Contents

Preface x

PART I PERSPECTIVES 1

1 Introduction to the Electronics Industry *3*
- 1.1. Introduction and Definitions 3
- 1.2. History of Electronics Manufacturing 5
- 1.3. Emergence of the Global Market 7
- 1.4. Summary 12

2 Principles of Production *13*
- 2.1. Introduction 13
- 2.2. Product Life Cycle 17
- 2.3. Product and Process Relationships 19
- 2.4. Productivity 26
- 2.5. Case Study 31
- 2.6. Summary 33

PART 2 ELECTRONICS FUNDAMENTALS 35

3 Introduction to Electronic Components *37*
- 3.1. Introduction 37

3.2. Passive Discrete Devices 38
3.3. Solid-State Devices 48
3.4. Component Manufacturing and Packaging 64
3.5. Film Technology 65
3.6. Planar-Diffusion Technology 70
3.7. Integrated Circuits 72
3.8. Through-Hole Components 73
3.9. Surface-Mount Components 77
3.10. Summary 88

4 Interconnections ***93***
4.1. Introduction 93
4.2. Wire Bonding 95
4.3. Controlled Collapse Chip Connect 100
4.4. Tape Automated Bonding 102
4.5. Multiple Chip Packaging 116
4.6. Interconnection Devices 119
4.7. Cables 119
4.8. Connectors 122
4.9. Connector Descriptions 128
4.10. Summary 144

5 Printed Wiring Boards ***147***
5.1. Introduction 147
5.2. Types of Printed Wiring Boards 147
5.3. Base Materials 148
5.4. Fabrication 150
5.5. Image Transfer 155
5.6. Plating 158
5.7. Etching 165
5.8. Bare-Board Testing 167
5.9. Summary 168

6 Soldering and Solderability ***171***
6.1. Introduction 171
6.2. Soldering Materials 173
6.3. Soldering and Printed Wiring Boards 178
6.4. Automatic Soldering Techniques 181
6.5. Postsolder Cleaning 197
6.6. Summary 204

PART 3 AUTOMATIC ASSEMBLY **207**

7 Principles of Automation ***209***

7.1. Introduction 209
7.2. Robots 209
7.3. Machine Vision Technology 225
7.4. X-Ray and Laser Inspection Technologies 229
7.5. Summary 232

8 Leaded Component Insertion ***235***

8.1. Introduction 235
8.2. Axial-Lead Components 238
8.3. Radial-Lead Components 247
8.4. Dual In-Line Package Components 249
8.5. Optimal Insertion Pattern 261
8.6. Summary 263

9 Surface-Mount Device Placement ***265***

9.1. Introduction 265
9.2. Surface-Mount Assemblies 266
9.3. Placement 266
9.4. Substrate Requirements 271
9.5. Placement Accuracy Requirements 274
9.6. Machine Vision in SMT 274
9.7. Component Handling 276
9.8. Placement Machines 280
9.9. Summary 282

PART 4 LIFE-CYCLE ENGINEERING **285**

10 Design for Assembly ***287***

10.1. Introduction 287
10.2. Management Principles 288
10.3. General and Mechanical Design Rules 291
10.4. PWB Design Rules 297
10.5. DFA for Through-Hole Applications 297
10.6. DFA for Surface-Mount Applications 303

10.7. DFA for Interconnection 309
10.8. DFA Rating 312
10.9. Summary 313

11 Quality and Reliability ***317***
11.1. Introduction 317
11.2. Quality Management 319
11.3. Design 326
11.4. Statistical Quality Control 333
11.5. Reliability 355
11.6. Summary 367

12 Testability ***375***
12.1. Introduction 375
12.2. Testing Objectives 375
12.3. Cost of Testing 383
12.4. Testing Techniques 390
12.5. Design for Testability 396
12.6. Summary 402

13 Environmental Stress Screening ***405***
13.1. Introduction 405
13.2. Concept and Terminology 405
13.3. Screen Selection 407
13.4. Screen Placement 407
13.5. Screening Procedures 410
13.6. Summary 415

PART 5 MANUFACTURING SYSTEMS **417**

14 Facilities and Materials Handling ***419***
14.1. Introduction 419
14.2. Facilities 419
14.3. Materials Handling 428
14.4. Ergonomics and Workstations 442
14.5. Electrostatic Discharge Control 449
14.6. Environmental Control Systems 458
14.7. Case Study 470
14.8. Summary 476

15 Production and Inventory Control 479

15.1. Introduction 479
15.2. Forecasting Methods 480
15.3. The Procurement Process 485
15.4. Inventory Systems and Lot-Sizing Methods 486
15.5. Master Scheduling 487
15.6. Material Requirements Planning 489
15.7. MRP Lot-Sizing Heuristics 499
15.8. Reorder-Point Inventory Systems 502
15.9. Just-in-Time Inventory Systems 509
15.10. Scheduling 511
15.11. Capacity Planning 511
15.12. Machine Scheduling Methods 512
15.13. Dispatching 515
15.14. Expediting 516
15.15. Summary 516

16 Production Economics 521
16.1. Introduction 521
16.2. Types of Production Costs 521
16.3. Indirect Labor and Organizational Size 524
16.4. Fixed and Variable Costs 526
16.5. Break-Even Analysis 526
16.6. Material Costs 529
16.7. Economics of Automation 530
16.8. Engineering Economic Analysis 531
16.9. A Case Study Involving Automation Economics 537
16.10. Product Improvement Curves 542
16.11. Summary 554
