Efficient Low-Load Cooling .....	355
2.9 Exploiting Low Ambient Temperature for Water Chilling .....	367
2.10 Heat Recovery from Chillers .....	385
2.11 Cooling Thermal Storage .....	405
<b>Section 3: SERVICE WATER SYSTEMS .....</b>	<b>437</b>
3.1 Reducing Service Water Consumption .....	439
3.2 Water Heating Systems .....	457
3.3 Service Water Pumping .....	479
<b>Section 4: AIR HANDLING SYSTEMS .....</b>	<b>497</b>
4.1 Minimizing Duration of Operation .....	505
4.2 Outside Air Intake and Building Pressurization .....	517
4.3 Single-Zone Systems .....	579
4.4 Single-Duct Reheat Systems .....	605
4.5 Dual-Duct Reheat Systems .....	637
4.6 Multizone Systems .....	651
4.7 Variable-Air-Volume Single-Duct Systems .....	661
4.8 Variable-Air-Volume Dual-Duct Systems .....	681
4.9 Induction Systems .....	691

<b>Section 5: ROOM CONDITIONING UNITS</b>	<b>701</b>
<b>&amp; SELF-CONTAINED HVAC EQUIPMENT</b>	
5.1 Minimizing Equipment Operation	703
5.2 Radiators and Convectors	719
5.3 Fan-Coil Units	741
5.4 Self-Contained Air Conditioners and Through-Wall Heat Pumps	753
5.5 Remotely Cooled Air Conditioning Units and Heat Pumps	763
5.6 Heat Pump Loop Systems (Additional Measures)	779
5.7 Direct-Fired Heating Units	797
<b>Section 6: BUILDING AIR LEAKAGE</b>	<b>805</b>
6.1 Personnel Doors	807
6.2 Garage, Loading, and Equipment Doors	825
6.3 Window Air Leakage	859
6.4 Other Envelope Leakage	863
<b>Section 7: BUILDING INSULATION</b>	<b>873</b>
7.1 Roofs and Attics	875
7.2 Walls and Soffits	889
7.3 Glazing Insulation	907
<b>Section 8: CONTROL AND USE OF SUNLIGHT</b>	<b>913</b>
8.1 Reducing Cooling Load: Windows & Skylights	917
8.2 Reducing Cooling Load: Opaque Surfaces & Overall	953
8.3 Daylighting	965
8.4 Passive Solar Heating	1007
<b>Section 9: ARTIFICIAL LIGHTING</b>	<b>1017</b>
9.1 Lamps and Fixtures, Incandescent	1021
9.2 Lamps and Fixtures, Fluorescent	1045
9.3 Lamps and Fixtures, H.I.D. and L.P.S.	1071
9.4 Lighting Controls, Manual	1085
9.5 Lighting Controls, Automatic	1097
9.6 Lighting Layout	1115
9.7 Fixture Maintenance and Marking	1151
<b>Section 10: INDEPENDENT ENERGY-USING COMPONENTS</b>	<b>1159</b>
10.1 A.C. Induction Motors	1161
10.2 Centrifugal Pumps	1177
10.3 Fans	1187
10.4 Standby Equipment	1193

<b>Section 11: REFERENCE NOTES</b> .....	<b>1197</b>
<b>Group 1. ENERGY MANAGEMENT TOOLS</b> .....	<b>1199</b>
10. Clock Controls and Programmable Thermostats .....	1199
11. Personnel Sensors .....	1205
12. Placards .....	1213
13. Energy Management Control Systems .....	1219
14. Control Signal Polling .....	1227
15. Infrared Thermal Scanning .....	1229
16. Measurement of Liquid, Gas, and Heat Flow .....	1233
17. Energy Analysis Computer Programs .....	1239
<b>Group 2. ENERGY SOURCES</b> .....	<b>1247</b>
20. Fossil Fuels .....	1247
21. Electricity Pricing .....	1251
22. Low-Temperature Heat Sources & Sinks for Heat Pumps and Cooling Equipment .....	1259
23. Non-Fossil Energy Sources .....	1267
24. Characteristics of Sunlight .....	1283
<b>Group 3. MECHANICAL EQUIPMENT</b> .....	<b>1289</b>
30. Boiler Types and Ratings .....	1289
31. How Cooling Efficiency is Expressed .....	1297
32. Compression Cooling .....	1299
33. Absorption Cooling .....	1323
34. Refrigerants .....	1331
35. Centrifugal Pumps .....	1339
36. Variable-Speed Motors and Drives .....	1347
37. Control Characteristics .....	1379
<b>Group 4. BUILDING ENVELOPE</b> .....	<b>1385</b>
40. Building Air Leakage .....	1385
41. How Insulation Works .....	1389
42. Vapor Barriers .....	1393
43. Insulation Selection .....	1397
44. Insulation Integrity .....	1403
45. Insulation Economics .....	1405
46. Daylighting Design .....	1407
47. Passive Solar Heating Design .....	1417
<b>Group 5. LIGHTING</b> .....	<b>1425</b>
50. Measuring Light Intensity .....	1425
51. Factors in Lighting Quality .....	1427
52. Comparative Light Source Characteristics .....	1439
53. Lighting Efficiency Standards .....	1447
54. Incandescent Lighting .....	1449
55. Fluorescent Lighting .....	1461
56. H.I.D. and L.P.S. Lighting .....	1473
57. Light Distribution Patterns of Fixtures .....	1483
<b>Contributors of Illustrations</b> .....	<b>1485</b>
<b>Disclaimer &amp; Warning</b> .....	<b>1488</b>
<b>INDEX</b> .....	<b>1489</b>
